

# World War I and Korean War Era Superfund Facilities

**January 2023**

Office of the Under Secretary of Defense  
for Acquisition and Sustainment

The estimated cost of this report for the Department of Defense was approximately \$4,200 in Fiscal Year 2022. This includes \$2,300 in expenses and \$1,900 in DoD labor.  
Generated on December 23, 2022. RefID: 2-01A372F

Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List

Appendix B: The Status of Sites on the National Priorities List

## **I. INTRODUCTION**

Section 1075, of the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2022 (Public Law 117-81), requests that the Secretary of Defense submit a report to Congress on active Superfund facilities where a hazardous substance originated from Department of Defense (DoD) activities occurring between the beginning of World War I (WWI) and the end of the Korean War. Section 1075 requests a description of such Superfund facilities as well as any actions, planned actions, communication with communities, and cooperation with relevant agencies, including the U.S. Environmental Protection Agency (EPA), carried out or planned to be carried out by DoD.

## **II. DESCRIPTION OF SUPERFUND FACILITIES**

Section 1075 of the NDAA for FY 2022 defines the term “Superfund facility” as a facility included on the National Priorities List (NPL) pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (42 U.S. Code 9605). The NPL is the list of sites, compiled by EPA, of national priority among the known or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States and its territories. There are 135 active military installations, Formerly Used Defense Sites (FUDS) properties, and Base Realignment and Closure (BRAC) locations on the NPL. Appendix A provides a description of these facilities, where contamination originating from DoD activities may have occurred between the beginning of WWI and the end of the Korean War.

## **III. ACTIONS TAKEN AND ACTIONS PLANNED**

The Department is taking cleanup actions to address contamination originating from DoD activities nationwide, including at facilities on the NPL. DoD’s cleanup program follows the federal cleanup law, CERCLA, which provides a consistent national approach for addressing cleanup. DoD follows the CERCLA process to fully investigate releases, prioritize responses, and determine the appropriate cleanup actions based on risk to human health and the environment. The steps in the process include the following:<sup>1</sup>

- Preliminary Assessment (PA)/Site Inspection (SI)
- Remedial Investigation (RI)/Feasibility Study (FS)
- Remedial Design (RD)/Remedial Action-Construction (RA-C)
- Remedial Action-Operation (RA-O)
- Long-term Management (LTM)

In addition to these phases, CERCLA can include short-term actions called “removal” or “interim” actions, which DoD conducts to address contaminants quickly to prevent, minimize, or address threats to public health or to the environment. These actions can occur at any time

---

<sup>1</sup> Sites do not have to progress through all CERCLA phases. For example, no further action may be required at the end of the RI/FS phase. In addition, some sites may not require an RA-O or LTM phase if response actions completed during the RD/RA-C phase are sufficient to clean up the sites.

during the CERCLA process. They typically do not provide a final response action, and the site will continue through the CERCLA remedial process following completion of the removal or interim action.

As of the end of FY 2021, DoD has identified 7,518 individual NPL cleanup sites at the 135 active military installations, FUDS properties, and BRAC locations on the NPL. Appendix B shows the status of the CERCLA phases at these sites and provides the Response Complete (RC)<sup>2</sup> dates.

#### **IV. COMMUNICATION WITH COMMUNITIES**

DoD engages in several initiatives to ensure it communicates with communities in a consistent, open, and transparent manner. For example, in FY 2021, DoD maintained Restoration Advisory Boards (RABs) at 84 of the 135 facilities listed in Appendix A. RABs are community-oriented forums that encourage and facilitate communication and dialogue between citizens and installation decision makers regarding cleanup. Additionally, CERCLA and its regulations provide several opportunities for public input prior to selecting a remedy. Other community involvement initiatives include hosting public meetings, messaging through community social media, and maintaining cleanup documents and websites that provide the public with access to cleanup-related information.

#### **V. COOPERATION WITH RELEVANT AGENCIES**

The Department is fully committed to the substantive involvement of EPA and State environmental regulators throughout the CERCLA process. For example, DoD provides the affected regulators with notice of discrete phases of a response (e.g., discovery of a release, proposed response actions, start of response action) and adequate opportunity for timely review and comment on response actions. Additionally, the Defense and State Memorandum of Agreement authorizes DoD to enter into agreements on a reimbursable or other basis for services provided by State agencies to assist the Department in expediting its review of cleanup documents. DoD also has strengthened its cleanup policies and guidance to reinforce the importance of working with States and EPA throughout the cleanup process. These initiatives are integral to DoD's cleanup program. DoD also has entered into interagency agreements with EPA and appropriate State agencies to facilitate cooperation and the exchange of information in the cleanup process at DoD's NPL facilities. Appendix A contains information about these interagency agreements at these facilities.

#### **VI. CONCLUSION**

There are 135 active military installations, FUDS properties, and BRAC locations on the NPL. Contamination originating from DoD activities may have occurred at these facilities between the beginning of WWI and the end of the Korean War. The Department is taking action

---

<sup>2</sup> The Department measures cleanup progress against the RC milestone, which occurs when cleanup activities are complete and DoD has documented this determination and sought regulatory agreement (although DoD or a subsequent landowner may continue to monitor the site during the LTM phase).

under CERCLA to address contamination originating from DoD activities at these facilities. DoD is also engaged in several initiatives to ensure it communicates with communities about its cleanup efforts in a consistent, open, and transparent manner. Additionally, DoD partners with EPA and States throughout the CERCLA process to facilitate communication and cooperation, expedite cleanup, and ensure protection of human health and the environment.

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Army	MD321382135500	ABERDEEN PROVING GROUND	MD3210021355 & MD2210020036	Aberdeen Proving Ground (Michaelsville Landfill) & Aberdeen Proving Ground (Edgewood Area)	The mission of Aberdeen Proving Ground is to develop and test equipment and provide troop training. Studies have identified many areas of contamination, including chemical munitions and manufacturing waste sites. Resource Conservation and Recovery Act (RCRA) facility assessments identified 319 solid waste management units (SWMUs), which were combined into 13 study areas. Remedial investigations (RIs) identified high levels of organic contaminants in most study areas. Completed removal actions include removal of soil contaminated with metals, polychlorinated biphenyls (PCBs), petroleum hydrocarbons, trichloroethylene (TCE), and dichlorodiphenyltrichloroethane (DDT); removal of underground storage tanks (USTs); removal of unexploded ordnance (UXO); closure of Nike missile silos, an adam site vault, and pilot plant sumps; and cleanup of open dump sites. The potential risk to human health and the environment was significant enough for the U.S. Environmental Protection Agency (EPA) to place two areas of Aberdeen Proving Ground on the National Priorities List (NPL) in 1989 and 1990. The Department of Defense (DoD) and EPA signed an interagency agreement (IAG) in 1990 to outline how they were going to proceed with cleanup.	31.45 (Michaelsville Landfill); placed on NPL in October 1989 53.57 (Edgewood Area); placed on NPL in February 1990	Volatile organic compounds (VOCs), semi volatile organic compounds (SVOCs), metals, PCBs, explosives, petroleum products, pesticides, radiation, chemical warfare materiel (CWM), UXO, potential biological warfare materiel, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	686,458
Army	AL421382000800	ALABAMA AAP	AL6210020008	Alabama Army Ammunition Plant	The mission of Alabama Army Ammunition Plant (AAP) was to manufacture explosives. Studies conducted at Alabama AAP since Fiscal Year (FY) 1983 identified various sites as potential sources of contamination. Prominent site types include: a former ammunition production and burning ground for explosives, industrial wastewater conveyance systems, ditches, a red water storage basin, landfills, USTs, PCB-containing transformers, and a former coke oven. The groundwater, surface water, sediment, and soil are contaminated with nitroaromatic compounds, heavy metals, and explosives waste. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed a federal facility agreement (FFA) in December 1989 to outline how they were going to proceed with cleanup.	36.83; placed on NPL in July 1987	Nitroaromatic compounds, heavy metals, munitions-related wastes, VOCs, SVOCs, explosives, propellants	Groundwater	No	74,376
Army	AL421382002700	ANNISTON ARMY DEPOT	AL3210020027	Anniston Army Depot (Southeast Industrial Area)	Since 1948, the Army has repaired, rebuilt, and modified combat vehicles and artillery equipment at the Anniston Army Depot (AD) Southeast Industrial Area. Anniston AD also repairs small arms. Painting, degreasing, and plating operations at the installation generated wastes containing VOCs, phenols, heavy metals, and petroleum distillates. Identified sites at the installation include disposal pits, landfills, spill sites, storage areas, USTs, and waste treatment plants. The potential risk to human health and the environment was significant enough for EPA to place the Southeast Industrial Area on the NPL in March 1989. DoD and EPA signed an IAG in 1990 to outline how they were going to proceed with cleanup.	51.91; placed on NPL in March 1989	Phenols, petroleum products, acids, VOCs, caustics, SVOCs, heavy metals	Groundwater, Surface Water, Soil	Yes	100,308
Army	NE721382023400	CORNHUSKER ARMY AMMUNITION PLANT	NE2213820234	Cornhusker Army Ammunition Plant	Cornhusker AAP is a former ammunition manufacturing facility. In FY83, the installation identified an explosives-contaminated groundwater area migrating off site. The off-site contamination affected more than 250 private residences in Grand Island. In FY86 and FY95, the installation extended the Grand Island municipal water distribution system to all affected residences. Identified sites include aboveground storage tanks, burn areas, disposal pits, landfills, and waste treatment plants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an FFA in July 1990 to outline how they were going to proceed with cleanup.	51.3; placed on NPL in July 1987	Explosives and heavy metals	Groundwater and Soil	No	109,786
Army	TN421002057000	DEFENSE DEPOT MEMPHIS TENNESSEE	TN4210020570	Memphis Defense Depot (DLA)	Defense Distribution Depot (DDD) Memphis stored and distributed clothing, food, medical supplies, electronic equipment, petroleum products, and industrial chemicals until FY97. Contamination resulted from leakage, spillage, disposal, and the normal application of pesticides. Contaminants identified at DDD Memphis include petroleum/oil/lubricants (POLs), VOCs, pesticides, heavy metals, and chlorinated solvents. Identified sites include aboveground storage tanks, disposal pits, drainage ditches, landfills, spill sites, and storage areas. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in 1992. DoD, EPA, and the Tennessee Department of Environment and Conservation signed an FFA in 1995 to outline how they were going to proceed with cleanup.	58.06; placed on NPL in October 1992	POLs, VOCs, pesticides, heavy metals, chlorinated solvents	Groundwater and Soil	No	74,528
Army	UT821002092200	DEFENSE DIST DEPOT OGDEN UTAH	UT9210020922	Ogden Defense Depot (DLA)	The Ogden Defense Depot site was activated in 1941. This former military installation served as a storage and distribution facility for medical, industrial, construction and electronic supplies as well as food, clothing and petroleum products for military installations and other federal agencies. Other items that may have been stored at the installation in the past include containers of mustard gas and chemical warfare agent identification kits. Until the late 1970s, facility operations included on-site disposal of liquid and solid materials, incineration of oily liquid materials and combustible solvents in on-site burning pits, and burning and burial of solid wastes. These activities contaminated soil and groundwater. Identified contaminants include VOCs, metals, PCBs, and petroleum hydrocarbons. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD, EPA and the Utah Department of Environmental Quality signed an FFA in 1989 to outline how they were going to proceed with cleanup.	45.10; placed on NPL in July 1987	VOCs, metals, PCBs, petroleum hydrocarbons	Groundwater and Soil	No	14,466
Army	CA997152083200	DEFENSE DIST DEPOT SAN JOAQUIN, SHARPE FACILITY	CA8210020832	Sharpe Army Depot	DDD San Joaquin, Sharpe Facility began operation in 1941 as a supply and maintenance center. Activities at the property have included overhauls, repairs, painting, paint stripping, metal finishing, and degreasing of aircraft and heavy construction equipment. Investigations have identified contaminated groundwater, soil, and building sites. Contaminants identified at DDD San Joaquin, Sharpe Facility include VOCs, heavy metals, POLs, TCE, and pesticides. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an IAG in March 1989 to outline how they were going to proceed with cleanup.	42.24; placed on NPL in July 1987	VOCs, heavy metals, POLs, TCE, pesticides	Groundwater and Soil	No	120,376

