STANDARDIZED PLANS - 1890 to 1917

Numbers 145 thru "Special Numbers"

(Use single quotes)

.....
This volume contains the standardized plans for family housing that have been identified from the second period of standardization. Plan numbers that begin with OQ-, NCO-, or HSQ- have been assigned by the author, the remainder are official Army designations called "Regular Numbers" and "Special Numbers". "Plan Type" lists the type of quarters (officer's quarters- double set, non-commissioned officer's quarters- triple set, etc.), its size, and the building material assigned to that number. "Basic Unit" relates the plan number to the Plan Analysis in Volume I. "Known Locations" lists those Army posts where the plan was known or planned to have been built but it is by no means a complete listing of the locations where a particular design was built.
.....

SPECIAL NUMBERS

The following plans were given "Special Numbers" (spl). There were a total of 71 special numbers assigned to drawings dealing with family quarters: 21 were for additions or remodeling work; 8 were for buildings in the Philippines; 1 was for "Buildings for a 2 Company Post" in Alaska; and 42 were for complete building designs. Of these 42 designs, 7 are included here because they were not assigned to a specific location. An eighth, 3-162, is also included because it is known to have been built in at least one other location in addition to the one listed on the drawing.
