

## Virginia Norfolk Naval Shipyard

---

### ***Facility and Location***

Norfolk Naval Shipyard (NNSY) is the oldest shipyard in the U.S. It was originally devoted exclusively to ship repair and overhaul dating to 1767. The shipyard is located near the mouth of Chesapeake Bay. The mission of NNSY is to provide logistics support for assigned ships and service craft; perform work in connection with conversion, overhaul, repair, alteration, dry docking, and outfitting of ships and craft; perform manufacturing, research, development, and test work; and provide services and materials to other activities and units. The shipyard exists to support the fleet in any manner directed. With its seven dry docks, the shipyard can accommodate any ship in the fleet. State of the art technology provides capability to service nuclear as well as conventional ships of all sizes and types, from tugboats to submarines to aircraft carriers.

### ***Media Sampled and Findings***

**Drinking Water** — In 2007, one sample detected perchlorate at 0.22 ppb. Prior to 2007, one sample detected perchlorate at 0.6 ppb.

### ***Appropriate Actions***

Not Applicable. All samples were below the EPA and DoD Preliminary Remediation Goal of 15 ppb.