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Army	MA121042027000	DEVENS RESERVE TRAINING FACILITY	MA7210025154	Fort Devens	Prior to closure in July 1991, Fort Devens supported Reserve component training. Identified sites included landfills, vehicle and equipment maintenance and storage yards, the Defense Reutilization and Marketing Office scrap yard, motor pools, and USTs. Investigations revealed soil and groundwater contamination. Contaminants identified at Fort Devens include VOCs, heavy metals, petroleum products, PCBs, pesticides, herbicides, and explosive compounds. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in 1989. DoD and EPA signed an FFA in November 1991 to outline how they were going to proceed with cleanup.	42.24; placed on NPL in November 1989	VOCs, heavy metals, petroleum products, PCBs, pesticides, herbicides, explosive compounds	Sediment and Groundwater	Yes	203,069
Army	MD321162026700	FORT DETRICK	MDD985397249	Fort Detrick Area B Ground Water	Fort Detrick is a premier quad-services installation committed to excellence. The primary missions include biomedical research and development, medical materiel management and global telecommunications. Identified restoration sites include 12 disposal and landfill areas, 10 buildings, 4 storage areas, 4 storage tank sites, 2 contaminated groundwater sites, 2 wash racks, a sewer line, a sewage treatment plant, a small arms range, a burn area, burn/open detonation area, and 4 other areas. Contaminants identified at the site include VOCs, biological materials, metals, and radionuclides. The environmental investigations of former operations that have caused groundwater contamination at Fort Detrick have been ongoing since 1992, when the installation first identified off-post groundwater contamination. The potential risk to human health and the environment was significant enough for EPA to place the Area B groundwater site on the NPL in April 2009. DoD and EPA signed an FFA in December 2010 to outline how they were going to proceed with cleanup.	49.52; placed on NPL in April 2009	VOCs, metals, biological materials, radionuclides	Groundwater, Surface Water, Soil	Yes	73,566
Army	MD321022056700	FORT GEORGE G MEADE	MD9210020567	Fort George G. Meade	Fort George G. Meade (Fort Meade) served as an administrative post for various DoD tenants, primarily the National Security Agency. Investigations beginning in FY88 identified several areas of concern, including landfills, petroleum and hazardous waste storage areas, aboveground storage tanks, USTs, asbestos-containing material in structures, and UXO. Contaminants identified at Fort Meade include chlorinated solvents, metals, munitions and explosives of concern (MEC), petroleum hydrocarbons, VOCs, SVOCs, explosives, propellants, polyaromatic hydrocarbons (PAHs), and pesticides. The potential risk to human health and the environment was significant enough for EPA to place Fort Meade on the NPL in July 1998. EPA delisted the Tipton Airfield parcel from the NPL in November 1999. DoD and EPA signed an FFA in 2009 to outline how they were going to proceed with cleanup.	52.0; placed on NPL in July 1998; Tipton Airfield delisted from NPL in November 1999	Chlorinated solvents, metals, MEC, petroleum hydrocarbons, VOCs, SVOCs, explosives, propellants, PAHs, pesticides	Groundwater, Surface Water, Sediment, Soil	Yes	147,791
Army	CA921372067600	FORT ORD	CA7210020676	Fort Ord	From 1917 to 1994, Fort Ord served primarily as a training and staging installation for infantry units. In FY87, a hydrogeological investigation identified the Fort Ord sanitary landfills as potential sources of contamination. Identified sites included landfills; USTs, motor pools, family housing areas, fire training areas (FTAs), an 8,000-acre impact area, and an ordnance and explosives disposal area. In addition, Fort Ord discovered petroleum hydrocarbons and VOCs had contaminated the groundwater. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in 1990. DoD and EPA signed an FFA in July 1990 to outline how they were going to proceed with cleanup.	42.24; placed on NPL in February 1990	VOCs, petroleum hydrocarbons, heavy metals, pesticides, SVOCs, explosives, propellants	Groundwater and Soil	No	729,607
Army	KS721402075600	FORT RILEY	KS6214020756	Fort Riley	Fort Riley provides facilities for several active and reserve Army combat brigades. The installation has five operable units (OUs): Southwest Funston Landfill (OU 1), Pesticide Storage Facility (OU 2), Dry Cleaning Facilities Area (OU 3), Former FTA - Marshall Army Airfield (OU 4), and 354 Area Solvent Detections (OU 5). Contaminants identified at Fort Riley include pesticides, lead, VOCs, metals, and solvents. The potential risk to human health and environment was significant enough for EPA to place Fort Riley on the NPL in August 1990. DoD, EPA, and the Kansas Department of Health and Environment signed an IAG in June 1991 to outline how they were going to proceed with cleanup.	33.8; placed on NPL in August 1990	Pesticides, lead, VOCs, metals, solvents	Groundwater and Soil	Yes	111,612
Army	AK021452242600	FORT WAINWRIGHT	AK6210022426	Fort Wainwright	Since World War II, Fort Wainwright has housed light infantry brigades, most recently the 172nd Stryker Brigade Combat Team and the 1-501st Airborne Battalion. Studies at the installation identified drum burial sites, USTs, a railroad car off-loading facility, an open burn and open detonation area, a former ordnance disposal site, solvent groundwater contaminated areas, POL-contaminated areas, and pesticide-contaminated soil. The potential risk to human health and the environment was significant enough for EPA to place Fort Wainwright on the NPL in 1990. DoD and EPA signed an FFA in 1991 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in August 1990	PCBs, SVOCs, POLs, heavy metals, solvents, pesticides, paints, UXO, VOCs, explosives, propellants	Groundwater and Soil	No	222,901
Army	IA721382044500	IOWA ARMY AMMUNITION PLANT	IA7213820445	Iowa Army Ammunition Plant	In 1941, the Army constructed the Iowa AAP to load, assemble, and pack various conventional ammunition and fuzing systems. The installation has three OUs: soil (OU 1), groundwater (OU 3), and overall (OU 4). During operations, industrial process wastewater and by-products were disposed at the installation. Site types include surface impoundments, production areas, landfills, and a fire-training pit. Soil and groundwater contamination resulted primarily from the disposal of explosives and heavy metal-containing wastes directly onto the soil. The installation also identified small amounts of contamination by VOCs. The potential risk to human health and the environment was significant enough for EPA to place Iowa AAP on the NPL in August 1990. DoD and EPA signed an IAG in December 1990 to outline how they were going to proceed with cleanup.	29.73; placed on NPL in August 1990	Explosives, low-level radioactive materials, heavy metals, VOCs, SVOCs, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	135,818

Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Army	WA021402050600	JOINT BASE LEWIS-MCCHORD	WAD980833065 & WA7210090067	American Lake Gardens/McChord AFB & Fort Lewis Logistics Center	Joint Base Lewis-McChord (JBLM) is located approximately 15 miles south of Tacoma, Washington, and encompasses approximately 90,000 acres. JBLM provides state-of-the-art training and infrastructure, responsive quality-of-life programs, and fully capable mobilization and deployment operations for the Army, Navy, Air Force, and Marines. On October 1, 2010, JBLM was formally established as 1 of 12 joint bases worldwide. The merger of the former Fort Lewis (est. 1917) and McChord Air Force Base (AFB) (est. 1947) was directed by the 2005 Base Realignment and Closure (BRAC) Commission. Contaminated sites identified at JBLM include landfills, former ranges, and spill sites. Primary contaminants include organic solvents, heavy metals, and fuels. The potential risk to human health and the environment was significant enough for EPA to place four JBLM sites on the NPL between September 1984 and November 1989: the Logistics Center and Landfill 5 (former Fort Lewis) and American Lake Garden Tract (ALGT) and the Washrack Treatment Area (WTA) (former McChord AFB). DoD and EPA signed an IAG in January 1990 to outline how they were going to proceed with cleanup at the former Fort Lewis sites. DoD and EPA signed an FFA in August 1989 to outline how they were going to proceed with cleanup at the former McChord AFB sites. Only two sites remain on the NPL (the Logistics Center and ALGT) as Fort Lewis and McChord AFB achieved EPA delisting of Landfill 5 in May 1995 and the WTA in September 1996.	Fort Lewis: 42.78 (Landfill No. 5), placed on NPL in July 1987, delisted from NPL in May 1995 Fort Lewis: 35.48 (Logistics Center), placed on NPL in November 1989 McChord AFB: 31.94 (Area D/ALGT); placed on NPL in September 1984 McChord AFB: 42.24 (WTA); placed on NPL in July 1987 and delisted from NPL in September 1996	PAHs, VOCs, battery electrolytes, PCBs, heavy metals, POLs, SVOCs, TCE, radioactive waste, metals	Groundwater and Soil	No	148,143
Army	IL521382046000	JOLIET AAP	IL7213820460 & IL0210090049	Joliet Army Ammunition Plant (Manufacturing Area) & Joliet Army Ammunition Plant (Load-Assembly-Packing Area)	The Army constructed Joliet AAP in the early 1940s. It was one of the largest munitions and explosives manufacturers in the Midwest. Installation operations included manufacturing explosives and loading, assembling, and packing munitions for shipment. The installation consolidated all environmental restoration sites into two OUs: one for groundwater contamination and another for soil. Contaminants identified at Joliet AAP include explosives, heavy metals, VOCs, PCBs, SVOCs, and propellants. Identified sites include burn areas, disposal pits, landfills, spill sites, and storage areas. The potential risk to human health and the environment was significant enough for EPA to place the 9,159-acre Manufacturing Area and the 14,385-acre Loading Area on the NPL in July 1987 and March 1989, respectively. DoD and EPA signed an IAG in June 1989 to outline how they were going to proceed with cleanup.	32.08 (Manufacturing Area); placed on NPL in July 1987 35.23 (Loading, Assembling, and Packing Area); placed on NPL in March 1989	Explosives, heavy metals, VOCs, PCBs, SVOCs, propellants	Groundwater and Soil	Yes	150,245
Army	MO721382048900	LAKE CITY ARMY AMMUNITION PLANT	MO3213890012	Lake City Army Ammunition Plant (Northwest Lagoon)	Lake City AAP is a government-owned, contractor-operated facility. Its mission is to manufacture, store, and test small arms munitions. Principal site types at the installation include abandoned disposal pits, sumps, firing ranges, old lagoons, old dumps, closed RCRA lagoons, and burning grounds. Groundwater contaminants include VOCs, explosives, and heavy metals. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an IAG in September 1989 to outline how they were going to proceed with cleanup.	33.62; placed on NPL in July 1987	Explosives, heavy metals, solvents, VOCs, POLs, SVOCs, propellants, radiologicals	Groundwater, Surface Water, Soil	Yes	181,819
Army	PA321382050300	LETTERKENNY ARMY DEPOT	PA6213820503 & PA2210090054	Letterkenny Army Depot (SE Area) & Letterkenny Army Depot (PDO Area)	The mission of Letterkenny AD is to store, maintain, and decommission ammunition and to rebuild and store vehicles. Contaminated sites include disposal lagoons and trenches, oil burn pits, an open burning and open detonation area, an explosives washout plant, two scrap yards, landfills, industrial wastewater treatment plant lagoons, and industrial wastewater sewer lines. Contaminants identified at Letterkenny AD include VOCs, POLs, PCBs, heavy metals, explosives, asbestos, SVOCs, and propellants. The potential risk to human health and the environment was significant enough for EPA to place two areas of the installation on the NPL: the Southeastern Area in July 1987 and the Property Disposal Office in March 1989. DoD and EPA signed an IAG in February 1989 to outline how they were going to proceed with cleanup.	34.21 (Southeastern Area); placed on NPL in July 1987 37.51 (Property Disposal Office); placed on NPL in March 1989	VOCs, POLs, PCBs, heavy metals, explosives, asbestos, SVOCs, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	159,916
Army	TX621382183100	LONE STAR ARMY AMMUNITION PLANT	TX7213821831	Lone Star Army Ammunition Plant	Lone Star AAP loads, assembles, and packs munitions. From 1943 to 1944 the Old Demolition Area was the location for the destruction of faulty or nonstandard explosives. RCRA sites investigated include surface impoundments, landfills, fuel storage areas, and load lines. Investigations revealed soil contamination with solvents, metals, explosives, and contaminated groundwater. Environmental studies revealed explosives and metal contamination in the Old Demolition Area. The potential risk to human health and the environment was significant enough for EPA to place the Old Demolition Area on the NPL in July 1987. DoD and EPA signed an IAG in 1990 to outline how they were going to proceed with cleanup.	31.85; placed on NPL in July 1987	VOCs, petroleum, heavy metals, explosives	Groundwater and Soil	No	32,914
Army	TX621382052900	LONGHORN ARMY AMMUNITION PLANT	TX6213820529	Longhorn Army Ammunition Plant	Longhorn AAP manufactured pyrotechnic and illuminating signal munitions and solid-propellant rocket motors. Identified cleanup sites include storage areas, landfills, open burning grounds, industrial areas, burial pits, sumps, and wastewater treatment plants. Contaminants identified at Longhorn AAP include heavy metals, VOCs, perchlorate, explosives, SVOCs, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an IAG in October 1991 to outline how they were going to proceed with cleanup.	39.83; placed on NPL in August 1990	Heavy metals, VOCs, perchlorate, explosives, SVOCs, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	152,225

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Army	LA621382053300	LOUISIANA ARMY AMMUNITION PLANT	LA0213820533	Louisiana Army Ammunition Plant	The mission of Louisiana AAP is to manufacture ammunition parts and maintain ammunition production facilities for the Army. Contaminated sites at the installation include lagoons, burning grounds, and landfills contaminated with explosives and plating wastes. Studies identified groundwater contaminated with the explosive compounds trinitrotoluene (TNT), royal demolition explosive (RDX), and cyclotetramethylenetetranitramine (HMX). The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in March 1989. Also in 1989, DoD and EPA signed an IAG to outline how they were going to proceed with cleanup.	30.26; placed on NPL in March 1989	TNT, RDX, HMX, oils, grease, degreasers, phosphates, solvents, metal plating sludges, acids, fly ash	Groundwater, Surface Water, Sediment, Soil	No	68,937
Army	TN421382058200	MILAN ARMY AMMUNITION PLANT	TN0210020582	Milan Army Ammunition Plant	The Milan AAP handles explosive ordnance. In FY91, Milan AAP discovered the explosive compound RDX in the City of Milan's municipal water supply wells. Sites identified at the installation include industrial discharge sites, landfills, spill sites, surface disposal areas, and explosive ordnance disposal areas. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an IAG in 1989 to outline how they were going to proceed with cleanup.	58.15; placed on NPL in July 1987	Munitions-related wastes, SVOCs, metals, explosives, propellants	Groundwater and Soil	No	200,230
Army	CA921350696A00	MILITARY OCEAN TERMINAL CONCORD	CA7170024528	Concord Naval Weapons Station	Military Ocean Terminal Concord ships, receives, inspects, and classifies munitions. These activities resulted in the contamination of surface water and sediment at the Tidal Area, which includes tidal and litigation area sites. Identified contaminants include heavy metals, petroleum hydrocarbons, VOCs, SVOCs, benzene, toluene, ethylbenzene, and xylene (BTEX), explosives, and propellants. Sites identified at the installation include disposal pits, spill sites, storage areas, surface disposal areas, and USTs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in December 1994 when it was part of Naval Weapons Station (NWS) Concord. DoD and EPA signed an FFA in November 2009 to outline how they would proceed with cleanup.	30.00; placed on NPL in December 1994	Heavy metals, petroleum hydrocarbons, VOCs, SVOCs, BTEX, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	68,252
Army	NJ221382070400	PICATINNY ARSENAL	NJ3210020704	Picatiny Arsenal (USARMY)	In 1880, Dover Powder Depot, now known as Picatinny Arsenal, was established to store gunpowder. Until the 1970s, the installation manufactured explosives, propellants, and ammunition. It now houses the Joint Munitions and Lethality Life Cycle Management Command. Contaminated sites include a burning ground, landfills, USTs, former production areas, and former testing sites. Identified contaminants include VOCs, explosives, and heavy metals. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. DoD and EPA signed an IAG in April 1991 to outline how they were going to proceed with cleanup.	42.92; placed on NPL in February 1990	VOCs, explosives, PCBs, heavy metals, SVOCs, propellants, radioactive materials, BTEX	Groundwater, Surface Water, Sediment, Soil	Yes	162,850
Army	AL421382074200	REDSTONE ARSENAL	AL7210020742	Redstone Arsenal (USARMY/NASA)	Past operations at Redstone Arsenal included production, receipt and shipment, storage, demilitarization, and disposal of chemical and high-explosive munitions. Industrial firms also produced commercial chemicals and pesticides at the installation. Redstone Arsenal currently conducts military training, research and development; manages procurement; and supports the Army's aviation and missile weapons systems. Site types include past disposal sites, landfills, open burning and open detonation areas, chemical munitions disposal sites, and releases from rocket motor production processes. Primary contaminants of concern are heavy metals, solvents, chemical weapon materials, MEC, and pesticides. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in June 1994. DoD and EPA are currently negotiating an FFA to outline how they will proceed with cleanup.	33.40; placed on NPL in June 1994	Heavy metals, solvents, MEC, perchlorate, CWM, pesticides, VOCs, SVOCs, PCBs, explosives, propellants, PAHs, BTEX	Groundwater, Surface Water, Sediment, Soil	No	531,922
Army	CA921382075900	RIVERBANK ARMY AMMUNITION PLANT	CA7210020759	Riverbank Army Ammunition Plant	In 1942, the Army constructed the Riverbank AAP as an aluminum reduction plant to supply military requirements. Since 1951, the installation has manufactured brass and steel cartridge cases for the Army and Navy. Other manufactured products include grenades and projectiles, which the Army ships to other ammunition plants for loading operations. Contaminated sites include an industrial wastewater treatment plant, an abandoned landfill, and four evaporation and percolation ponds located north of the plant near the Stanislaus River. Contaminants identified at Riverbank AAP include chromium, cyanide, zinc, and PCBs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. DoD and EPA signed an IAG in April 1990 to outline how they were going to proceed with cleanup.	63.94; placed on NPL in February 1990	Chromium, cyanide, zinc, PCBs	Groundwater and Soil	No	83,333
Army	CO821382076900	ROCKY MOUNTAIN ARSENAL	CO5210020769	Rocky Mountain Arsenal (USARMY)	Rocky Mountain Arsenal operated chemical munitions production and destruction facilities from 1942 until 1982. Contaminated sites have included liquid waste in unlined and lined basins, open burning and detonations areas, and structures and trenches that received both liquid and solid wastes. Primary contaminants of concern are compounds used for chemical weapons material production and pesticides. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an IAG and an FFA in FY89 to outline how they were going to proceed with cleanup.	58.15; placed on NPL in July 1987	Pesticides, chemical agents, VOCs, chlorinated organics, PCBs, UXO, heavy metals, solvents, SVOCs	Groundwater and Soil	No	1,899,014
Army	CA921382078000	SACRAMENTO ARMY DEPOT	CA0210020780	Sacramento Army Depot	Sacramento AD provided support for communications and electronic equipment when in operation. Identified contaminants include oil and grease, cyanide, metals, solvents, metal plating wastes, and wastewater containing caustics. Identified sites include burn areas, landfills, spill sites, storage areas, and USTs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. In FY88, DoD and EPA signed an IAG to outline how they were going to proceed with cleanup.	44.46; placed on NPL in July 1987	Oil and grease, cyanide, metals, solvents, metal plating wastes, wastewater containing caustics	Groundwater and Soil	Yes	73,176

