Best Practices for Treatment System Optimization Webinar Training

JULY 23, 2025 | 2:00 – 4:00 PM ET

TOPICS INCLUDE:

- ➔ Defense Environmental Restoration Program Overview
- ➔ Treatment System Optimization Success Stories
- ➔ DoD Component Treatment System Optimization Processes Overview
- ➔ Metrics to Evaluate Treatment System Optimization

Attendees can register for the event at this link:

<https://events.teams.microsoft.com/event/c517e07e-0afc-4cdc-bd02-ed7d70e3f4d7@d5fe813e-0caa-432a-b2ac-d555aa91bd1c>

Join the Department of Defense and State regulators for an engaging discussion on DoD's treatment system optimization efforts. During this training, attendees will gain a high-level understanding of how DoD executes treatment system optimization, including policy considerations, data needs, and evaluation metrics. Speakers will also provide case studies communicating the benefits and successes of the Department's optimization efforts, as well as helpful resources and tools to consider during cleanup projects. The intended audience for this training includes members of the DoD Cleanup community, including State regulators.

This webinar is intended to provide general guidelines but will not be comprehensive. For immediate questions, please contact DoDWebinars@bah.com.
