*The Navy Ergonomics Team
has a new information flyer
on dual monitor use!*

Many computer workstations have dual monitors as computer programs become even more complicated and LCD monitors become less expensive. Dual monitors are very useful for multiple document viewing, engineering drafting programs, movie and graphics editing, and emergency response centers. Basic ergonomic guidelines for the use of dual monitors is available on the Ergonomics page of the Naval Facilities Engineering Command (NAVFAC) Safety site.

Go to www.NAVFAC.navy.mil/Safety

Click on “Ergonomics.”

Under “New and Updated Tools and Documents,”
click on “Ergonomics for Dual Monitors.”