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Army	IL521382080300	SAVANNA DEPOT ACTIVITY	IL3210020803	Savanna Army Depot Activity	Savanna AD began operation in 1917 as the Savanna Proving Grounds. During the 1920s, the mission changed to include storage, receipt, issuance, demilitarization, and renovation of ammunition. Contaminated areas include landfills; the open burning and open detonation ground; the FTA; and ammunition load, assemble, and pack facilities. Contaminants identified at Savanna AD include explosives, metals, solvents, POLs, VOCs, SVOCs, propellants, BTEX, radioactive materials, and PCBs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in March 1989. DoD and EPA signed an IAG in FY89 to outline how they were going to proceed with cleanup.	42.20; placed on NPL in March 1989	Explosives, metals, solvents, POLs, VOCs, SVOCs, propellants, BTEX, radioactive materials, PCBs	Groundwater, Surface Water, Sediment, Soil	Yes	162,084
Army	NY221382083000	SENECA ARMY DEPOT ACTIVITY	NY0213820830	Seneca Army Depot	During its operation, Seneca AD stored munitions and supplies, and distributed them to the Army. The installation's operations included demilitarization and disposal of MEC. Environmental studies identified the following sites or site types: an open burning ground, an ash landfill, other landfills, low-level radioactive waste burial grounds, USTs, spill areas, FTAs, and munitions disposal areas. Contaminants identified at Seneca AD include heavy metals, radioactive isotopes, petroleum hydrocarbons, VOCs, SVOCs, chlorinated solvents, and radioactive materials. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an FFA in January 1993 to outline how they were going to proceed with cleanup.	37.30; placed on NPL in August 1990	Heavy metals, radioactive isotopes, petroleum hydrocarbons, VOCs, SVOCs, chlorinated solvents, radioactive materials	Groundwater, Sediment, Soil	Yes	110,268
Army	MA121382063100	SOLDIER SYSTEMS CENTER	MA1210020631	Natick Laboratory Army Research, Development, and Engineering Center	Since 1954, the U.S. Army Soldiers Systems Center (Soldiers Systems Center) has supported industrial, laboratory, and storage activities for research and development in food science and in aeromechanical, clothing, material, and equipment engineering. Contaminated site types include buildings, spill sites, storage areas, disposal pits, dry wells, and USTs. Operations used various VOCs, including tetrachloroethylene (PCE), TCE, carbon disulfide, benzene, and chloroform. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in May 1994. In FY06, DoD and EPA signed an FFA to outline how they were going to proceed with cleanup.	50.00; placed on NPL in May 1994	Pesticides, herbicides, pentachlorophenol, solvents, PCBs, VOCs, SVOCs, metals, PAHs, TCE, PCE	Surface Water and Sediment	Yes	52,411
Army	PA321382089200	TOBYHANNA ARMY DEPOT	PA5213820892	Tobyhanna Army Depot	Tobyhanna AD provides support for communications and electronics equipment. Contaminated sites include landfills, a disposal pit, USTs, burn areas, drum staging areas, a surface disposal area, a waste treatment plant, a spill site area, a UXO area, and a fire fighting training area. Contamination at these sites has included VOCs, solvents, and heavy metals in groundwater; solvents, metals, PCBs, and POLs in surface water and sediment; and solvents, metals, PCBs, POLs, and UXO in soil. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an IAG in September 1990 to outline how they were going to proceed with cleanup.	37.93; placed on NPL in August 1990	Heavy metals, solvents, VOCs, PCBs, POLs, UXO	Groundwater, Surface Water, Sediment, Soil	No	22,554
Army	UT821382089400	TOOELE ARMY DEPOT	UT3213820894	Tooele Army Depot (North Area)	Tooele AD stores and demilitarizes munitions. Sites identified at Tooele AD include open burning and open detonation areas, ammunition demilitarization facilities, landfills, firing ranges, industrial sites, USTs, surface impoundments, and drain fields. Organic solvents and metals are the primary site contaminants. The potential risk to human health and the environment was significant enough for EPA to place Tooele AD on the NPL in August 1990. The Army and EPA signed an FFA in September 1991 to outline how they were going to proceed with cleanup.	53.95; placed on NPL in August 1990	Metals, VOCs, SVOCs, propellants, explosives, petroleum hydrocarbons, PCBs, solvents	Groundwater	Yes	168,856
Army	MN521382090800	TWIN CITIES ARMY AMMUNITION PLANT	MN7213820908	New Brighton/Arden Hills/TCAAP (USARMY)	Twin Cities AAP formerly manufactured small arms ammunition and projectile casings, and supported DoD tenants. The installation grouped sites requiring environmental restoration, including former landfills, burning and burial grounds, ammunition testing and disposal sites, industrial operations buildings, and sewer system discharge areas, into three OUs. Past waste disposal practices released contaminants into soil, groundwater, and sediment. Contaminated groundwater has impacted municipal water supplies. Ammunition-related metals, VOCs, and PCBs are the primary soil contaminants at Twin Cities AAP. The potential risk to human health and environment was significant enough for EPA to place the installation on the NPL in September 1983. DoD and EPA signed an FFA in 1987 to outline how they were going to proceed with cleanup.	59.60; placed on NPL in September 1983	VOCs, PCBs, heavy metals, SVOCs	Groundwater, Surface Water, Sediment	Yes	186,712
Army	OR021382091700	UMATILLA CHEMICAL DEPOT	OR6213820917	Umatilla Army Depot (Lagoons)	In 1941, the Army established Umatilla Ordnance Depot as a facility for storing conventional munitions. Between 1945 and 1955, the installation's functions expanded to include demolition, renovation, and maintenance of ammunition. In 1962, the Army began to store chemical munitions at the depot. In FY98, the installation officially changed its name from Umatilla Ordnance Depot to Umatilla Chemical Depot. Identified sites include explosives-washout lagoons, an open burning and open detonation area, pesticide disposal pits, a deactivation furnace, and landfills. Contaminants identified include UXO, pesticides, nitrates, explosives, heavy metals, SVOCs, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an FFA in October 1989 to outline how they were going to proceed with cleanup.	31.31; placed on NPL in July 1987	UXO, pesticides, nitrates, explosives, heavy metals, SVOCs, propellants	Groundwater and Soil	No	180,584

Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Army	MO721372998500	WELDON SPRING TRAINING AREA	MO5210021288	Weldon Spring Former Army Ordnance Works	The 88th Regional Support Command's (RSC's) mission is to provide mission essential base operations support services for stakeholders within the Northwest Region, support the Army Reserve operational force, and provide Command and Control for the bands and other units as directed. The 2005 BRAC Commission recommended realignment of the 88th RSC to acquire Weldon Springs Training Area (WSTA). The contamination at the training area was a result of TNT and 2,4-dinitrotoluene (DNT) production operations at the former Weldon Spring Ordnance Works (WSOW). The area is divided into two sites; WSTA 001 and WSTA 002. WSTA 001 is made up of two OUs. OU 1 is made up of contaminated soils and wooden pipelines, and OU 2 is the contaminated groundwater and surface water associated with the former WSOW. The contaminants of concern at WSTA 001 are nitro-aromatic compounds, PAHs, PCBs, and lead. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. EPA, the Army, and the Missouri Department of Natural Resources signed an FFA for WSTA 001 in August 1990, which was updated in August 1991 to outline how they were going to conduct cleanup.	30.26; placed on NPL in February 1990	VOCs, SVOCs	Soil	Yes	2,802
Navy	AK017002432300	ADAK NAS	AK4170024323	Adak Naval Air Station	Beginning in the early 1940s, Adak Naval Air Facility served as a key operations and supply location for U.S. military forces. A study identified 32 sites at the installation, including landfills, UXO areas, and PCB spill sites, which have contaminated groundwater, surface water, sediments, and soil. Identified contaminants include heavy metals, propellants, VOCs, explosives, and SVOCs. DoD and EPA signed an FFA in November 1993 to outline how they were going to proceed with cleanup. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in May 1994.	51.37; placed on NPL in May 1994	Heavy metals, propellants, VOCs, explosives, SVOCs	Groundwater, Surface Water, Sediment, Soil	Yes	420,115
Navy	CA917002323600	ALAMEDA NAS	CA2170023236	Alameda Naval Air Station	Alameda Naval Air Station (NAS) maintained and operated facilities and provided services for naval aviation activities and operating forces. Prominent site types include landfills, offshore sediment areas, plating and cleaning shops, pesticide control areas, a radium dial paint shop, transformer storage areas, and a former oil refinery. Contaminants identified at Alameda NAS include BTEX, chlorinated solvents, radium, heavy metals, herbicides, pesticides, petroleum hydrocarbons, PAHs, PCBs, VOCs, SVOCs, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1999. In FY01, DoD and EPA signed an FFA outlining how they were going to proceed with cleanup.	50.0; placed on NPL in July 1999	BTEX, chlorinated solvents, radium, heavy metals, herbicides, pesticides, petroleum hydrocarbons, PAHs, PCBs, VOCs, SVOCs, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	594,157
Navy	GA417302369400	ALBANY MCLB	GA7170023694	Marine Corps Logistics Base	The Albany Marine Corps Logistics Base (MCLB) is used to acquire, supply, and dispose of materials needed to sustain combat readiness of Marine forces worldwide. The sites at the installation are grouped into six OUs, including groundwater throughout the base (OU 6) and a site-screening group. Sites include disposal areas, storage areas, and landfills. Contaminants include TCE, PCBs, and heavy metals. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in December 1989. DoD and EPA signed an FFA in July 1991 to outline how they were going to proceed with cleanup.	44.65; placed on NPL in December 1989	VOCs, PCBs, heavy metals, pesticides, PAHs, SVOCs, TCE, explosives, propellants	Groundwater, Sediment, Soil	No	51,921
Navy	WV317002369100	ALLEGANY BALLISTICS LAB	WV0170023691	Allegany Ballistics Laboratory (USNAVY)	The Allegany Ballistics Laboratory was used for research, development, and production of solid propellant rocket motors for DoD and the National Aeronautics and Space Administration. Identified sites include landfills, disposal areas, spill sites, and tank sites. Contaminants found at the installation included VOCs, RDX, HMX, perchlorate, and silver. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in May 1994. DoD and EPA signed an FFA in January 1998 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in May 1994	VOCs, RDX, HMX, perchlorate, silver, SVOCs, explosives, propellants, metals	Surface Water, Sediment, Groundwater, Soil	No	97,140
Navy	WA017002729100	BANGOR NSB	WA5170027291 & WA7170027265	Bangor Naval Submarine Base & Bangor Ordnance Disposal (USNAVY)	Bangor Naval Submarine Base (NSB) stored, processed, and shipped munitions from the early 1940s until it was commissioned as a submarine base in 1977. Past chemical releases at the installation are primarily related to the detonation, demilitarization, and disposal of explosive ordnance and associated activities. Site types include spill sites, disposal areas, debris areas, and burn areas. Contaminants identified at Bangor NSB include residual TNT, RDX, Otto fuel, VOCs, SVOCs, metals, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the Bangor Ordnance Disposal Area on the NPL in July 1987 and the Bangor NSB on the NPL in August 1990. In January 1990, DoD, EPA, and the State of Washington signed an FFA for the installation to outline how they were going to proceed with cleanup.	30.42 (Bangor Ordnance Disposal), placed on NPL in July 1987 55.91 (Bangor Naval Submarine Base), placed on NPL in August 1990	Residual TNT, RDX, Otto fuel, VOCs, SVOCs, metals, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	No	143,603
Navy	CA917302426100	BARSTOW MCLB	CA8170024261	Barstow Marine Corps Logistics Base	Barstow MCLB consists of Yermo Annex, Nebo Main Base, and the Rifle Range. The installation's mission is to maintain, repair, rebuild, store, and distribute supplies and equipment; it formerly conducted industrial operations. Vehicle maintenance, repair and maintenance of weapons and missile systems, and storage of petroleum and chemical products contributed to contamination. Site types include sludge disposal areas, plating waste disposal areas, low-level radioactive waste storage areas, spill sites, UST sites, and evaporation ponds. The potential risk to human health and the environment from high concentrations of TCE detected in groundwater monitoring wells was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA in October 1990 to outline how they were going to proceed with cleanup.	37.93; placed on NPL in November 1989	Heavy metals, PCBs, petroleum hydrocarbons, pesticides, herbicides, methyl tertiary butyl ether, VOCs, SVOCs, radioactive materials, TCE	Groundwater and Soil	No	149,369

