Eglin Air Force Base Natural Resources Section
DoD Legacy Resource Management Program**

OVERVIEW OF PRESENTATION

- Background information on Eglin AFB
- Eglin's objectives for this study
- History of this research effort
- Summary of Approach
- Summary of Results
 - 2008-2009 Pilot Study
 - 2009-2010 Legacy Study
 - 2010-2011 Legacy Study
 - Combined Legacy Study
- Test Pinger/Range Testing Investigation
- Conclusions
- Acknowledgements

BACKGROUND INFORMATION ON EGLIN AFB

EGLIN AIR FORCE BASE, FL

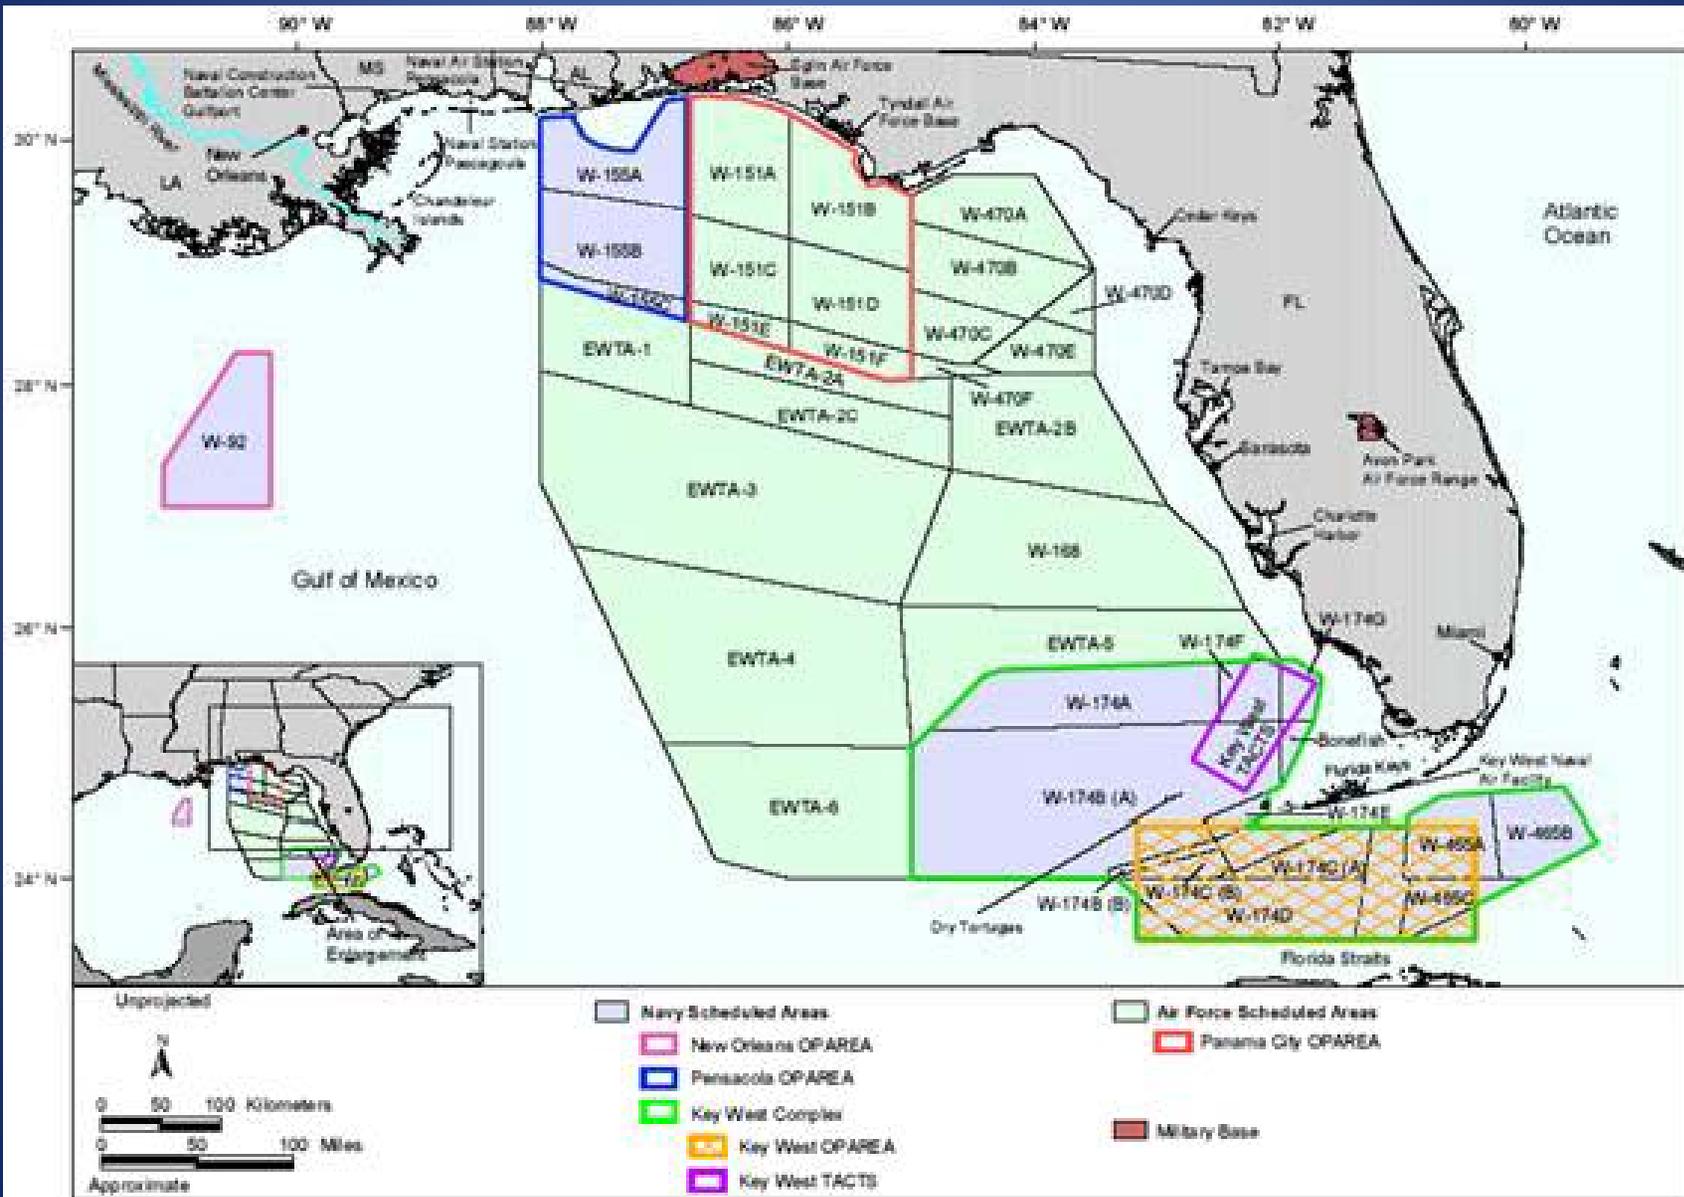

MISSIONS ON EGLIN AFB

- Unique and ideal setting for military testing and training
- Many missions occur within the Eglin Gulf Testing and Training Range (EGTTR) and in the Santa Rosa Island (SRI) Test and Training Range Complex
- Overlaps with Gulf sturgeon critical habitat areas in the Gulf of Mexico

EGLIN GULF TEST AND TRAINING RANGE: 124,642 SQUARE MILES OF WATER RANGES

EGLIN'S OBJECTIVES FOR THIS STUDY

SANTA ROSA ISLAND LOCATION WITHIN GULF STURGEON CRITICAL HABITAT

MISSION IMPACTS TO PROTECTED SPECIES???

- Gulf sturgeon are federally protected under the Endangered Species Act
- Section 7 consultations are required
- Lack of data concerning Gulf sturgeon's usage of areas surrounding Eglin's Gulf ranges
 - Difficult to determine impacts
 - Cannot develop mission avoidance zones or other mitigation measures
- Secured funding from the Department of Defense's Legacy Resource Management Program to conduct this multi-year study

