| TX                                      | Wichita            | Wichita Falls  | Municipal Airport (Sheppard AFB)                    | Designation 4   |
| UT                                      | Weber & Davis      | Ogden          | Hill Field (Hill AFB)                               | Designation 1, WPA resources; potential partnership with Hill Aerospace Museum to interpret CCC-WPA resources. Relocated, rehabilitated structures of the era at the museum.                          |
| VA                                      | Elizabeth City     | Hampton        | Langley Field                                       | Designation 1   |
| WA                                      | Pierce             | Nr. Lakeview   | McChord Flying Field                                | Designation 1, McChord Flying Field Historic District, hangars and other structures along the flightline; on-site interpretation at base museum.  |
| WY                                      | Laramie            | Nr. Cheyenne   | Fort Francis E. Warren                              | Designation 1, two base museums and State Historical Society in Cheyenne for partnering on interpretation of CCC-WPA history, historic buildings include NYA log building, warehouses, and gymnasium. |
| <b>AIR RESERVE INSTALLATIONS</b>        |                    |                |   |   |
| CA                                      | Kern               |                | March AFB, Edwards AFB                              | Designation 4   |
| GA                                      | Cobb               | Marietta       | Dobbins Air Base                                    | Designation 4   |
| MA                                      | Hampden            | Westover       | Westover Air Reserve Base                           | Designation 2. Historic district composed of WPA Colonial Revival buildings   |
| WI                                      | Lake               | Milwaukee      | Auxiliary Flying Field (General Mitchell Field)     | Designation 4   |
| <b>AIR NATIONAL GUARD INSTALLATIONS</b> |                    |                |   |   |
| AL                                      | Jefferson          | Birmingham     | Municipal Airport                                   | Designation 4,  |
| AL                                      | Montgomery         |                | Auxiliary flying field (Dannelly Field)             |   |

**Legend:**

Designation 1: Known CCC-WPA resources, base or local museum present for partnering on CCC-WPA interpretation  
 Designation 2: Known CCC-WPA resources, base or local museum for partnering on CCC-WPA interpretation is unknown  
 Designation 3: Unknown or suspected CCC-WPA resources, base or local museum present to interpret base CCC-WPA history  
 Designation 4: Unknown or suspected CCC-WPA resources, unknown or no base or local museum to interpret base CCC-WPA history

Note-Many installations have been designated 4 due to lack of information. Installations are coded as designation 3 or 4 if they have a historic district with a period of significance that includes 1933-1943 (years when CCC-WPA resources were constructed) but specific CCC-WPA resources are not known but are suspected.

Nationwide Context, Inventory, and Heritage Assessment of Works Progress Administration and Civilian Conservation Corps Resources on Department of Defense Installations

Table C-3. DoD Installations with CCC-WPA Resources and Heritage Tourism/Public Interpretation Potential

