2027 EM/DQ Workshop Call for Papers

Department of War
Environmental Monitoring & Data Quality Workshop
Shades of Green
Orlando, FL | July 27-29, 2027

The DoW Environmental Data Quality Workgroup is pleased to announce that government approval has been secured for the 2027 DoW Environmental Monitoring & Data Quality Workshop (EM/DQ). This workshop is open to all interested members of the environmental community involved with DoW sites or projects including representatives from DoW services, other federal agencies, state, local, and tribal governments, academia, and the private sector. There will not be a registration fee to attend.

We are now accepting abstracts for potential presentations on topics of interest to the DoW including but not limited to:

Data Quality (e.g., developing data quality objectives, determining project requirements for analysis or validation, matching data quality to data use and project decisions)	Data Management (e.g., working with databases, data lifecycle, data and the project lifecycle, ensuring traceability and integrity of data)
Emerging Contaminants (e.g. micro- and nano-plastics, 6PPD-Q)	Per- and Polyfluoroalkyl Substances (PFAS)
Vapor Intrusion	Sampling
Method Innovation	Artificial Intelligence (AI)
Data Validation (e.g., common findings, challenges, case studies, efficiency)	Data Usability (e.g., performing statistical evaluations, considerations for judgmental sampling, process improvements and implementation, case studies, challenges)

Abstracts should be submitted to:

Mr. Zachary Walton at zachary.r.walton4.ctr@us.navy.mil with copy to Ms. Lashia Wilson at lashia.k.wilson.ctr@us.navy.mil by February 12, 2027.
