(2) Cross-fiscal year agreements.—An agreement with an agency under paragraph (1) may be for a period that begins in one fiscal year and ends in another fiscal year so long as the period of the agreement does not exceed two years. (h) Surety-Contractor Relationship.—Any surety which provides a bid, performance, or payment bond in connection with any direct Federal procurement for a response action contract under the Defense Environmental Restoration Program and begins activities to meet its obligations under such bond, shall, in connection with such activities or obligations, be entitled to any indemnification and the same standard of liability to which its principal was entitled under the contract or under any applicable law or regulation.

(2) Limitation of accrual of rights of action under bonds.—If, under applicable Federal law, surety bonds are required for any direct Federal procurement of any response action contract under the Defense Environmental Restoration Program, no right of action shall accrue on the performance bond issued on such contract to or for the use of any person other than an obligee named in the bond.

(3) Liability of sureties under bonds.—If, under applicable Federal law, surety bonds are required for any direct Federal procurement of any response action contract under the Defense Environmental Restoration Program, unless otherwise provided for by the Secretary in the bond, in the event of a default, the surety's liability on a performance bond shall be only for the cost of completion of the contract work in accordance with the plans and specifications of the contract less the balance of funds remaining to be paid under the contract, up to the penal sum of the bond. The surety shall in no event be liable on bonds to indemnify or compensate the obligee for loss or liability arising from personal injury or property damage whether or not caused by a breach of the bonded contract.

(4) Nonpreemption.—Nothing in this section shall be construed as preempting, limiting, superseding, affecting, applying to, or modifying any State laws, regulations, requirements, rules, practices, or procedures. Nothing in this section shall be construed as affecting, applying to, modifying, limiting, superseding, or preempting any rights, authorities, liabilities, demands, actions, causes of action, losses, judgment, claims, statutes of limitation, or obligations under Federal or State law, which do not arise on or under the bond.

(2) The position of program manager shall be filled by—

§2705. Notice of environmental restoration activities

(a) Expedited Notice.—The Secretary of Defense shall take such actions as necessary to ensure that the regional offices of the Environmental Protection Agency and appropriate State and local authorities for the State in which a facility under the Secretary’s jurisdiction is located receive prompt notice of each of the following:

- (1) The discovery of releases or threatened releases of hazardous substances at the facility.
- (2) The extent of the threat to public health and the environment which may be associated with any such release or threatened release.
- (3) Proposals made by the Secretary to carry out response actions with respect to any such release or threatened release.
- (4) The initiation of any response action with respect to such release or threatened release and the commencement of each distinct phase of such activities.

(b) Comment by EPA and State and Local Authorities.—

(1) Release notices.—The Secretary shall ensure that the Administrator of the Environmental Protection Agency and appropriate State and local officials have an adequate opportunity to comment on notices under paragraphs (1) and (2) of subsection (a).

(2) Proposals for response actions.—The Secretary shall require that an adequate opportunity for timely review and comment be afforded to the Administrator and to appropriate State and local officials after making a proposal referred to in subsection (a)(3) and before undertaking an activity or action referred to in subsection (a)(4). The preceding sentence does not apply if the action is an emergency removal taken because of imminent and substantial endangerment to human health or the environment and consultation would be impractical.

(c) Technical Review Committee.—Whenever possible and practical, the Secretary shall establish a technical review committee to review and comment on Department of Defense actions and proposed actions with respect to releases or threatened releases of hazardous substances at installations. Members of any such committee shall include at least one representative of the Secretary, the Administrator, and appropriate State and local authorities and shall include a public representative of the community involved.

(d) Restoration Advisory Board.—(1) In lieu of establishing a technical review committee under subsection (c), the Secretary may permit the establishment of a restoration advisory board in connection with any installation (or group of nearby

installations) where the Secretary is planning or implementing environmental restoration activities.

(2)(A) The Secretary shall prescribe regulations regarding the establishment, characteristics, composition, and funding of restoration advisory boards pursuant to this subsection.

Such payments shall be made from funds available under subsection (g).