| State                     | County            | City             | Location                           | Heritage Tourism/Public Interpretation Potential  |
|---------------------------|-------------------|------------------|------------------------------------|---|
| CA                        | Santa Clara       | Sunnyvale        | Moffett Field                      |   |
| GA                        | Chatham           | Savannah         | Municipal Airport (Savannah IAP)   |   |
| IA                        | Polk              | Des Moines       | Municipal Airport                  | Designation 2, WPA combined hangar-administrative building constructed 1940 and is NRHP eligible. Potential for small interpretive display at base or signage and at military museum at Camp Dodge.   |
| ID                        | Ada               | Boise            | Municipal Airport                  |   |
| IN                        | Allen             | Fort Wayne       | Municipal Airport                  |   |
| MI                        | Calhoun           | Nr. Battle Creek | Municipal Airport                  |   |
| NY                        | Onondaga          | Nr. Syracuse     | Municipal Airport (Hancock)        |   |
| OR                        | Multnomah         | Portland         | Portland Air Base                  |   |
| TX                        | Dallas            | Dallas           | Love Field (Dallas Fort Worth IAP) |   |
| WI                        |                   |                  | Volk Field                         | Designation 1, potential partnership with Army National Guard Camp Williams to interpret WPA history; WPA buildings extend across both ANG and Army National Guard property.  |
| <b>ARMY INSTALLATIONS</b> |                   |                  |                                    |   |
| AZ                        | Cochise           | Tombstone        | Fort Huachuca                      | Designation 1, base museum with CCC-WPA books of historic photos; historic district with Million Dollar Barrack, also reservoir, ditches, garages, warehouses; murals; historically both CCC camp and WPA.  |
| CA                        | Monterey          | Monterey         | Presidio of Monterey               | Designation 2   |
| DC                        |                   | Washington       | Army Medical Center                |   |
| DC                        |                   | Washington       | Fort Humphreys (Fort Belvoir)      | Designation 3   |
| GA                        | Bibb              | Macon            | Hunter AAF                         | Designation 3   |
| GA                        | Fulton            | Atlanta          | Fort Gillem                        | Designation 3   |
| HI                        | Honolulu          | Honolulu         | Schofield Barracks                 | Designation 3   |
| IL                        | Rock Island       | Rock Island      | Rock Island Arsenal                | Designation 3   |
| KS                        | Geary             | Junction City    | Fort Riley and Marshall Field      | Designation 1, several base museums and local historical society for partnering on interpretation of CCC-WPA history; extensive historic district with barracks and other housing, CCC-constructed monument, airfield levee, extension to rifle range, and warehouses.                                      |
| KS                        | Leavenworth       | Nr. Leavenworth  | Fort Leavenworth                   | Designation 1, base museum and local museum/historical society for partnering on interpretation of CCC-WPA history; historic district with CCC-WPA buildings.   |
| KY                        | Hardin, Meade,    | Nr. Fort Knox    | Fort Knox                          | Designation 3   |
| LA                        | Vernon            | Lessville        | Camp Polk                          | Designation 3   |
| MD                        | Anne Arundel      | Nr. Annapolis    | Fort Meade                         | Designation 3   |
| MD                        | Harford           | Edgewood         | Edgewood Arsenal                   | Designation 3   |
| MD                        | Harford           | Havre de Grace   | Aberdeen Proving Ground            | Designation 3   |
| MO                        | Pulaski           | Rolla            | Fort Leonard Wood                  | Designation 3   |
| NC                        | Hoke & Cumberland | Nr. Fayetteville | Ft. Bragg and Pope Field           | Designation 3   |
| NJ                        | Burlington        | Wrightstown      | Camp Dix                           | Designation 3   |
| NJ                        | Monmouth          | Sandy Hook       | Fort Monmouth                      | Designation 2   |
| NY                        | Albany            | Watervliet       | Watervliet Arsenal                 | Designation 2   |
| NY                        | Kings             | New York City    | Fort Hamilton                      | Designation 2   |
| NY                        | Orange            | Newburgh         | U.S. Military Academy              | Designation 2   |
| OK                        | Comanche          | Nr. Lawton       | Fort Sill                          | Designation 1, base museum and local historical society for partnering on interpretation of CCC-WPA resources; CCC-WPA resources include artillery bowl, theatre, likely ditches, warehouses, Hostess House, and others. Base has National Historic Landmark district and NRHP-eligible historic districts. |

Legend:

- Designation 1: Known CCC-WPA resources, base or local museum present for partnering on CCC-WPA interpretation
- Designation 2: Known CCC-WPA resources, base or local museum for partnering on CCC-WPA interpretation is unknown
- Designation 3: Unknown or suspected CCC-WPA resources, base or local museum present to interpret base CCC-WPA history
- Designation 4: Unknown or suspected CCC-WPA resources, unknown or no base or local museum to interpret base CCC-WPA history

Note-Many installations have been designated 4 due to lack of information. Installations are coded as designation 3 or 4 if they have a historic district with a period of significance that includes 1933-1943 (years when CCC-WPA resources were constructed) but specific CCC-WPA resources are not known but are suspected.

| UT    | Hillard                   | Fillmore              | Armory                              | Designation 4   |
| UT    | Salt Lake                 | Nr. Salt Lake City    | Camp Williams                       | Designation 4   |
| VA    | Campbell                  | Altavista             | Armory                              | Designation 4   |
| VT    | Chittenden                | Bolton                | Fort Ethan Allen                    | Designation 2,  |
| WA    | Lewis                     | Centralia             | Armory                              | Designation 4   |
| WA    | Pierce                    |                       | Camp Murray                         | Designation 4   |
| WA    | Whitman                   | Pullman               | Armory                              | Designation 4   |
| WI    | Dane                      | Stoughton             | Armory                              | Designation 4   |
| WI    | Grant                     | Platteville           | Armory                              | Designation 4   |
| WI    | Monroe                    | Sparta                | Camp Williams                       | Designation 1, potential partnership with Air National Guard Volk Field to interpret WPA history; WPA buildings extend across both Air National Guard and Army National Guard property.   |
| WV    | Preston                   | Nr. Kingwood          | Camp Dawson                         | Designation 4   |
| WY    | Platte                    | Nr. Guernsey          | Camp Guernsey                       | Designation 1, CCC-constructed cantonment historic district eligible for the NRHP. Potential to interpret at base welcome center and nearby state park with CCC resources and museum.   |

