

## Tennessee Tullahoma Bombing and Gunnery Range

---

### ***Facility and Location***

In early 1943, 10,048 acres in Bedford County were obtained. Correspondence dated July 19, 1943 indicates possession of the lands for the site should be granted immediately. On December 5, 1945, the Office of Engineers, Real Estate designated the facility as surplus. The leases for the land were terminated between February and August 1946 and the land was returned to the possession of its owners. The site now has numerous owners and is used for both residential and agricultural purposes.

### ***Media Sampled and Findings***

**Drinking Water** — In 2008, one of three samples detected perchlorate at 0.01 ppb.

### ***Appropriate Actions***

Not Applicable. All samples were below the EPA and DoD Preliminary Remediation Goal of 15 ppb.