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Navy	MA117002357000	BEDFORD NWIRP	MA6170023570	Naval Weapons Industrial Reserve Plant	The Bedford Naval Weapons Industrial Reserve Plant (NWIRP), a formerly government-owned and contractor-operated plant, designed, produced, and tested prototype equipment for missile guidance and control systems. Identified sites include a disposal area, tank sites, and spill sites. Contaminants found at the installation include acids; BTEX; incinerator ash; industrial wastes; paints; POLs; photographic wastes; solvents; and VOCs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in May 1994. DoD and EPA signed an FFA in September 1999 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in May 1994	Acids, BTEX, incinerator ash, industrial wastes, POLs, photographic wastes, solvents, paints, VOCs, SVOCs, metals	Groundwater, Surface Water, Sediment, Soil	Yes	39,079
Navy	ME117002201800	BRUNSWICK NAS	ME8170022018	Brunswick Naval Air Station	Brunswick NAS supports activities for submarine warfare. Activities that contributed to contamination include intermediate aircraft maintenance, material support for maintenance, aircraft fueling services, storage and disposal of ordnance, and all-weather air station operations. Site types include landfills, disposal areas, tank sites, spill sites, and munitions ranges and disposal areas. Contaminants identified at Brunswick NAS include DDT, PCBs, PAHs, VOCs, SVOCs, and metals. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an FFA in 1989, revised in 1990 to include the State of Maine, to outline how they were going to proceed with cleanup.	43.38; placed on NPL in July 1987	DDT, PCBs, PAHs, VOCs, SVOCs, metals	Groundwater, Surface Water, Sediment, Soil	Yes	131,620
Navy	NC417302258000	CAMP LEJEUNE MCB	NC6170022580	Camp Lejeune Military Reservation	Camp Lejeune Marine Corps Base (MCB) provides housing, training facilities, logistical support, and administrative supplies for Fleet Marine Force units and other assigned units. The installation also provides specialized schools and other training. Site types include spill sites, tank sites, landfills, burn areas, and munition ranges. Contaminants released from past storage and disposal operations have migrated to a shallow aquifer, several surface water bodies, and a deep aquifer used for drinking water. Identified contaminants include battery acid, fuels, used oils, paints, thinners, PCBs, pesticides, metals, solvents, VOCs, SVOCs, and radioactive materials. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in October 1989. In February 1991, DoD and EPA signed an FFA to outline how they were going to proceed with cleanup.	36.84; placed on NPL in October 1989	Battery acid, fuels, used oils, paints, thinners, PCBs, pesticides, metals, solvents, VOCs, SVOCs, radioactive materials	Groundwater, Surface Water, Sediment, Soil	Yes	305,705
Navy	CA917302353300	CAMP PENDLETON MCB	CA2170023533	Camp Pendleton Marine Corps Base	Camp Pendleton MCB provides housing, training facilities, logistics support, and administrative support to Fleet Marine Force Units. Environmental contamination at the installation resulted from maintenance of vehicles and equipment and support facilities, such as gas stations, hospitals, laundries, pest control services, and hobby shops. Sites at the installation include landfills, surface impoundments, pesticide storage areas, FTAs, vehicle maintenance areas, and USTs. The potential risk to human health and the environment from detection of an herbicide (Silvex) in two groundwater wells used for drinking water was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA in October 1990 to outline how they would proceed with cleanup.	33.79; placed on NPL in November 1989	Pesticides, herbicides, heavy metals, PCBs, VOCs, SVOCs, TCE	Groundwater, Surface Water, Sediment, Soil	No	335,236
Navy	FL417002247400	CECIL FIELD NAS	FL5170022474	Cecil Field Naval Air Station	Cecil Field NAS supports the maintenance of Naval weapons and aircraft. Operations that caused contamination include equipment maintenance, storage and disposal of fuel and oil, fire training, and training on target ranges. Site types include landfills, disposal pits/areas, spill sites, storage yards, tank sites, and munitions disposal areas. Contaminants identified at Cecil Field NAS include waste fuel oil, solvents, heavy metals, halogenated aliphatics, phthalate esters, SVOCs, lead, and VOCs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA in November 1990 to outline how they were going to proceed with cleanup.	31.99; placed on NPL in November 1989	Waste fuel oil, solvents, heavy metals, halogenated aliphatics, phthalate esters, SVOCs, lead, VOCs	Groundwater, Surface Water, Sediment, Soil	Yes	81,010
Navy	NC417302726100	CHERRY POINT MCAS	NC1170027261	Cherry Point Marine Corps Air Station	Cherry Point Marine Corps Air Station (MCAS) provides services and materials for marine aircraft. Military activities have resulted in environmental contamination at the installation. Site types include storage areas, disposal areas, landfills, and spill sites. Contaminants identified at Cherry Point MCAS include SVOCs, explosives, propellants, VOCs, PCBs, petroleum hydrocarbons, solvents, and heavy metals. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in December 1994. DoD and EPA signed FFAs in FY05 and FY08 to outline how they were going to proceed with cleanup.	70.71; placed on NPL in December 1994	SVOCs, explosives, propellants, VOCs, PCBs, petroleum hydrocarbons, solvents, heavy metals	Groundwater, Surface Water, Sediment, Soil	Yes	135,498
Navy	NJ217002217200	COLTS NECK NWS EARLE	NJ0170022172	Naval Weapons Station Earle (Site A)	Earle NWS handles, stores, renovates, and ships munitions. The sites include landfills, production areas, storage areas, maintenance areas, and disposal areas. Releases of VOCs and heavy metals from landfills and production areas have contaminated groundwater and soil at the installation. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an FFA in December 1990 to outline how they were going to proceed with cleanup.	37.21; placed on NPL in August 1990	VOCs, SVOCs, heavy metals, hydrocarbons, petroleum products, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	41,787
Navy	CA917002452800	CONCORD NWS	CA7170024528	Concord Naval Weapons Station	NWS Seal Beach, Detachment Concord (Concord) ships, receives, inspects, and classifies munitions. It also serves as a munitions storage and weapons maintenance, inspection, and testing facility. These activities have resulted in the contamination of surface water and sediment at tidal and litigation-area sites. Identified sites include landfills, disposal sites/areas, burning areas, tank sites, and ranges. Contaminants identified at Concord include heavy metals, petroleum hydrocarbons, VOCs, SVOCs, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in December 1994. DoD and EPA signed an FFA in June 2001 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in December 1994	Heavy metals, petroleum hydrocarbons, VOCs, SVOCs, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	180,867

Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Navy	VA317002468500	DAHLGREN NSWC	VA7170024684	Naval Surface Warfare - Dahlgren	The Dahlgren Naval Surface Warfare Center (NSWC) changed its name in FY05 to the Naval Support Facility, Dahlgren (Dahlgren) to reflect integration into the Naval District Washington Region. Dahlgren conducts ordnance testing for the Navy. Ordnance testing operations contributed to the contamination. Contaminated site types include former landfills, former ordnance burning and disposal areas, USTs, former ordnance ranges, and former ordnance research and development areas. Migration of these releases could affect the Potomac River, Gambo Creek, associated wetlands, and local groundwater aquifers used for drinking water. Contaminants identified at Dahlgren include heavy metals, explosives residues, low-level radioactive materials, mercury, cleaning solvents, PCBs, pesticides, VOCs, SVOCs, and explosives, propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in October 1992. DoD and EPA signed an FFA in September 1994 to outline how they were going to proceed with cleanup.	50.26; placed on NPL in October 1992	Heavy metals, explosives residues, low-level radioactive materials, mercury, cleaning solvents, PCBs, pesticides, VOCs, SVOCs, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	No	84,672
Navy	RH117002203600	DAVISVILLE NCBC	RI6170022036	Davisville Naval Construction Battalion Center	The Davisville Naval Construction Battalion Center (NCBC) provided mobilization support to Naval Construction Forces. Site types at the installation include landfills, solvent storage and disposal areas, transformer storage areas, spill areas, USTs, and FTAs. Contaminants include solvents, PCBs, POLs, and pesticides. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA in March 1992 to outline how they were going to proceed with cleanup.	34.52; placed on NPL in November 1989	Heavy metals, PCBs, pesticides, petroleum hydrocarbons, POLs, VOCs, SVOCs	Groundwater, Sediment, Soil	Yes	81,704
Navy	CA917302320800	EL TORO MCAS	CA6170023208	El Toro Marine Corps Air Station	El Toro MCAS served as the primary Marine Corps jet fighter facility on the West Coast, providing materials and support for Marine Corps aviation activities. Site types include landfills, spill sites, storage areas, tank sites, and munitions ranges. Identified contaminants include herbicides, SVOCs, heavy metals, TCE and other VOCs, petroleum hydrocarbons, PCBs, and pesticides. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. DoD and EPA signed an FFA in October 1990 to outline how they were going to proceed with cleanup.	40.83; placed on NPL in February 1990	Herbicides, SVOCs, heavy metals, TCE and other VOCs, petroleum hydrocarbons, PCBs, pesticides	Groundwater, Surface Water, Sediment, Soil	Yes	180,464
Navy	MN517002291400	FRIDLEY NIROP	MN3170022914	Naval Industrial Reserve Ordnance Plant	Fridley Naval Industrial Reserve Ordnance Plant (NIROP) designs and manufactures advanced weapons systems. Site types include waste disposal pits and trenches, source areas beneath the main industrial plant, a foundry core butt disposal area, and site-wide groundwater contamination. Wastes and contaminants associated with these site types include POLs, solvents, plating sludge, construction debris, and foundry sands. Investigations conducted at this government-owned, contractor-operated installation identified TCE in groundwater, which discharges into the Mississippi River upstream from the Minneapolis drinking water plant. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA in March 1991 to outline how they were going to proceed with cleanup.	30.83; placed on NPL in November 1989	POLs, VOCs, SVOCs, TCE, metals, cyanide	Groundwater and Soil	Yes	59,932
Navy	MD317002410900	INDIAN HEAD NSWC	MD7170024684	Indian Head Naval Surface Warfare Center	Naval Support Facility, Indian Head (Indian Head) provides services in energetics for all warfare centers, including engineering, fleet and operational support, manufacturing technology, limited production, and industrial base support. The installation produces and handles complex chemicals to accomplish this mission including lead, silver, and mercury. Identified sites include landfills, spill sites, open burn areas, small arms ranges, munitions testing and impact areas, and disposal areas. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1995. DoD and EPA signed an FFA in FY01 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in February 1995	Propellants, explosives, acids, paints, solvents, heavy metals, radioactive material, TCE, wastewater, VOCs, SVOCs	Groundwater, Surface Water, Sediment, Soil	Yes	115,544
Navy	FL417002441200	JACKSONVILLE NAS	FL6170024412	Jacksonville Naval Air Station	Jacksonville NAS maintains and operates facilities and provides services and materials to support aviation activities and aircraft overhaul operations. The installation identified the following site types: fire fighting training areas, waste storage and disposal areas, transformer storage areas, radioactive-waste disposal areas, and other miscellaneous support and maintenance areas. Typical operations have generated solvents, sludge (from on-site treatment plants), and low-level radioactive waste, which have migrated into nearby soil and local groundwater supplies. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA in October 1990 to outline how they were going to proceed with cleanup.	31.02; placed on NPL in November 1989	Waste solvents, caustics, cyanide, heavy metals, POLs, low-level radioactive wastes, oils, paints, PCBs, pesticides, phenols, radioisotopes, VOCs, SVOCs, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	131,971
Navy	WA017002341900	KEYPORT NUWC	WA1170023419	Naval Undersea Warfare Station (4 Areas)	Operations at the Keyport Naval Undersea Warfare Center (NUWC), including torpedo plating, refurbishing, and disposal, contributed to contamination at the property. Environmental investigations at the installation have identified sites such as USTs, sumps, spill sites, a landfill, and an underground trench. Identified contaminants include VOCs, heavy metals, petroleum hydrocarbons, herbicides, fuel, PCBs, pesticides, SVOCs, and miscellaneous inorganic elements and compounds. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in October 1989. DoD and EPA signed an FFA in FY90 to outline how they were going to proceed with cleanup.	32.61; placed on NPL in October 1989	VOCs, heavy metals, petroleum hydrocarbons, herbicides, fuel, PCBs, pesticides, SVOCs, miscellaneous inorganic elements and compounds	Groundwater, Surface Water, Sediment, Soil	No	55,778