**Legend:**

Designation 1: Known CCC-WPA resources, base or local museum present for partnering on CCC-WPA interpretation

Designation 2: Known CCC-WPA resources, base or local museum for partnering on CCC-WPA interpretation is unknown

Designation 3: Unknown or suspected CCC-WPA resources, base or local museum present to interpret base CCC-WPA history

Designation 4: Unknown or suspected CCC-WPA resources, unknown or no base or local museum to interpret base CCC-WPA history

Note-Many installations have been designated 4 due to lack of information. Installations are coded as designation 3 or 4 if they have a historic district with a period of significance that includes 1933-1943 (years when CCC-WPA resources were constructed) but specific CCC-WPA resources are not known but are suspected.

Note-Many installations have been designated 4 due to lack of information. Installations are coded as designation 3 or 4 if they have a historic district with a period of significance that includes 1933-1943 (years when CCC-WPA resources were constructed) but specific CCC-WPA resources are not known but are suspected.

## **APPENDIX D**

### **PROJECT DOCUMENTATION REPORTS**

***THIS PAGE INTENTIONALLY LEFT BLANK***

## **CCC-WPA Resources Legacy Grant Case Study: Fort Huachuca, Arizona**

## **1 Introduction**

Fort Huachuca is situated in western Cochise County, southeast Arizona and encompasses 73,272 acres. It is located in the middle San Pedro River valley in a basin-and-range geographic setting within the Lower Sonoran Zone of the Chihuahu Desert (Van West et al 1997). The base rests on the slopes of the Huachuca Mountains for which the base is named, approximately 15 miles north of the Mexico/United States border.

The fort was a centerpiece in the Indian Wars of the 1870s and 1880s and was later important for its role in border protection, the Punitive Expedition, and the presence of Buffalo Soldiers through World War II. Since that time the base has become home to communications and intelligence commands for the U.S. Army.

## **2 Field and Research Methods**

Research and field survey were conducted at Ft. Huachuca 3-5 September 2008 by Daniel Hart and Chad Blackwell.

### **2.1 Research**

Research was conducted at the Fort Huachuca Museum and Archives, Real Property Office, and Cultural Resources Office. Historic maps, photographs, and documents were collected as well as real property data, technical reports, and oral histories.

### **2.2 Field Survey**

Surveyors met with Cultural Resource Manager Charles Slaymaker, who provided a list of buildings constructed during the target period or believed to have WPA or CCC associations. Mr. Slaymaker also identified buildings not previously surveyed nor evaluated for NRHP-eligibility. This list was cross-referenced with information from WPA project cards at the National Archives to narrow the list further to those with available documentation. A windshield survey of the base and its resources was conducted on 3 September with Mr. Slaymaker and Fort Huachuca Museum technician Steve Gregory. During the windshield survey, prospective buildings were identified and assessed briefly to form a snapshot of the variety of WPA/CCC-era building types and structures present at Huachuca. Further research at the Fort Huachuca Museum and Archives revealed further documentation for some buildings and new documentation on others. Through this process, a list of buildings to survey was compiled which reflected a representative sample of the variety and types of WPA- and CCC-related buildings at Fort Huachuca. Resource types built by WPA and CCC at Fort Huachuca included water-related structures, recreational facilities, water conveyance infrastructure, bridges, renovations to existing buildings, and new construction, primarily barracks and garages at officers' quarters. Examples of all of these resource types are extant at Fort Huachuca and had yet to be surveyed or evaluated with the exceptions of the Million Dollar Barracks and the Brock Field enlisted men's grandstand.

