

Communications

We presented results and methods from this project at annual meetings of the National Military Fish and Wildlife Association (NMFWA) in 2015 and 2016, and also incorporated work from this project into an eDNA training workshop at NMFWA 2016. We presented a webinar in the Department of Defense Natural Resources webinar series in April 2016. The webinar and NMFWA workshop materials will be posted on the eDNA toolkit website (<https://labs.wsu.edu/edna/>).
