

APPENDIX B

SIKES ACT

The Sikes Act (as amended in 1997) requires DoD installations to prepare Integrated Natural Resource Management Plans (INRMPs). The plans assist base commanders in conserving and rehabilitating natural resources while supporting the military mission.

Installations must review and update these plans every 5 years. The 1997 Amendments require installations to complete and update their plans by November 18, 2001.

Installations also are required to seek the cooperation of the FWS and appropriate state fish and wildlife agencies concerning natural

resource management. This is to ensure that DoD, FWS, and state agencies concur on resource management practices and to provide DoD with access to the expert knowledge of the FWS and state agencies.

Installations are required to report specific data annually. The data categories on the following pages are self-explanatory except “Current List of Projects,” which refers to whether or not the installation has a current list of projects or methodologies essential to implement the plan’s objectives for the next fiscal year.