Surveyors recorded the selected buildings on Arizona Historic Property Inventory Forms, through photography with a Canon EOS Digital Rebel 7 megapixel camera, and assigned a UTM (Universal Transverse Mercator) number with a geographic positioning system (GPS) receiver

### **3 Historic Context**

#### **3.1 General Historical Overview**

Fort Huachuca was established in 1877 to protect settlers in the southern portion of the Arizona Territory, only 15 miles north of the United States/Mexico border. Cavalry and Infantry stationed at Huachuca continued a frontier pacification and protection mission until the 1890s. As frontier posts throughout the West were consolidated or decommissioned, Fort Huachuca remained active due to its proximity to the international border and favorable location. Permanent buildings constructed during this period reflect the growth in size and importance of Huachuca. The Buffalo Soldiers of the 10<sup>th</sup> Cavalry Regiment called Fort Huachuca home for eighteen years beginning in 1913, and the post acted as the staging area and supply base for the Punitive Expedition of 1916-17 (Smith 1978:174-6, 198). Drastic troop reductions after World War I resulted in the 10<sup>th</sup> Cavalry being transferred in 1931, while Huachuca became the home of the 25<sup>th</sup> Infantry from 1928 to 1942 (Smith 1978:198). Fort Apache was deemed surplus to requirements in October 1922 and one of the few remaining Indian Scout detachments was transferred to Fort Huachuca. The Indian Scouts remained activated, dwindling in number until only four remained and the detachment was deactivated along with the post in 1947 (Smith 1978:273).

During the depression, construction by the Civilian Conservation Corps (CCC), Works Progress Administration (WPA), and Civil Works Administration (CWA) modernized and upgraded Huachuca, replacing or renovating existing buildings and building new facilities. These groups were integral in rehabilitating existing or building new roads, wells, buildings, bridges, and other infrastructure critical to the survival of the base. These work projects continued to the beginning of World War II when the base turned its focus to training soldiers headed to Europe and the Pacific. This new and largely temporary construction centered near the East gate of Fort Huachuca (Van West et al. 1997).

Following World War II, the base closed in 1947 in an effort to curb post-war spending, was reactivated in 1951 for the Korean War, and again shut down in 1953 when operations for the war subsided (Smith 1978:311). However, in 1954 the base was returned to permanent use and became the site of the U.S. Army Electronic Proving Ground. As a result the fort saw another growth spurt during the 1950s and early 1960s that put it at the forefront of military research and development for electronic warfare. Other related army organizations were sited at Fort Huachuca during the 1960s and 1970s. These include the U.S. Army Strategic Communications (Stratcom) command in 1967 and the U.S. Army Intelligence Center and School (USAICS) in

1971. These major commands operate at the base and are the main focus of activity through the present time (VanWest et al. 1997).

### **3.2 WPA/CCC Era at Fort Huachuca**

The CCC was formed in March 1933 to provide work for a quarter of a million unemployed men across the country. In his papers, Lieutenant Colonel Matthew Tomlinson, commander of the 25<sup>th</sup> Infantry and Fort Huachuca, remembered that in 1933 and 1934 “the only important work performed...was the organization of the CCC camps in central and southern Arizona” (Finley 1996:52). The War Department was responsible for administering CCC camps at the local level and Fort Huachuca had a CCC training camp and acted as the distribution center for CCC camps in Arizona. Tomlinson recalls the locations of many of the early camps in the region, but remarked in the early days of the CCC in southern Arizona not much was accomplished due to a lack of work and the uncertainty of the longevity of the program (Finley 1996:52). Four CCC Companies (832, 841, 1841, and 2871) were active near Fort Huachuca from 1933 onward, all on Department of Forestry or National Forest projects (<http://www.ccclegacy.org/arizona1.htm>) except for 2871 assigned to Huachuca (CCC Camp Inspection Report, 1 November 1935). The Huachuca CCC camp (named Army-1-A) performed work at Huachuca that included erosion control, construction of check dams, stream confinement, road construction, and fire break construction (CCC Inspection Report, 1 November 1935).

From 1934 to 1936, the first major appropriations for the WPA at Fort Huachuca resulted in work to bring the post into the twentieth century. In the fall of 1936, the supervisor of the early appropriations, Maj. S.J. Raymond, Quartermaster Corps, wrote a summary of work completed between 1934 and 1936. According to the Quartermaster's summary, the post was first advised of the availability of funds on July 8, 1934 and work began at Fort Huachuca almost immediately (Finley 1996). Appropriations were split between improvements and new construction with the Post Quartermaster (Maj. Raymond) supervising the former and the Constructing Quartermaster supervising the latter. Under these early works, electrical and plumbing systems were upgraded in existing structures, repairs were made to existing structures, roads were paved, and improvements made to the training camp area that housed workers hired to perform the work (Finley 1996). By July 18, 1934, eight men were hired through the Bisbee Employment Office and work had started. By April 1936, the number of workers supervised by the Post Quartermaster had swelled to 358 men. Similarly, 60 men were placed on the Constructing Quartermaster's payroll in September 1935 and by May 1936 the payroll included 257 workers (Finley 1996).