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Navy	VA317002248200	LITTLE CREEK NAB	VA5170022482	Naval Amphibious Base Little Creek	In October 2009, the Navy combined the property and restoration responsibilities of Naval Amphibious Base Little Creek and the Army's Fort Story to create Joint Expeditionary Base (JEB) Little Creek-Fort Story. JEB Little Creek-Fort Story provides logistics facilities and support services to meet the amphibious warfare requirements of the Armed Forces. Site types at this installation include landfills, a music equipment plating shop, a laundry waste disposal area, a pentachlorophenol dip tank, sandblast yards, battery storage areas, and USTs. Identified contaminants include heavy metals, mixed municipal wastes, VOCs, SVOCs, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in May 1999. DoD and EPA signed an FFA in 2003 to outline how they were going to proceed with cleanup.	50; placed on NPL in May 1999	Heavy metals, mixed municipal wastes, VOCs, SVOCs, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	No	59,065
Navy	HI917002227100	LUALUALEI NAVMAG	HI4170090076	Pearl Harbor Naval Complex	Joint Base Pearl Harbor-Hickam (JBPHH) is a DoD installation under Navy land and maintenance responsibility that combines the Air Force's Hickam AFB and the following Navy installations: the Fleet and Industrial Supply Center (FISC), the Naval Station (NS), the Naval Magazine (NAVMAG), the Naval Shipyard (NSY) and Intermediate Maintenance Facility, the Public Works Center (PWC), the NSB, and the Inactive Ship Maintenance Facility (INACTSHIPDET). JBPHH provides primary fleet support in the Pearl Harbor area. Fuel supply activities, landfills, and other support operations have contaminated the soil and groundwater with VOCs, SVOCs, and metals. Identified sites include landfills, spill sites, storage areas, disposal areas, tank sites, and munitions ranges. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in October 1992. DoD and EPA signed an FFA in March 1994 to outline how they were going to proceed with cleanup.	70.82; placed on NPL in October 1992	VOCs, SVOCs, heavy metals, PCBs, pesticides, petroleum, hydrocarbons, solvents, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	72,111
Navy	PA317002210400	MECHANICSBURG SPCC	PA3170022104	Navy Ships Parts Control Center	Mechanicsburg Naval Inventory Control Point, currently Naval Support Activity (NSA) Mechanicsburg, provides inventory management and supply support for weapons systems. Historical defense industrial and inventory disposal operations have caused contamination at this installation. Identified contaminants include PCBs, heavy metals, pesticides, VOCs, SVOCs, and dioxin. Site types include landfills, burn pits, storage areas, and USTs. The potential risk to human health and the environment was significant enough for EPA to place NSA Mechanicsburg on the NPL in May 1994. DoD and EPA signed an FFA in 2004 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in May 1994	PCBs, heavy metals, pesticides, VOCs, SVOCs, dioxin	Groundwater, Sediment, Soil	Yes	44,684
Navy	CA917002323800	MOFFETT FIELD NAS	CA2170090078	Moffett Naval Air Station	Moffett Field NAS was headquarters of the Commander, Patrol Wings U.S. Pacific Fleet. At that time, Moffett Field NAS was the largest P-3 base in the world and was responsible for submarine patrol operations across the Pacific. Sites at the installation include landfills, USTs, a burn pit, ditches, holding ponds, wetland sediments, French drains, maintenance areas, and fuel spill sites. Contaminants include PCBs, petroleum products, DDT, chlorinated solvents, and heavy metals. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an FFA in FY90, amended in FY94 and FY01, which outlined how they were going to proceed with cleanup.	42.24; placed on NPL in July 1987	Pesticides, SVOCs, explosives, propellants, VOCs, petroleum hydrocarbons, heavy metals, solvents	Groundwater, Surface Water, Sediment, Soil	Yes	221,505
Navy	CT117002202000	NEW LONDON NSB	CTD980906515	New London Submarine Base	New London NSB maintains and repairs submarines. Contaminated sites at the installation include the Area A Landfill (Site 2), smaller disposal areas, USTs, and fuel and chemical storage areas. The potential risk to human health and the environment from PCB contamination at Site 2 was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an FFA in January 1995 to outline how they were going to proceed with cleanup.	36.53; placed on NPL in August 1990	Dredge spoils, incinerator ash, POLs, PCBs, spent acids, pesticides, solvents, construction debris, metals, VOCs, SVOCs	Groundwater, Surface Water, Sediment, Soil	Yes	98,980
Navy	RI117002424300	NEWPORT NETC	RI6170085470	Newport Naval Education/Training Center	NS Newport (formerly known as the Newport Naval Education and Training Center [NETC]) served as a refueling depot from the early 1900s until after World War II, when it restructured to support research and development, and to provide specialized training. Currently, the installation provides logistical support and serves as a training center. Identified sites include landfills, disposal areas, tank sites, spill sites, and a shooting range. Contaminants at the installation include POL sludge associated with tank farm sites, waste acids, solvents, and PCBs in landfills used to dispose of general refuse and shop wastes. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA in March 1992 to outline how they were going to proceed with cleanup.	32.25; placed on NPL in November 1989	PCBs, POLs, VOCs, SVOCs, metals	Surface Water, Sediment, Soil, Groundwater	Yes	226,385
Navy	VA317002741400	NORFOLK COMNAVBASE	VA6170061463	Norfolk Naval Base (Sewells Point Naval Complex)	Norfolk Naval Base provides services and materials to support the aviation activities and operating forces of the Navy. Contamination originates from maintenance of aircraft, equipment, and vehicles, and from operation of support facilities. Contaminated site types at the installation include landfills, ordnance storage areas, waste disposal areas, FTAs, fuel spill areas, and USTs. Identified contaminants include petroleum products, PCBs, solvents, heavy metals, acids, paints, asbestos, pesticides, VOCs, and SVOCs. The potential risk to human health and the environment from the migration of contaminated surface water was significant enough for EPA to place the installation on the NPL in April 1997. DoD and EPA signed an FFA in February 1999 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in April 1997	Petroleum products, PCBs, solvents, heavy metals, acids, paints, asbestos, pesticides, VOCs, SVOCs	Groundwater, Surface Water, Sediment, Soil	No	128,477

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Navy	VA317002481300	NORFOLK NSY	VA1170024813	Norfolk Naval Shipyard	Norfolk NSY is located on the western bank of the southern branch of the Elizabeth River. The installation provides logistical support, conversion, overhaul, repair, alteration, dry-docking, and outfitting of naval vessels. The installation also performs manufacturing, research, development, and test work. Site contamination resulted from past landfilling, disposal operations, and a plating shop. Contaminants identified at Norfolk NSY include heavy metals, PCBs, VOCs, SVOCs, POLs, and land solvents. Identified sites include landfills, storage yards/areas, and spill sites. The potential risk to human health and the environment from surface water runoff into Paradise Creek was significant enough for EPA to place the installation on the NPL in July 1999. DoD and EPA signed an FFA in September 2004 to outline how they were going to proceed with cleanup.	50.0; placed on NPL in July 1999	Heavy metals, PCBs, VOCs, SVOCs, POLs, land solvents	Groundwater, Surface Water, Sediment, Soil	Yes	44,729
Navy	GU917309951900	NSA ANDERSEN GUAM	GU6571999519	Andersen Air Force Base	Andersen AFB is part of the Joint Region Marianas, which was established in 2009. The Navy is responsible for environmental restoration cleanup activities for the joint region installations, which include Naval Base Guam, Andersen AFB, and MCB Camp Blaz. The mission of Andersen AFB is to provide troops, equipment, and facilities in the Pacific. Preliminary assessments have identified landfills, waste piles, FTAs, hazardous waste storage areas, spill sites, and munitions ranges. Identified contaminants include metals, pesticides, PAHs, PCBs, VOCs, SVOCs, radioactive materials, phenols, and BTEX. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in October 1992. DoD, EPA, and Guam EPA signed an FFA in March 1993 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in October 1992	Metals, pesticides, PAHs, PCBs, VOCs, SVOCs, radioactive materials, phenols, BTEX	Groundwater and Soil	Yes	191,283
Navy	SC417302276300	PARRIS ISLAND MCRD	SC6170022762	Parris Island Marine Corps Recruit Depot	The Parris Island Marine Corps Recruit Depot (MCRD) receives, recruits, and combat-trains personnel upon their enlistment in the Marine Corps. Contaminated sites at the installation include landfills or spill areas where groundwater and sediment are contaminated with solvents and POLs. The potential risk to human health and the environment from contamination at two landfill sites was significant enough for EPA to place the installation on the NPL in December 1994. DoD and EPA signed an FFA in 2005 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in December 1994	Pesticides, paints, POLs, solvents, industrial wastes, metals, acids, electrolytes, ordnance compounds, VOCs, SVOCs	Groundwater, Surface Water, Sediment, Soil	Yes	45,036
Navy	MD317002453600	PATUXENT RIVER NAS	MD7170024536	Patuxent River Naval Air Station	Patuxent River NAS tests and evaluates naval aircraft systems. Three environmental restoration sites at the installation require the most cleanup: a Fishing Point Landfill site (Site 1), the former sanitary landfill (Site 11), and the pest control shop (Site 17). Wastes managed at these sites included mixed solid wastes, POLs, paints, thinners, solvents, pesticides, and photographic laboratory wastes. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in May 1994. DoD and EPA signed an FFA in December 2000 to outline how they were going to proceed with cleanup.	36.87; placed on NPL in May 1994	Heavy metals, pesticides, organics, POLs, solvents, UXO, VOCs, SVOCs, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	103,261
Navy	HI917002434200	PEARL HARBOR FISC	HI4170090076	Pearl Harbor Naval Complex	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Yes	57,532

Navy	HI917002434000	PEARL HARBOR NSB	HI4170090076	Pearl Harbor Naval Complex	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Yes	9,949
Navy	HI917002433900	PEARL HARBOR NSY	HI4170090076	Pearl Harbor Naval Complex	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Yes	44,330
Navy	HI917002433400	PEARL HARBOR PWC	HI4170090076	Pearl Harbor Naval Complex	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Refer to Lualualei NAVMAG	Yes	77,733
Navy	FL417002461000	PENSACOLA NAS	FL9170024567	Pensacola Naval Air Station	Pensacola NAS, which now serves as a flight training center, was formerly a naval air rework facility and an aviation depot. Operations that have caused contamination at the station include a foundry, machine shops, coating and paint shops, paint stripping and plating shops, various maintenance and support facilities, landfills, and storage facilities. Investigations have identified 38 Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) sites, 1 SWMU, and 14 UST sites. Site types include landfills, disposal sites, PCB transformer and spill areas, industrial wastewater treatment plant areas, and evaporation ponds. Contaminants identified at Pensacola NAS include ammonia, asbestos, benzene, cyanide, heavy metals, paints, PCBs, pesticides, phenols, chlorinated and nonchlorinated solvents, plating wastes, VOCs, SVOCs, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in December 1989. DoD and EPA signed an FFA in October 1990 to outline how they were going to proceed with cleanup.	42.40; placed on NPL in December 1989	Ammonia, asbestos, benzene, cyanide, heavy metals, paints, PCBs, pesticides, phenols, chlorinated and nonchlorinated solvents, plating wastes, VOCs, SVOCs, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	131,002
Navy	ME117002201900	PORTSMOUTH NSY	ME1710022019	Portsmouth Naval Shipyard	Portsmouth NSY maintains, repairs, and overhauls nuclear submarines. A RCRA facility assessment in FY86 identified 28 SWMUs. Site types at the installation include a landfill, a salvage and storage area, and waste oil tanks. Contaminants identified at Portsmouth NSY include pesticides, PCBs, VOCs, heavy metals, and SVOCs. The potential risk to human health and the environment from contamination in groundwater and sensitive wetland communities was significant enough for EPA to place the installation on the NPL in May 1994. DoD and EPA signed an FFA in 1999 to outline how they were going to proceed with cleanup.	67.70; placed on NPL in May 1994	Pesticides, PCBs, VOCs, heavy metals, SVOCs	Groundwater, Surface Water, Sediment, Soil	Yes	80,237

Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Navy	WA017002342600	PUGET SOUND FISC BREMERTON	WA2170023418 & WA3170090044	Puget Sound Naval Shipyard Complex & Jackson Park Housing Complex (USNAVY)	Puget Sound NSY supports ship logistics, works in construction and overhaul, and provides housing and healthcare for active duty families. Naval Facilities Engineering Command Northwest manages all cleanup activities at Bremerton Naval Complex (BNC) and Jackson Park Housing Complex (JPHC). Most of BNC, which includes the Puget Sound NSY, is built on contaminated fill material. Initial assessment studies identified six sites at BNC and eight sites at JPHC. Site types include spill sites, tank sites, landfills, and munitions disposal areas. The main sources of contamination are past operations, such as cleaning and demilitarization of ordnance and ship construction, maintenance, and demolition. Metals and POLs are the primary contaminants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in May 1994. DoD and EPA signed an IAG for BNC in 1998 to outline how they were going to proceed with cleanup; they signed an IAG for JPHC in 2004.	50.00; placed on NPL in May 1994	Heavy metals, VOCs, POLs, solvents, construction debris, acids, silver nitrate, SVOCs, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	No	22,409
Navy	WA017002726800	PUGET SOUND NAVHOSP BREMERTON	WA2170023418 & WA3170090044	Puget Sound Naval Shipyard Complex & Jackson Park Housing Complex (USNAVY)	Refer to Puget Sound FISC Bremerton	Refer to Puget Sound FISC Bremerton	Refer to Puget Sound FISC Bremerton	Refer to Puget Sound FISC Bremerton	No	5,200

Navy	VA317302472200	QUANTICO MCB	VA1170024722	Marine Corps Combat Development Command	MCB Quantico's mission is to support training for general combat by providing a varied background in tactical operations and performing research and development of Marine Corps equipment. MCB Quantico operated a municipal landfill throughout the 1970s. After the landfill closed, the area was used as a scrap yard. Sites at the installation include surface disposal areas, USTs, and disposal pits that contain contaminated soil, surface water, and sediment. Contaminants identified at MCB Quantico include PCBs, pesticides, VOCs, SVOCs, phenols, heavy metals, petroleum hydrocarbons, arsenic, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in June 1994. DoD and EPA signed FFAs in December 1991 and in February 1999 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in June 1994	PCBs, pesticides, VOCs, SVOCs, phenols, heavy metals, petroleum hydrocarbons, arsenic, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	No	126,347
Navy	PR217300007400	ROOSEVELT ROADS CAMP GARCIA	PRN000204694	Atlantic Fleet Weapons Training Area - Vieques	Naval Facilities on Vieques consists of the former Naval Ammunition Support Detachment on the western half of the island and the former Vieques Naval Training Range on the eastern half. The installation provides training, and munitions storage for the Atlantic Fleet. Contaminated site types include USTs, open burning/open detonation areas, and munitions areas. Identified contaminants include pesticides, PCBs, gasoline, explosives, land waste oil, metals, VOCs, SVOCs, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 2005. In FY07, DoD and EPA signed an FFA to outline how they were going to proceed with cleanup.	NA; placed on NPL in February 2005	Pesticides, PCBs, gasoline, explosives, land waste oil, metals, VOCs, SVOCs, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	15,331
Navy	MA117002202200	SOUTH WEYMOUTH NAS	MA2170022022	South Weymouth Naval Air Station	Prior to closure, South Weymouth NAS provided logistical support for reserve units and the Marine Air Reserve Training Detachment South Weymouth. Prominent contaminated site types include landfills, USTs, a tank farm storing jet fuel, sewage treatment facilities, a rubble disposal area, and an FTA. Contaminants identified at South Weymouth NAS include UXO, VOCs, SVOCs, hydrocarbons, industrial wastes, solvents, petroleum, acids, paints, metals, photographic chemicals, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in May 1994. DoD and EPA signed an FFA in April 2000 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in May 1994	UXO, VOCs, SVOCs, hydrocarbons, industrial wastes, solvents, petroleum, acids, paints, metals, photographic chemicals, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	94,893
Navy	VA317002758100	ST JULIEN'S CREEK ANNEX	VA5170000181	St. Juliens Creek Annex (U.S. Navy)	St. Juliens Creek Annex has been used since 1849 for storing, loading, assembling, issuing, and receiving naval ammunition. Currently, the installation provides a radar testing range and various administrative and warehousing facilities for the nearby Norfolk NSY and other local Navy activities. Contamination resulted from past handling of and operations involving hazardous materials. The initial assessment study revealed low concentrations of ordnance materials throughout the installation. Contaminants identified at St. Juliens Creek Annex include pesticides, heavy metals, SVOCs, solvents, explosives, VOCs, propellants, and radioactive materials. Identified sites include waste disposal areas and landfills. The potential risk to human health and the environment was significant enough for EPA to place the facility on the NPL in August 2000. In 2004, DoD and EPA signed an FFA to outline how they were going to proceed with cleanup.	50.0; placed on NPL in August 2000	Pesticides, heavy metals, SVOCs, solvents, explosives, VOCs, propellants, radioactive materials	Groundwater, Surface Water, Sediment, Soil	Yes	41,288
Navy	CA917002278400	TREASURE ISLAND NS HUNTERS PT ANNEX	CA1170090087	Hunters Point Naval Shipyard	The mission at Hunter's Point Annex-Treasure Island NS was to repair and maintain ships. Military activities have resulted in environmental contamination. Site types include landfills and land disposal areas, containing primarily heavy metals, VOCs, and radioactive materials. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA with the Navy in September 1990. It was revised in January 1992 to outline how they were going to proceed with cleanup.	48.77; placed on NPL in November 1989	Heavy metals, PCBs, petroleum hydrocarbons, VOCs, SVOCs, explosives, propellants	Groundwater, Sediment, Soil	No	1,216,885
Navy	PR217006932100	VIEQUES EAST	PRN000204694	Atlantic Fleet Weapons Training Area - Vieques	Refer to Roosevelt Roads Camp Garcia	Refer to Roosevelt Roads Camp Garcia	Refer to Roosevelt Roads Camp Garcia	Refer to Roosevelt Roads Camp Garcia	Yes	329,931
Navy	PR217003172000	VIEQUES PUERTO RICO NASD	PRN000204694	Atlantic Fleet Weapons Training Area - Vieques	Refer to Roosevelt Roads Camp Garcia	Refer to Roosevelt Roads Camp Garcia	Refer to Roosevelt Roads Camp Garcia	Refer to Roosevelt Roads Camp Garcia	Yes	36,785

