

## Iowa Iowa Army Ammunition Plant

---

### ***Facility and Location***

The Iowa Army Ammunition Plant (IAAP) is located in southeastern Iowa near the city of Burlington. The IAAP's primary mission is to load, assemble, and pack large caliber ammunition.

### ***Media Sampled and Findings***

**Groundwater** — In 2010, one sample taken under Military Munitions Response Program reported no detection. Prior to 2007, 4 of 67 samples from seven sites detected perchlorate up to 28 ppb. The four positive samples were later determined to be false positives due to the sampling methodology. Additional sampling and analysis did not detect perchlorate at these sites.

### ***Appropriate Actions***

Not Applicable. All samples were confirmed to be below the EPA and DoD Preliminary Remediation Goal of 15 ppb.