The availability of water at Fort Huachuca had been one of the most important factors in the long-term viability of the post since its inception. A number of the WPA projects undertaken at Fort Huachuca attempted to address the problem of a reliable water source and secure the long-term future of the post. One of the first projects was the drilling and construction of a well at the east gate. Two more wells were constructed with WPA funding near the east gate in 1936 and 1940, along with a treatment plant (1938) and a second reservoir (1939), both on "Reservoir Hill."

Raymond's description of the aim of the paving projects at Huachuca sums up the overall philosophy of the WPA: "*Use of as many workers as possible and simultaneously to use what machinery was available efficiently, to give the post a good, durable, paved highway, was the aim*" (Finley 1996). Highlights of the work completed between 1934 and 1936 mentioned in the Quartermaster's report included: drilling of a well at the emergency landing field to provide water for the post, construction of two schools (segregated), paving and rerouting of existing roads, reconstruction of the reservation fence with barbed wire and metal posts, construction of garages for garrison personnel, and addition of improvements to allow the establishment of a summer training school for local military accessory schools. The report concluded with a description of the CCC camp established to house the workers and the provisions they were given ("a cot and blankets, and mess equipment").

In the spring of 1936, the U.S. Congress authorized appropriations for military posts nationwide that included \$1,641,828 in appropriations for Fort Huachuca (U.S. Senate 1936). According to

the accompanying report, the appropriations were largely designed to modernize the installation's late nineteenth century structures and infrastructure. Modernization upgrades included those to the adobe hospital built in 1882, reconstruction of the water supply system, and motorization infrastructure to support the military's move to motorized forces. Also included in the appropriations was money for paved roads, recreational facilities, and garages for personal automobiles. From these appropriations came the bulk of the WPA funded work at Fort Huachuca (HR Report No.2654 to accompany H.R.12511, May 14, 1936).

WPA and CCC projects completed at Fort Huachuca between 1936 and 1940 included some of the largest undertakings. The "Million Dollar Barracks" (31122), a three-story, poured concrete Spanish Colonial Revival structure, was completed in 1939 and is the most visible reminder of this period at Fort Huachuca (Van West 1997:305). Two new wells (Well No. 1 in 1936 and Well No. 2 in 1940) were drilled at the Emergency Landing Field (now the East Gate) and the success of Well No. 1 precipitated the construction of Reservoir No. 2 in 1939 on Reservoir Hill, which is the ridge overlooking the Old Post (Van West et al. 1997:305). Improvements to the officers' quarters along the parade ground were also made during this period (Van West et al. 1997:305). Grierson Street directly behind Officers' Row contains a number of WPA/CCC improvements including: stone garages for officers' automobiles, servants' quarters, retaining walls, and drainage ditches. Drainage ditches were also added to the front and rear of the row of the four double barracks fronting the north side of the parade ground.

Most of the WPA projects constructed before 1940 consisted primarily of infrastructure upgrades and repairs to buildings not related directly to prewar personnel increases and mobilization. The prime exception, construction of the “Million Dollar Barracks”, marked the beginning of a shift towards projects addressing expansion of both the post and its mission that would continue into the early 1940s (Van West et al. 1997:305). WPA work at Fort Huachuca between 1940 and 1942 saw the construction of the officers’ mess (43002), one of the largest buildings constructed during the World War II period. A number of storage buildings (22526, 22528, and 22530) were overhauled between 1940 and 1942, but by 1942 WPA funds had largely been reallocated towards the impending conflict.

## 4 Survey Results

Ten resources (Table 1) were surveyed at Fort Huachuca on 5 and 6 September, 2008. The surveyed resources represent a cross-section of resource types from the WPA-CCC era at Fort Huachuca. No resources associated with the CCC training camp are extant at Huachuca and little documentation was found associating the CCC camp with extant resources. However, this does not suggest that no labor from the CCC training camp was used to construct any of the improvements at Huachuca. It is likely enrollees at the CCC training camp worked on various projects at Huachuca, particularly those requiring less skilled labor such as road grading, ditch digging, and wall building. Since work performed using WPA funding included renovations, infrastructure, and new construction, an attempt was made to survey resources falling in each of these categories. Table 4-1 is a summary of the resources surveyed.