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Navy	HI917002438800	WAHIAWA NCTAMS EASTPAC	HI0170090054	Naval Computer and Telecommunications Area Master Station Eastern Pacific	The Naval Computer and Telecommunications Area Master Station (NCTAMS), Pacific operates and maintains two communications facilities on the island of Oahu, but conducts industrial operations primarily at the main station and receiver site in Wahiawa and the Naval Radio Transmitting Facility in Lualualei. The restoration program has focused on the Wahiawa and Lualualei facilities, where operation and maintenance of electrical transformers and switches have been the primary sources of contamination. Site types include landfills, disposal areas, transformer sites, and spill sites. Primary contaminants include metals and petroleum hydrocarbons. The potential risk to human health and the environment from detected PCB-contaminated soil in work and residential areas was significant enough for EPA to place the installation on the NPL in May 1994. DoD and EPA signed an FFA in FY09 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in May 1994	PCBs, metals, petroleum hydrocarbons, VOCs, SVOCs	Groundwater, Surface Water, Sediment, Soil	Yes	43,675
Navy	PA317002454500	WARMINSTER NAWC	PA6170024545	Naval Air Development Center (8 Waste Areas)	Warminster Naval Air Warfare Center (NAWC) Aircraft Division performs research, development, testing, and evaluation for naval aircraft systems and antisubmarine warfare systems. Contaminated site types include waste burn pits, sludge disposal pits, landfills, waste pits, and an FTA. Identified contaminants include heavy metals, firing range wastes, fuels, land sewage sludges, non-industrial solid wastes, paints, PCBs, VOCs, and SVOCs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in October 1989. DoD and EPA signed an FFA in September 1990 to outline how they were going to proceed with cleanup.	57.93; placed on NPL in October 1989	Heavy metals, firing range wastes, fuels, land sewage sludges, non-industrial solid wastes, paints, PCBs, VOCs, SVOCs	Groundwater, Surface Water, Soil	No	63,290
Navy	DC317002431000	WASHINGTON NAVY YARD	DC9170024310	Washington Navy Yard	Washington Navy Yard provides resources, including administrative space, housing, training facilities, logistical support, and supplies, for the installation tenants and other assigned units. Investigations at the installation initially identified 18 contaminated sites and 3 leaking UST sites. Identified contaminants include solvents, metals, VOCs, SVOCs, PCBs, and pesticides. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1998. DoD and EPA signed an FFA in June 1999 to outline how they were going to proceed with cleanup. The installation updated the FFA with a RCRA consent order signed in July 1997.	48.57; placed on NPL in July 1998	Solvents, metals, VOCs, SVOCs, PCBs, pesticides	Groundwater, Surface Water, Sediment, Soil	Yes	48,216
Navy	WA017002336100	WHIDBEY ISLAND NAS	WA5170090059	Naval Air Station, Whidbey Island (Ault Field)	Whidbey Island NAS is a training and operations center for two squadrons: Center for U.S. Marine Corps, and Navy Reserve training in the Pacific Northwest. Whidbey Island NAS occupies four areas on Whidbey Island, Washington: Ault Field, Seaplane Base, Coupville Outlying Field, and Lake Hancock Target Range. Past disposal practices from aircraft maintenance, vehicle maintenance, public works shop activities, and fire training activities have contributed to contamination. Site types include landfills, disposal areas, storage areas, tank sites, and spill sites. Identified contaminants include PCBs, PAHs, chlorinated solvents, VOCs, SVOCs, and metals. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. DoD and EPA signed an FFA in September 1990 to outline how they were going to proceed with cleanup. EPA delisted the Seaplane Base from the NPL in 1995.	39.64 (Seaplane Base), placed on NPL in February 1990, delisted in 1995 48.48 (Ault Field), placed on NPL in February 1990	PCBs, PAHs, chlorinated solvents, VOCs, SVOCs, metals	Groundwater, Surface Water, Sediment, Soil	Yes	174,283
Navy	FL417002324400	WHITING FIELD NAS	FL2170023244	Whiting Field Naval Air Station	Whiting Field NAS trains student naval aviators, and has administrative responsibility for the Outlying Landing Field Barin, located in Alabama. Beginning in FY85, studies at this installation identified contaminated sites at Whiting Field NAS and the Outlying Landing Field Barin. Contamination identified at Whiting Field NAS includes pesticides, PCBs, VOCs, heavy metals, chlorinated hydrocarbons, SVOCs, and radioactive materials. Site types include disposal areas and pits, storage areas, spill areas, landfills, a disposal and burning area, a maintenance area, USTs, fuel pits, FTAs, and drainage ditches. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in May 1994. DoD and EPA signed an FFA in FY09 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in May 1994	Pesticides, PCBs, VOCs, heavy metals, chlorinated hydrocarbons, SVOCs, radioactive materials	Groundwater, Surface Water, Sediment, Soil	No	67,489
Navy	VA317002460500	WILLIAMSBURG FISC CHEATHAM ANNEX	VA3170024605	Naval Weapons Station Yorktown - Cheatham Annex	Williamsburg FISC supplies Atlantic Fleet ships and provides recreational opportunities to military and civilian personnel. Contaminants at the installation include SVOCs, PAHs, metals, and PCBs. These primarily affect groundwater, surface water, and sediment. Identified sites include disposal areas, former transformer storage areas, and spill sites. The potential risk to human health and the environment from eight sites that are hydrologically connected to the Chesapeake Bay was significant enough for EPA to place Williamsburg FISC on the NPL in December 2000. DoD and EPA signed an FFA in FY05 to outline how they were going to proceed with cleanup.	48.72; placed on NPL in December 2000	VOCs, explosives, propellants, PAHs, metals, PCBs, SVOCs	Groundwater, Surface Water, Sediment, Soil	Yes	34,290
Navy	PA317002231200	WILLOW GROVE NAS	PAD987277837	Willow Grove Naval Air and Air Reserve Station	Willow Grove NAS Joint Reserve Base (JRB) serves as a reserve NAS for aviation training activities. Contaminated site types include landfills, USTs, and an FTA. Identified contamination includes heavy metals, PCBs, POLs, solvents, VOCs, SVOCs, explosives, propellants, and radioactive materials. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in September 1995. In FY05, DoD and EPA signed an FFA to outline how they were going to proceed with cleanup.	50.00; placed on NPL in September 1995	Heavy metals, PCBs, POLs, solvents, VOCs, SVOCs, explosives, propellants, radioactive materials	Groundwater, Surface Water, Sediment, Soil	Yes	76,801
Navy	VA317002417000	YORKTOWN NWS	VA8170024170	Naval Weapons Station - Yorktown	Yorktown NWS provides ordnance technical support and related services to the Atlantic Fleet. Six contaminated sites are hydrologically connected to the Chesapeake Bay. Identified sites include landfills, burn areas, wastewater discharge areas, and spill sites. Contaminants include explosive nitramine compounds and VOCs that affect groundwater, surface water, and sediment. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in October 1992. DoD and EPA signed an FFA in September 1994 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in October 1992	Acids, asbestos, explosives, cadmium, zinc, lead, mercury, PAHs, VOCs, paint thinners, solvents, PCBs, waste oils, nickel, varnishes, SVOCs, metals, propellants, explosives	Groundwater, Surface Water, Sediment, Soil	Yes	94,272

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Navy	AZ917302449300	YUMA MCAS	AZ0971590062	Yuma Marine Corps Air Station	The Yuma MCAS supports tactical aircrew combat training for Pacific and Atlantic Fleet Marine Corps Forces. Initial investigations conducted at the installation identified 20 CERCLA sites and 5 UST sites. Site types include landfills, sewage lagoons, liquid waste disposal areas, and ordnance and low-level radioactive material disposal sites. Contaminants identified at Yuma MCAS include petroleum hydrocarbons, SVOCs, VOCs, metals, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. DoD and EPA signed an FFA in January 1992 to outline how they were going to proceed with cleanup.	32.24; placed on NPL in February 1990	Petroleum hydrocarbons, SVOCs, VOCs, metals, explosives, propellants	Groundwater and Soil	No	78,496
Air Force	TX657172460500	AIR FORCE PLANT 4	TX7572024605	Air Force Plant #4 (General Dynamics)	Air Force Plant No. 4 has been a primary manufacturing plant for military aircraft and related equipment since 1942. The installation is adjacent to, and shares an airfield with Fort Worth JRB NAS (former Carswell AFB). Studies have confirmed TCE contamination in the surface water, soil, and in groundwater underneath six spill sites and four landfills. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an FFA in August 1990 to outline how they were going to proceed with cleanup.	39.92; placed on NPL in August 1990	Waste oils and fuels, heavy metals, VOCs, cyanide, dense non-aqueous phase liquid, TCE, PCBs, paint residues, spent process chemicals, solvents	Groundwater, Surface Water, Sediment, Soil	Yes	93,089
Air Force	CO857172553700	AIR FORCE PLANT PJKS	CO7570090038	Air Force Plant PJKS	Air Force Plant PJKS supported the military by researching, developing, and assembling missiles, missile components, and engines. Past operations contaminated groundwater beneath the installation with TCE, TCE degradation products (dichloroethene and vinyl chloride), and n-nitrosodimethylamine, and soil with PCBs and PAHs. Identified sites include spill sites, tanks, transformers, landfills, and waste pits. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD, EPA, and the Colorado Department of Health signed an IAG on December 29, 1998, to outline how they were going to proceed with cleanup.	42.93; placed on NPL in November 1989	PCBs, PAHs, BTEX, chlorinated organic solvents, VOCs, SVOCs, metals, n-nitrosodimethylamine, pesticides	Groundwater, Surface Water, Sediment, Soil	No	58,197
Air Force	CA957002455100	CASTLE	CA3570024551	Castle Air Force Base (6 Areas)	Castle AFB formerly trained tanker crews and serviced KC-135 stratotanker. Castle AFB has identified landfills, USTs, discharge areas, chemical disposal pits, FTAs, fuel spill areas, and PCB spill areas at the installation. Identified contaminants include spent solvents, PCBs, POLs, pesticides, cyanide, cadmium, VOCs, SVOCs, and metals. The potential risk to human health and the environment was significant enough for EPA to place Castle AFB on the NPL in July 1987. DoD and EPA signed IAGs in 1989 and 2004 to outline how they were going to proceed with cleanup.	27.93; placed on NPL in July 1987	Spent solvents, PCBs, POLs, pesticides, cyanide, cadmium, VOCs, SVOCs, metals	Groundwater and Soil	No	196,581
Air Force	DE357182401000	DOVER AIR FORCE BASE	DE8570024010	Dover Air Force Base	Dover AFB has provided airlift support for troops, cargo, and equipment since 1942. Contaminated site types include solvent spills, FTAs, landfills, fuel spills, and leaks. Former waste management practices contaminated the shallow groundwater aquifer with petroleum products and VOCs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in March 1989. DoD and EPA signed an FFA in August 1989 to outline how they were going to proceed with cleanup.	35.89; placed on NPL in March 1989	Solvents, VOCs, petroleum products, SVOCs, metals	Groundwater, Surface Water, Sediment, Soil	No	128,179
Air Force	CA957172450400	EDWARDS AIR FORCE BASE	CA1570024504	Edwards Air Force Base	Edwards AFB conducts aerospace research, development, testing, and evaluation. Decades of operational storage and use of hazardous materials have resulted in releases to soil and groundwater. Contaminants include waste oils, solvents, petroleum hydrocarbons, POLs, rocket fuel, dioxin, furans, potential CWM, metals, VOCs, SVOCs, and PCBs. Identified sites include landfills, burn pits, waste pits, spill sites, USTs, aboveground storage tanks, FTAs, disposal pits, surface disposal areas, and small arms ranges. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an FFA in 1990 to outline how they were going to proceed with cleanup.	33.62; placed on NPL in August 1990	Waste oils, solvents, petroleum hydrocarbons, POLs, rocket fuel, potential CWM, metals, VOCs, SVOCs, PCBs	Groundwater, Surface Water, Sediment, Soil	Yes	607,340
Air Force	AK057302864600	EIELSON AIR FORCE BASE	AK1570028646	Eielson Air Force Base	The mission of Eielson AFB is to provide tactical air support to Pacific Air Forces. Sites include FTAs, landfills, spill sites, aboveground storage tanks, USTs, and disposal pits. Primary contaminants affecting groundwater and soil are POLs, benzene, and chlorinated solvents. Additional contaminants include heavy metals, VOCs, and PCBs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an IAG in May 1991 to outline how they were going to proceed with cleanup.	48.14; placed on NPL in November 1989	POLs, benzene, VOCs, SVOCs, PCBs, solvents, heavy metals	Groundwater and Soil	No	308,920
Air Force	SD857212464400	ELLSWORTH AIR FORCE BASE	SD2571924644	Ellsworth Air Force Base	Ellsworth AFB maintains a combat-ready force capable of executing long-range bombardment operations. Site types include landfills, USTs, maintenance areas, an FTA, and a low-level radioactive waste burial site. Groundwater and soil contamination resulted from releases of TCE, dioxin, furans, and POLs at these sites. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an FFA in January 1992 to outline how they were going to proceed with cleanup.	33.62; placed on NPL in August 1990	Solvents (including TCE), POLs, lead, low-level radioactive waste, metals, VOCs, SVOCs	Soil and Groundwater	Yes	138,976
Air Force	WA057212464700	FAIRCHILD AIR FORCE BASE	WA9571924647	Fairchild Air Force Base (4 Waste Areas)	Fairchild AFB provides aerial refueling and airlift services. Sites include contaminated FTAs, landfills, radioactive waste sites, spill sites, waste pits, disposal pits, and ditches. Contaminants identified at Fairchild AFB include solvents, fuels, electroplating chemicals, cleaning solutions, corrosives, photographic PCBs, VOCs, SVOCs, metals, radioactive materials, and PAHs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in March 1989. DoD and EPA signed an FFA in March 1990 to outline how they were going to proceed with cleanup.	31.98; placed on NPL in March 1989	Solvents, fuels, electroplating chemicals, cleaning solutions, corrosives, photographic PCBs, VOCs, SVOCs, metals, radioactive materials, PAHs	Groundwater, Surface Water, Sediment, Soil	Yes	110,754

