About ECATTS

Welcome to ICLD's Environmental Compliance Assessment, Training, and Tracking System (ECATTS). This system is designed to provide an understanding and awareness of the environmental requirements established by the United States Environmental Protection Agency (EPA), the United States Department of Defense (DoD), and the state or country in which your facility is located.

Maintaining environmental compliance is everyone's responsibility. While working on Navy bases, you are required to know and understand how EPA, DoD and your state's or host country's environmental compliance laws impact your work activities. Environmental compliance means doing your job in such a manner so that you prevent harm to the environment, yourself, and your coworkers.

This system will help you develop the skills you need to maintain an environmentally friendly work environment and to complete your work tasks in accordance with the various installations' environmental policy.