**Table 4-1: Table of Surveyed CCC-WPA Resources at Fort Huachuca**

| Historic Name                  | Building # | Construction Date | Original Use   | Current Use    | Notes  |
|--------------------------------|------------|-------------------|----------------|----------------|--|
| West (Canelo) Gate Guardhouse  | 11510      | c1938             | Guardhouse     | Guardhouse     | WPA New Construction   |
| Double Latrine at Target Range | 15331      | 1938              | Latrine        | Vacant         | WPA New Construction   |
| Bridge over Huachuca Creek     |            |                   | Transportation | Transportation | Infrastructure theme; Second lane (width doubled) at later, unknown date |
| Officers’ Grandstand           | 31123      | 1937              | Recreation     | Recreation     | Recreation theme; Canopy not extant                                      |
| Enlisted Men’s Grandstand      | 31124      | 1937              | Recreation     | Recreation     | Recreation theme; Previously surveyed                                    |

|  |       |         |                 |                 |   |
|--|-------|---------|-----------------|-----------------|---|
| Stone Embankment at SPRR Crossing                |       | 1936-7  | Transportation  | Transportation  | Infrastructure theme  |
| Garage behind Allen House                        | 42021 | 1936    | Garage          | Garage          | All garage doors replaced, metal fascia added along roof eaves  |
| Drainage Ditches and Walls along Grierson Street |       | c1936-9 | Drainage        | Drainage        | Infrastructure theme; Features include flagstone faced walls and ditches with coal boxes and culverts under driveways |
| Reservoir No. 2                                  | 22002 | 1939    | Water storage   | Water storage   | Water management theme  |
| Water Treatment Plant                            | 22004 | 1938    | Water treatment | Water treatment | Water management theme  |

### **Water Management Resources**

Several of the WPA/CCC-era projects at Fort Huachuca were constructed to establish a regular source and storage of water for the post. Resources associated with WPA water source and retention projects include Reservoir No. 2 and the Water Treatment Plant on Reservoir Hill to the south of the Old Post parade ground. From the founding of Fort Huachuca, the securing of a reliable water source has been paramount to the viability of the post. Therefore, it is no surprise that a considerable amount of the WPA funding and labor expended at Huachuca related to sourcing and storing water. Collectively, these two structures are similar in their utilitarian design, with the reservoir constructed of poured concrete structural walls and the water treatment plant reflecting the fieldstone construction typical of many WPA and CCC projects. While neither of these structures are individually significant, together they represent a concerted effort to secure and store water at Fort Huachuca through WPA funded construction projects. Both retain high integrity in all aspects and are recommended NRHP-eligible.

### **Recreation Resources**

Several WPA projects at Fort Huachuca related to the recreation of soldiers stationed there. Huachuca holds a prominent place in Army athletics, from equestrian and polo events to track and field, and perhaps most notably, baseball (Smith 1978: 245). The 25<sup>th</sup> Infantry “Wreckers” baseball team in the Teens and the 9<sup>th</sup> U.S. Cavalry team in the Twenties both featured players who later played professionally in the Negro Baseball Leagues. Players such as Charles Wilbur “Bullet” Rogan, Oscar “Heavy” Johnson, Moses Herring, Robert Fagan, and Lemuel Hawkins played on the 25<sup>th</sup> Infantry baseball teams and had distinguished professional baseball careers. The 9<sup>th</sup> Cavalry baseball team won the Army Baseball League Championship in the 1920-21 season (Fort Huachuca Museum & Archives). Therefore, it is not surprising that two of the WPA projects at Fort Huachuca were to construct grandstands at Brock Field located at the rear of the Million Dollar Barracks. The Enlisted Men’s grandstand along the first base line included a dugout, canopy, wood bleachers and storage rooms along the rear façade. The Officers’ grandstand located behind the home plate backstop originally had a canopy and folding stadium chairs. The Enlisted Men’s grandstand was surveyed in 2000 and evaluated individually eligible for NRHP listing with architectural significance associated with WPA design and workmanship (Real Property records, Fort Huachuca). This evaluation remains justifiable in 2009. The Officers’ grandstand was constructed at the same time as the Enlisted Men’s grandstand and also holds architectural significance for WPA associations. Both grandstands were constructed after