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Air Force	WY857212417900	FRANCIS E WARREN AIR FORCE BASE	WY5571924179	F.E. Warren Air Force Base	F.E. Warren AFB serves as the host to the 90th Space Wing Support and missile and space launch operations. Restoration activities began at F.E. Warren AFB in FY84. Contaminants at this installation include oils, solvents, metals, acids, petroleum, explosive residues, VOCs, SVOCs, PCBs, and PAHs. Identified sites include FTAs, contaminated groundwater sites, contaminated sediment sites, disposal pits, firing ranges, landfills, oil/water separators, spill site areas, aboveground storage tanks, target areas, USTs, and unexploded munitions areas. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. DoD and EPA signed an FFA in September 1991, which included 19 sites, to outline how they were going to proceed with cleanup. In FY05, three additional sites were added to the FFA.	39.23; placed on NPL in February 1990	Oils, solvents, metals, acids, petroleum, explosives residues, pesticides, VOCs, SVOCs, PCBs, PAHs	Groundwater, Surface Water, Soil	No	158,345
Air Force	CA957002445300	GEORGE	CA2570024453	George Air Force Base	George AFB formerly provided tactical fighter operations support. Environmental studies conducted at George AFB have identified landfills, petroleum spill sites, USTs, waste storage and disposal units, and FTAs. Identified contaminants include POLs, VOCs, lead, SVOCs, metals, and radioactive materials. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. DoD and EPA signed an FFA in October 1990 to outline how they were going to proceed with cleanup.	33.62; placed on NPL in February 1990	POLs, VOCs, lead, SVOCs, metals, radioactive materials, other	Groundwater, Surface Water, Soil	No	189,647
Air Force	MA157172442400	HANSCOM	MA8570024424	Hanscom Field/Hanscom Air Force Base	Hanscom AFB supports the Air Force Electronic Systems Center. Operations at Hanscom AFB have involved generation, use, and disposal of numerous hazardous substances. Possible sources of contamination include a former industrial wastewater treatment system, a former filter bed and landfill area, a jet fuel residue and tank sludge area, two landfills, three FTAs, a paint waste disposal area, a mercury spill area, former aviation fuel handling and storage facilities, USTs, and fuel spill areas. Contaminants identified at Hanscom AFB include VOCs, SVOCs, gasoline, jet fuel, metals, phenols, PCBs, and chlorinated solvents. The potential risk to human health and the environment was significant enough for EPA to place Hanscom Field/Hanscom AFB on the NPL in May 1994. The NPL site designation includes Hanscom AFB and former portions of the installation leased from the Commonwealth of Massachusetts between 1942 and 1974. The leased property included the flightline and airfield areas of the installation that are now L.G. Hanscom Field, a civilian airport. In September 2009, DoD and EPA signed an FFA to outline how they were going to proceed with cleanup.	50.00; placed on NPL in May 1994	VOCs, SVOCs, gasoline, jet fuel, metals, phenols, PCBs, chlorinated solvents	Groundwater, Surface Water, Sediment, Soil	Yes	55,281
Air Force	UT857172435000	HILL AIR FORCE BASE	UT0571724350	Hill Air Force Base	The mission of Hill AFB is to provide logistics support for weapons systems, host two fighter wings, and operate the Utah Test and Training Range. Site types at Hill AFB include disposal pits, landfills, surface impoundments, USTs, FTAs, firing ranges, discharge and wastewater ponds, a contaminated building, a munitions dump, and spill sites. Contaminants include solvents (primarily TCE), fuels, acids, bases, and plating solutions. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an FFA in April 1991 to outline how they were going to proceed with cleanup at Hill AFB. The Air Force also signed an IAG in September 2006 that outlined cleanup procedures for the Utah Test and Training Range and the Little Mountain Test Annex.	49.94; placed on NPL in July 1987	Solvents (TCE, PCE, trichloroacetic acid, 1,2-dichloroethane, dichloroethane), metals, petroleum products, PCBs, VOCs, SVOCs	Groundwater, Surface Water, Sediment, Soil	Yes	567,297
Air Force	FL457212403700	HOMESTEAD	FL7570024037	Homestead Air Force Base	Homestead AFB was established as an Army airfield in 1942 and became an Air Force installation in 1955 to house the Strategic Air Command. Sites identified at the installation include the JP-4 jet fuel leak area, a landfill, fire pit training areas, various spill sites, USTs, aboveground storage tanks, and oil-water separators. Identified contaminants include pesticides, solvents, VOCs, PCBs, heavy metals, jet fuel, PAHs, cyanide, and SVOCs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an FFA in February 1991 to outline how they were going to proceed with cleanup.	42.24; placed on NPL in August 1990	Pesticides, solvents, VOCs, PCBs, heavy metals, jet fuel, PAHs, cyanide, SVOCs	Groundwater, Sediment, Soil	No	69,293
Air Force	MD357182400000	JB-ANDREWS	MD0570024000 & MD9570024803	Andrews Air Force Base & Brandywine DRMO	Joint Base Andrews-Naval Air Facility Washington's (JBA's) mission includes supporting Presidential Airlift and providing contingency response capabilities for the National Capital Region. JBA was formed on October 1, 2009, when the Navy changed from tenant to Joint Base partner. The Air Force continues to serve as lead agency for environmental restoration at JBA, as it had previously for Andrews AFB prior to becoming a Joint Base. Environmental studies at JBA began in 1985. Sites at the installation include landfills, waste piles, FTAs, hazardous waste storage areas, spill sites, motor pools, USTs, and former small arms and skeet ranges. Identified contaminants include metals, VOCs, SVOCs, PAHs, PCBs, and pesticides in soil, groundwater, sediments, and surface water. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in June 1999. DoD and EPA signed an FFA in September 2011 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in June 1999	SVOCs, VOCs, PAHs, PCBs, pesticides, metals, explosives, propellants, BTEX	Groundwater, Surface Water, Sediment, Soil	No	172,492
Air Force	MA157282448700	JB-CAPE COD	MA2570024487	Otis Air National Guard Base/Camp Edwards	Massachusetts Military Reservation provides Army and Air National Guard training, and supports the East Coast Air Defense and Coast Guard Air and Sea Rescue Units. Sites at the installation include chemical spill sites, fuel spill sites, storm drains, landfills, and former firefighter training areas. Identified contaminants include waste solvents, VOCs, pesticides, metals, SVOCs, explosives, propellants, petroleum-related compounds, PAHs, and phenols. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA in July 1991; it was last amended in June 2002 to outline how they were going to proceed with cleanup.	45.93; placed on NPL in November 1989	Waste solvents, VOCs, pesticides, metals, SVOCs, explosives, propellants, petroleum-related compounds, PAHs, phenols	Groundwater, Surface Water, Sediment, Soil	Yes	825,724

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Air Force	AK057302864900	JBER-ELMENDORF	AK8570028649	Elmendorf Air Force Base	In July 2010, Elmendorf AFB became part of Joint Base Elmendorf-Richardson (JBER), when the Air Force assumed property and environmental restoration responsibilities for Fort Richardson from the Army. JBER hosts the headquarters for Alaskan Command, 11th Air Force, and the 11th Airborne Division. JBER supports and enables three Air Force total-force wings, an Army airborne brigade, and 75 associate and tenant units. Two cleanup programs are managed by JBER, and are referred to as the Elmendorf Program and the Richardson Program. Identified sites include landfills, FTAs, hazardous waste storage areas, spill sites, motor pools, USTs, and impact areas. Contaminants identified at JBER include VOCs, SVOCs, PAHs, POLs, radioactive materials, pesticides, metals, PCBs, and TCE. The potential risk to human health and the environment was significant enough for EPA to place Elmendorf AFB on the NPL in August 1990 and Fort Richardson on the NPL in May 1994. DoD and EPA signed FFAs to outline how they were going to proceed with cleanup at Elmendorf AFB in November 1991 and at Fort Richardson in December 1994.	45.91; placed on NPL in August 1990 (Elmendorf AFB) 50.00; placed on NPL in May 1994 (Fort Richardson)	VOCs, SVOCs, POLs, solvents, PCBs, pesticides, heavy metals, white phosphorus, dioxins	Groundwater, Surface Water, Sediment, Soil	Yes	159,968
Air Force	AK021452215700	JBER-RICHARDSON	AK6214522157	Fort Richardson (USARMY)	Refer to JBER-Elmendorf	Refer to JBER-Elmendorf	Refer to JBER-Elmendorf	Refer to JBER-Elmendorf	Yes	149,533
Air Force	VA321372032100	JBLE-EUSTIS	VA6210020321	Fort Eustis (US Army)	On October 1, 2010, Joint Base Langley-Eustis (JBLE) was formed and the Air Force assumed the Army's obligations at Fort Eustis. JBLE-Eustis is home to the Army Transportation Center, where soldiers receive education and training in all modes of transportation, aviation maintenance, logistics and deployment doctrine, and research. Identified sites include landfills, USTs, pesticide storage areas, range/impact areas, and surface impoundments. The migration of contaminants from some sites to creeks and estuaries, and the potential migration through surface water and the upper water table to the James River are the greatest concerns at the installation. Analysis of samples indicated the presence of PCBs, pesticides, PAHs, and lead in surface water and sediment. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in December 1994. DoD and EPA signed an FFA in July 2008 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in December 1994	PCBs, VOCs, pesticides, heavy metals, SVOCs, petroleum products	Surface Water, Sediment, Soil, Groundwater	No	80,699
Air Force	NJ217002727400	JBMDL-LAKEHURST	NJ1710023744	Naval Air Engineering Center	In October 2009, McGuire AFB became part of Joint Base McGuire-Dix-Lakehurst (JB MDL), when the Air Force assumed property and environmental restoration responsibilities for Fort Dix and Lakehurst Naval Air Engineering Station (NAES) from the Army and the Navy, respectively. JB MDL provides quick-response airlift capabilities for placing military forces into combat situations. Cleanup sites include landfills, waste piles, FTAs, hazardous waste storage areas, spill sites, motor pools, abandoned USTs, lagoons, and impact areas. Contaminants identified at JB MDL include VOCs, SVOCs, PAHs, radioactive materials, pesticides, metals, PCBs, and TCE. The potential risk to human health and the environment was significant enough for EPA to place the Sanitary Landfill at Fort Dix on the NPL in 1987, Lakehurst NAES on the NPL in 1987, and McGuire AFB on the NPL in 1999. DoD and EPA signed FFAs to outline how they were going to proceed with cleanup at Lakehurst NAES, Fort Dix, and McGuire AFB in FY90, FY91, and FY09, respectively. Fort Dix was delisted from the NPL in 2012.	47.20 (McGuire AFB); placed on NPL in October 1999 37.40 (Fort Dix); placed on NPL in July 1987 and delisted from NPL in September 2012 50.53 (Lakehurst NAES); placed on NPL in July 1987	VOCs, SVOCs, PAHs, radioactive materials, pesticides, metals, PCBs, TCE	Groundwater and Soil	Yes	116,719
Air Force	NJ257182401800	JBMDL-MCGUIRE	NJ0570024018	McGuire Air Force Base #1	Refer to JBMDL-Lakehurst	Refer to JBMDL-Lakehurst	Refer to JBMDL-Lakehurst	Refer to JBMDL-Lakehurst	Yes	172,428
Air Force	ME157002452200	LORING	ME9570024522	Loring Air Force Base	Loring AFB was established in 1952 to support bomber and tanker aircraft operations. Sites identified include spill areas, landfills, FTAs, USTs, aboveground storage tanks, and low-level radioactive waste areas. The flightline and nose dock areas, where industrial shops and maintenance hangars were located, are the primary areas where wastes were released into soil and groundwater. Identified contaminants include VOCs, POLs, spent solvents, PCBs, pesticides, heavy metals, SVOCs, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. DoD and EPA signed an FFA in April 1991; it was last revised in 1994 to outline how they were going to proceed with cleanup.	34.49; placed on NPL in February 1990	VOCs, POLs, spent solvents, PCBs, pesticides, heavy metals, SVOCs, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	No	166,704
Air Force	CA957212452700	MARCH	CA4570024527	March Air Force Base	March AFB was established as an Army Air Service airfield in 1918 and became an Air Force installation in 1948. Investigations have identified FTAs, inactive landfills, USTs, an engine test cell, sludge drying beds at a sewage treatment plant, and various spill sites. Contaminants identified at March AFB include VOCs, POLs, PCBs, SVOCs, metals, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place March AFB on the NPL in November 1989. DoD and EPA signed an FFA in September 1990 to outline how they were going to proceed with cleanup.	31.94; placed on NPL in November 1989	VOCs, POLs, PCBs, SVOCs, metals, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	215,607
Air Force	CA957002474300	MATHER	CA8570024143	Mather Air Force Base	Before becoming inactive in FY93, Mather AFB housed the 323rd Flying Training Wing, a Strategic Air Command Wing, a Reserve air refueling group, and an Army National Guard aviation unit. Site types include landfills, USTs, FTAs, a TCE disposal site, a weapons storage area, wash rack areas, spill areas, and waste pits. Contaminants identified at the installation include VOCs, SVOCs, metals, solvents, jet fuel, petroleum hydrocarbons, lead, and PCBs. The potential risk to human health and the environment was significant enough for EPA to place Mather AFB on the NPL in July 1987. In 1989, DoD and EPA signed an IAG to outline how they were going to proceed with cleanup.	28.90; placed on NPL in July 1987	VOCs, SVOCs, metals, solvents, jet fuel, petroleum hydrocarbons, lead, PCBs	Groundwater, Surface Water, Sediment, Soil	No	250,371