(e) Technical Assistance.—(1) The Secretary may, upon the request of the technical review committee or restoration advisory board for an installation, authorize the commander of the installation (or, if there is no such commander, an appropriate official of the Department of Defense designated by the Secretary) to obtain for the committee or advisory board, as the case may be, from private sector sources technical assistance for interpreting scientific and engineering issues with regard to the nature of environmental hazards at the installation and the restoration activities conducted, or proposed to be conducted, at the installation. The commander of an installation (or, if there is no such commander, an appropriate official of the Department of Defense designated by the Secretary) shall use funds made available under subsection (g) for obtaining assistance under this paragraph.

(2) The commander of an installation (or, if there is no such commander, an appropriate official of the Department of Defense designated by the Secretary) may obtain technical assistance under paragraph (1) for a technical review committee or restoration advisory board only if—

(A) the technical review committee or restoration advisory board demonstrates that the Federal, State, and local agencies responsible for overseeing environmental restoration at the installation, and available Department of Defense personnel, do not have the technical expertise necessary for achieving the objective for which the technical assistance is to be obtained; or

(B) the technical assistance—

(i) is likely to contribute to the efficiency, effectiveness, or timeliness of environmental restoration activities at the installation; and

(ii) is likely to contribute to community acceptance of environmental restoration activities at the installation.

(f) Involvement in Defense Environmental Restoration Program.—If a technical review committee or restoration advisory board is established with respect to an installation (or group of installations), the Secretary shall consult with and seek the advice of the committee or board on the following issues:

(1) Identifying environmental restoration activities and projects at the installation or installations.

(2) Monitoring progress on these activities and projects.

After public notice and comment on the proposed protocol, the Secretary shall issue a final protocol and shall apply the protocol to defense sites listed on the inventory. The level of response priority assigned the site shall be included with the information required by subsection (a)(2).

(2) In assigning the response priority for a defense site on the inventory, the Secretary shall primarily consider factors relating to safety and environmental hazard potential, such as the following:

(A) Whether there are known, versus suspected, unexploded ordnance, discarded military munitions, or munitions constituents on all or any portion of the defense site and the types of unexploded ordnance, discarded military munitions, or munitions constituents present or suspected to be present.

(B) Whether public access to the defense site is controlled, and the effectiveness of these controls.

(C) The potential for direct human contact with unexploded ordnance, discarded military munitions, or munitions constituents at the defense site and evidence of people entering the site.

(D) Whether a response action has been or is being undertaken at the defense site under the Formerly Used Defense Sites program or other program.

(E) The planned or mandated dates for transfer of the defense site from military control.

(F) The extent of any documented incidents involving unexploded ordnance, discarded military munitions, or munitions constituents at or from the defense site, including incidents involving explosions, discoveries, injuries, reports, and investigations.

(G) The potential for drinking water contamination or the release of munitions constituents into the air.

(H) The potential for destruction of sensitive ecosystems and damage to natural resources.

(3) The priority assigned to a defense site included on the inventory shall not impair, alter, or diminish any applicable Federal or State authority to establish requirements for the investigation of, and response to, environmental problems at the defense site.

(c) Updates and Availability.—(1) The Secretary shall annually update the inventory and site prioritization list to reflect new information that becomes available. The inventory shall be available in published and electronic form.

(2) The Secretary shall work with communities adjacent to a defense site to provide information concerning conditions at the site and response activities. At a minimum, the Secretary shall provide the site inventory information and site prioritization list to appropriate Federal, State, tribal, and local officials, and, to the extent the Secretary considers appropriate, to civil defense or emergency management agencies and the public.

“(3) Interim reports.—The Secretary shall periodically, but no less often than annually, release any new information obtained during the historical review conducted under paragraph (1). The Secretary may withhold from public release the exact nature and locations of munitions the potential unauthorized retrieval of which could pose a significant threat to the national defense or public safety.

“(4) Inclusion of information in annual report on environmental restoration activities.—The Secretary shall include the information obtained pursuant to the review conducted under paragraph (1) in the annual report on environmental restoration activities submitted to Congress under [former] section 2706 of title 10, United States Code.

“(5) Final report.—The Secretary shall complete the historical review required under paragraph (1) and submit a final report on the findings of such review in the annual report on environmental restoration activities submitted to Congress for fiscal year 2009.

“(b) Identification of Navigational and Safety Hazards.—
