PROJECT NUMBER (15-631)

**Status and Distribution Modeling  
of Golden Eagles on Southwestern  
Military Installations and  
Overflight Areas: Assessing “Take”  
for this Sensitive Species at Risk  
Map**

Predicted likelihood of golden eagle nesting habitat using our global logistic regression model based on 914 surveyed golden eagle nesting territories in the southwestern U.S. Locations symbolized as a dark red indicate areas with the highest predicted likelihood of golden eagle nesting habitat while those in a dark blue indicate the lowest likelihood.