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Air Force	CA957172433700	McCLELLAN	CA4570024337	McClellan Air Force Base (Ground Water Contamination)	The mission of the former McClellan AFB was to provide support for aircraft, missile, space, and electronics programs. Environmental contamination at McClellan AFB has resulted from sumps associated with industrial operations, landfills, leaks from industrial waste lines, surface spills, and USTs. The contaminated areas total over 660 acres and consist primarily of TCE-contaminated groundwater. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an FFA in May 1990 to outline how they were going to proceed with cleanup.	57.93; placed on NPL in July 1987	Metals, cleaners and degreasers, paints, lubricants, photochemicals, phenols, SVOCs, solvents, PCBs, VOCs, radioactive material, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	871,692
Air Force	ID057212455700	MOUNTAIN HOME AIR FORCE BASE	ID3572124557	Mountain Home Air Force Base	The mission of Mountain Home AFB is to provide composite combat air power worldwide. Sites identified at the installation include landfills, FTAs, a fuel hydrant system spill area, disposal pits, surface runoff areas, wash racks, ditches, USTs, POL lines, and a low-level radioactive material disposal site. Identified contaminants include VOCs, POLs, and heavy metals. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in August 1990. DoD and EPA signed an FFA in January 1992 to outline how they were going to proceed with cleanup.	NA; placed on NPL in August 1990	VOCs, POLs, heavy metals	Groundwater, Surface Water, Soil	Yes	38,103
Air Force	CA957002434500	NORTON	CA4570024345	Norton Air Force Base	Norton AFB formerly supported C-141 airlift operations. Sites include USTs, landfills, FTAs, spill areas, and waste disposal pits. The most significant sources of contamination at the base were a TCE-contaminated groundwater area and contaminated soil areas. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an IAG in 1989 to outline how they were going to proceed with cleanup.	39.65; placed on NPL in July 1987	Paints, refrigerants, heavy metals, spent solvents, TCE, VOCs, SVOCs, waste oils, fuel, PCBs	Groundwater and Soil	No	130,402
Air Force	NH157002484700	PEASE	NH7570024847	Pease Air Force Base	Pease AFB served as a Strategic Air Command bomber and tanker base. Studies identified the following site types: FTAs, burn pits, industrial facilities, landfills, and USTs. Petroleum products (JP-4 jet fuel) and industrial solvents, such as TCE, have contaminated the groundwater and soil. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in February 1990. DoD and EPA signed an FFA in 1991; it was last amended in 1992 to outline how they were going to proceed with cleanup.	39.42; placed on NPL in February 1990	VOCs, spent fuels, waste oils, POLs, pesticides, paints, TCE, SVOCs, metals, PCBs	Groundwater, Surface Water, Sediment, Soil	Yes	263,090
Air Force	NY257002477400	PLATTSBURGH	NY4571924774	Plattsburgh Air Force Base	Plattsburgh AFB formerly supported bomber and tanker aircraft operations. Groundwater at a former FTA is contaminated with chlorinated solvents, as well as BTEX. Other contaminated site types include USTs, aboveground storage tanks, landfills, industrial facilities, spill sites, and training areas. The potential risk to human health and the environment was significant enough for EPA to place Plattsburgh AFB on the NPL in November 1989. DoD and EPA signed an FFA in July 1991 to outline how they were going to proceed with cleanup.	30.34; placed on NPL in November 1989	Organic solvents, pesticides, fuels, PCBs, lead, VOCs, SVOCs, metals	Groundwater, Surface Water, Sediment, Soil	Yes	91,867
Air Force	GA457172433000	ROBINS	GA1570024330	Robins Air Force Base (Landfill #4/Sludge Lagoon)	The mission of Robins AFB is to provide logistics support for aircraft. Primary contaminants at the installation include TCE and tetrachloroethane in soil and groundwater. Identified sites include FTAs, contaminated groundwater sites, contaminated sediment sites, surface disposal areas, chemical disposal sites, disposal pits, industrial discharge sites, landfills, storage areas, storm drains, small arms ranges, spill site areas, trap and sket ranges, USTs, and radioactive waste areas. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an FFA in June 1989 to outline how they were going to proceed with cleanup. The Robins AFB NPL site designation consists of landfill 004 and an adjacent sludge lagoon (Waste Pile site 14) and is divided into three OUs: source control (OU 1), wetlands (OU 2), and groundwater (OU 3). In August 2003, OU 2 was removed from the NPL designation and is being addressed under RCRA.	51.66; placed on NPL in July 1987	VOCs, paint strippers and thinners, paints, solvents, phosphoric and chromic acids, cyanide, carbon, oils, TCE	Groundwater, Surface Water, Sediment, Soil	Yes	288,344
Air Force	NY257002445100	ROME RESEARCH SITE	NY4571924451	Griffiss Air Force Base	The mission of Griffiss AFB was to support bomber and tanker aircraft operations. Sites identified at the installation include landfills, USTs, FTAs, disposal pits, spill areas, and identified possible off-site groundwater contamination. Contaminants identified at Griffiss AFB include heavy metals, PCBs, grease, degreasers, caustic cleaners, dyes, penetrants, VOCs, TCE, UXO, SVOCs, radioactive materials, explosives, and propellants. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an FFA in June 1990 to outline how they were going to proceed with cleanup.	34.20; placed on NPL in July 1987	Heavy metals, PCBs, grease, degreasers, caustic cleaners, dyes, penetrants, VOCs, TCE, UXO, SVOCs, radioactive materials, explosives, propellants	Groundwater, Surface Water, Sediment, Soil	Yes	177,883
Air Force	OK657172439100	TINKER	OK1571724391	Tinker Air Force Base (Soldier Creek/Building 3001)	The mission of Tinker AFB is to repair aircraft, weapons, and engines. Environmental studies at the installation revealed a 220-acre contaminated area in the upper aquifer at Soldier Creek and Building 3001. Additional sites at Tinker AFB include landfills, USTs, waste pits, FTAs, spill sites, and low-level radioactive waste sites. Identified contaminants include organic solvents, heavy metals, petroleum, phenols, VOCs, SVOCs, and PCBs. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. The NPL designation consists of the Building 3001 and Soldier Creek sites. DoD and EPA signed an FFA in December 1988 to outline how they would proceed with cleanup.	42.24; placed on NPL in July 1987	Organic solvents, heavy metals, petroleum, phenols, VOCs, SVOCs, PCBs	Groundwater, Surface Water, Sediment, Soil	Yes	305,962

**Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List**

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
Air Force	CA957182457500	TRAVIS AIR FORCE BASE	CA5570024575	Travis Air Force Base	Travis AFB was established in 1943. The primary mission is to provide air refueling and strategic airlift services. Contaminated sites include old landfills, a closed sewage treatment plant, four FTAs, a cyanide disposal pit, solvent spill areas, a storm sewage drainage system, a pesticide disposal site, and a low-level radioactive waste burial site. Past activities at the installation resulted in the release of metals, pesticides, fuels, solvents, and POLs, which migrated into the soil, sediment, surface water, and groundwater. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in November 1989. DoD and EPA signed an FFA in September 1990; it was last updated in FY05 to outline how Travis AFB was going to proceed with cleanup.	29.49; placed on NPL in November 1989	VOCs, heavy metals, POLs, PAHs, SVOCs, TCE, solvents, pesticides, PCBs, BTEX	Groundwater, Surface Water, Sediment, Soil	Yes	186,342
Air Force	FL457152412400	TYNDALL	FL1570024124	Tyndall Air Force Base	Tyndall Field was activated in 1941 and served as the Flexible Gunnery School of the U.S. Army Air Corps. The installation became Tyndall AFB in 1947, and its current mission F-22 Raptor fighter training and air battle management under the 325th Fighter Wing. The primary contaminant of concern is DDT in the sediments. Identified sites include FTAs, contaminated buildings, contaminated sediment sites, surface disposal areas, building demolition/debris removal sites, disposal pits, sewage effluent settling ponds, fire ranges, landfills, oil/water separators, POL lines, pyrotechnics sites, wash racks, storage areas, surface impoundment/lagoons, small arms ranges, spill site areas, aboveground storage tanks, trap and skeet ranges, USTs, and explosive ordnance disposal areas. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in April 1997. DoD and EPA signed an FFA in September 2013 to outline how they were going to proceed with cleanup.	50.00; placed on NPL in April 1997	POLs, chlorinated solvents, pesticides, metals, PCBs, general refuse, VOCs, SVOCs	Groundwater, Surface Water, Sediment, Soil	No	136,552
Air Force	AZ957002858200	WILLIAMS	AZ7570028582	Williams Air Force Base	Williams AFB formerly supported pilot training and ground equipment maintenance. The installation has identified restoration sites, which include the liquid fuels storage area, fire protection training area 002, a collapsed stormwater line, spill sites, landfills, storage tanks, and an old pesticide and paint shop. Identified contaminants include VOCs, POLs, heavy metals, pesticides, UXO, and SVOCs. The potential risk to human health and the environment was significant enough for EPA to place Williams AFB on the NPL in 1989. DoD and EPA signed an FFA in FY90 to outline how they were going to proceed with cleanup.	37.93; placed on NPL in November 1989	VOCs, POLs, heavy metals, pesticides, UXO, SVOCs	Groundwater and Soil	No	133,403
Air Force	PA357122534900	WILLOW GROVE AIR FORCE RESERVE	PAD987277837	Willow Grove Naval Air and Air Reserve Station	The primary mission of the 913th Airlift Wing at the Willow Grove Air Reserve Station (ARS) was to train personnel for various air transport and air evacuation activities, to operate base facilities and air terminals, and to provide support to assigned units. Willow Grove ARS is owned by the Air Force Reserve Command and is co-located with the Navy-owned NAS JRB Willow Grove. Industrial activities at Willow Grove ARS include aircraft maintenance, base civil engineering, and fuel storage. Base civil engineering operations involve generation of waste solvents, oils, miscellaneous chemicals, and paints from various shops, including a paint shop, plumbing shop, photography lab, carpentry shop, and several flammable-material storage facilities. Fuel storage operations include the bulk storage of jet fuel. USTs have been identified at this installation. The potential risk to human health and the environment was significant enough for DoD and EPA to jointly place the installation and the adjacent Willow Grove NAS on the NPL in September 1995. DoD and EPA signed an FFA in 2008 to outline how they were going to proceed with cleanup at Willow Grove ARS.	50.00; placed on NPL in September 1995	SVOCs, chlorinated solvents, jet fuel, VOCs, metals	Surface Water, Sediment, Soil, Groundwater	Joint RAB with Navy and Air National Guard	13,558
Air Force	OH557172431200	WRIGHT PATTERSON	OH7571724312	Wright-Patterson Air Force Base	Wright-Patterson AFB serves as host to many organizations, including headquarters Air Force Materiel Command. Past activities at Wright-Patterson AFB created spill sites and unlined waste disposal areas, including landfills, FTAs, USTs, earth fill disposal areas, and coal storage areas. Soil and groundwater are contaminated with VOCs, SVOCs, TCE, BTEX, and fuel and its combustion by-products. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in October 1989. DoD and EPA signed an FFA in March 1991 to outline how they were going to proceed with cleanup.	57.85; placed on NPL in October 1989	Acids, plating wastes, VOCs, waste oils and fuels, SVOCs, solvents, TCE	Groundwater, Surface Water, Sediment, Soil	Yes	273,715
DLA	CA997150682700	DD SAN JOAQUIN, TRACY FACILITY	CA4971520834	Tracy Defense Depot (USARMY)	DDD San Joaquin, Tracy Facility stores and distributes supplies and equipment for DoD. Sites include burn and disposal pits, USTs, hazardous waste storage sites, and other contaminated areas. The installation identified contaminated on-site soil and groundwater, and off-site groundwater. Identified contaminants include chlorinated solvents, heavy metals, pesticides, POLs, and VOCs. The potential risk to human health and the environment was significant enough for EPA to place DDD San Joaquin, Tracy Facility on the NPL in 1990. DoD and EPA signed an FFA in 1991 to outline how they were going to proceed with cleanup.	37.16; placed on NPL in August 1990	Chlorinated solvents, heavy metals, pesticides, POLs, VOCs	Soil and Groundwater	No	126,139
DLA	VA397152075100	DSC RICHMOND	VA3971520751	Defense General Supply Center (DLA)	Defense Supply Center Richmond provides aviation weapon systems and environmental logistics support for DoD. POLs, PAHs, chlorinated VOCs, solvents, metals, and pesticides in the groundwater and soil are the primary contaminants at the installation. Identified sites include a landfill, a former drum storage area, a concrete lined waste pit, an outdoor storage area, an industrial processing site, spill sites, and former burn pits. The potential risk to human health and the environment was significant enough for EPA to place the installation on the NPL in July 1987. DoD and EPA signed an IAG in 1991 to outline how they were going to proceed with cleanup.	33.85; placed on NPL in July 1987	POLs, VOCs, PAHs, solvents, pesticides, metals, SVOCs	Groundwater, Surface Water, Sediment, Soil	Yes	87,753
FUDS	MO79799F037400	WELDON SPRING ORD WORKS	MO5210021288	Weldon Spring Former Army Ordnance Works	Refer to Weldon Spring Training Area	Refer to Weldon Spring Training Area	Refer to Weldon Spring Training Area	Refer to Weldon Spring Training Area	No	232,301

Appendix A: Active Military Installations, Formerly Used Defense Sites Properties, and Base Realignment and Closure Locations on the National Priorities List

DoD Component	DoD's Federal Facility Identification Number	DoD's Installation Name	EPA's Identifier	EPA's Installation Name	Facility Description	Hazard Ranking System Score and Listing Date	Contaminants	Media	Is there a Restoration Advisory Board?	Obligations Through FY 2021 (\$000)
FUDS	WV39799F346100	WEST VIRGINIA ORD WORKS	WVD980713036	West Virginia Ordnance (USARMY)	From 1941 to 1946, West Virginia Ordnance Works manufactured TNT from toluene, nitric acid, and sulfuric acid. Principal contaminated sites include TNT manufacturing areas, wastewater sewer lines, and wastewater ponds known as the red and yellow water ponds. By-products of the manufacturing process included TNT, dinitrotoluene, and organic compounds, which migrated into groundwater, soil, surface water, and sediment. The potential risk to human health and the environment was significant enough for EPA to place West Virginia Ordnance Works on the NPL in September 1983. EPA partially delisted a 509-acre parcel from the NPL in FY03 and an additional 1,004 acres in FY04. DoD and EPA signed the first IAG in September 1987, and a second IAG in July 1989, to outline how they were going to proceed with cleanup.	35.72; placed on NPL in September 1983	TNT, DNT, organic compounds, VOCs, SVOCs, metals, propellants, explosives, other contaminants	Groundwater, Surface Water, Sediment, Soil	No	104,741
