## Bird Checklist for Fort Wainwright, Alaska: Tanana Flats Training Area

The Tanana Flats Training Area (TFTA) occupies 653,746 acres of the Middle Tanana River Basin. The Tanana Flats supports a complex mosaic of ecosystems and is situated on a large alluvial fan and glacial outwash complex built out of the north side of the Alaska Range. Both surface and subsurface water move across the Tanana Flats on a very low gradient originating from mountain glaciers that discharge to the Tanana River. A portion of the groundwater surfaces in springs and diffuse upwellings contributing to an extensive system of fens. The Flats also include a variety of other habitats, such as forests of white spruce, paper birch, and quaking aspen; black spruce bogs; thickets of willow and alder; and grasslands and meadows. These habitats are important to a variety of songbirds, shorebirds, and upland game birds. Some of the more significant species known to utilize the area are: sandhill crane, trumpeter swans, Canada geese, American wigeon, green-winged teal, mallard, northern pintail, blue-winged teal, northern shoveler, and scaup (both lesser and greater). Other bird species known to use this area include; bald eagles, red-tailed hawks, northern harriers, short-eared owls, northern hawk owls, and numerous small passerine species including warblers, thrushes, blackbirds, and sparrows.

Tanana Flats Training Lands at some time during the year. The abundance of each species is disseminated by season

**Sp** - Spring - March to May **F** - Fall - August to October

S - Summer - June to July
W - Winter - November to February

Habitat Most Likely Found

A general habitat description for individual species during the breeding season if a migratory species, or year-round if a resident species.

C = Common (certain to be seen or heard in suitable habitat). Widely distributed, and This document lists all species which could be observed on Fort Wainwright, Alaska: relatively easy to detect. **U** = Uncommon (present but not certain to be seen; or locally distributed). Usually present

in relatively low numbers, unevenly distributed. Not observed regularly. R = Rare. Present annually in very low numbers or locally distributed. Infrequently

encountered, or seen only a few times annually. **O** = Occasional (seen only a few times in a five-year period).

X = Accidental (has been seen only once or twice) Does not occur annually. Species beyond normal range. May not occur again.

\* - birds known to nest in the region (Interior Alaska)

Coniferous & Mixed Forests

## Status

- Y = Year-round resident.

 B = Breeding species (migratory).
 \* = Breeding on TFTA has been documented for this species through observation of eggs, nests, or dependent (unfledged or recently fledged) young. **M** = Migrant non-breeder traveling between summer and winter range.

**V** = Visitor from outside its normal range.

DIPPERS	Sp	s	F	w	Status	Habitat Most Likely Found
Family: Cinclidae						
American Dipper*	U	U	U	U	Υ	Clear, Swift Water Streams & Rivers
THRUSHES	Sp	s	F	W	Status	Habitat Most Likely Found
Family: Turdidae						
American Robin*	С	С	U	R	В	Widespread, Variety of Habitats
Varied Thrush*	С	С	U	-	В	Damp Coniferous Forests & Thick Understo
Hermit Thrush*	С	С	U	-	В	Boreal Forest Edges
Swainson's Thrush*	С	С	U	-	В	Woodlands, Coniferous & Mixed Forest Edg
Gray-cheeked Thrush*	Ũ	Ũ	Ū	-	В	Coniferous Forest Edges & Riparian Areas
Mountain Bluebird*	Ö	ŏ	-	-	M	Varied Open Habitats, Clearings & Burns
Townsend's Solitaire*	R	R	R		В	Open Forests With Steep Banks & Tall Tree
Northern Wheatear	R	R	R	-	M	Rocky Slopes on Tundra & Mountains
OLD WORLD WARBLERS	Sp	s	F	w	Status	Habitat Most Likely Found
