

WORCESTER v. GEORGIA
Supreme Court of the United States, 1832.
31 U.S. (6 Pet.) 515, 8 L.Ed. 483.

The extra-territorial power of every legislature being limited in its action, to its own citizens or subject, the very passage of this act is an assertion of jurisdiction over the Cherokee nation, and of the rights and powers consequent on jurisdiction.

The first step, then, in the inquiry, which the constitution and laws impose on this court, is an examination of the rightfulness of this claim.

America, separate from Europe by a wide ocean, was inhabited by a distinct people, divided into separate nations, independent of each other and of the rest of the world, having institutions of their own, and governing themselves by their own laws. It is difficult to comprehend the proposition, that the inhabitants of either quarter of the globe could have rightful original claims of dominion over the inhabitants of the other, or over the lands they occupied; or that the discovery of either by the other should give the discoverer rights in the country discovered, which annulled the pre-existing rights of its ancient possessors.

After lying concealed for a series of ages, the enterprise of Europe, guided by nautical science, conducted some of her adventurous sons into the western world. They found it in possession of a people who had made small progress in agriculture or manufactures, and whose general employment was war, hunting, and fishing.

Did these adventures, by sailing along the coast, and occasionally landing on it, acquire for the several governments to whom they belonged, or by whom they were commissioned, a rightful property in the soil, from the Atlantic to the Pacific; or rightful dominion over the numerous people who occupied it? Or has nature, or the great Creator of all things, conferred these rights over hunters and fishermen, on agriculturists and manufacturers?

But power, war, conquest, give rights, which, after possession, are conceded by the world; and which can never be controverted by those on whom they descend. We proceed, then, to the actual state of things, having glanced at their origin; because holding it in our recollection might shed some light on existing pretensions.