HISTORY OF THIS RESEARCH EFFORT

TIMELINE OF EVENTS

- 2008-2009 Pilot Study
 - Initial effort funded by Eglin Natural Resources Section
 - Received support from U.S. Geological Survey, Florida Fish and Wildlife Conservation Commissions, and U.S. Fish and Wildlife Service
 - Focused on Choctawhatchee River
- 2009 – Received funding from Department of Defense Legacy Resource Management Program to continue the study for 2 more years
 - Purchased additional receivers and tags
 - Modified and expanded Study Area
 - Focused on Yellow, Blackwater, and Escambia Rivers

SUMMARY OF APPROACH

SUMMARY OF APPROACH

- Vemco® V16-5H coded acoustic transmitters were surgically inserted into the abdominal cavity of adult Gulf sturgeon by the USFWS
- 40 Gulf sturgeon from the Choctawhatchee River were tagged for the 2008 Pilot Study
- 40 more Gulf sturgeon from the Yellow, Blackwater, and Escambia Rivers were tagged between August and September 2009
- 40 more Gulf sturgeon tagged in the Yellow, Blackwater, and Escambia Rivers were tagged between August and September 2010
- Over the course of three years, 120 adult Gulf sturgeon were tagged with acoustic transmitters from four different river systems in the area surrounding Eglin Air Force Base (AFB)

SUMMARY OF APPROACH

2008-2009 Pilot Study

- 13 VR2Ws were deployed from October 2008 to April 2009
 - 9 in the Gulf of Mexico
 - 3 in the Santa Rosa Sound
 - 1 in the Choctawhatchee Bay

2009-2010 Legacy Study

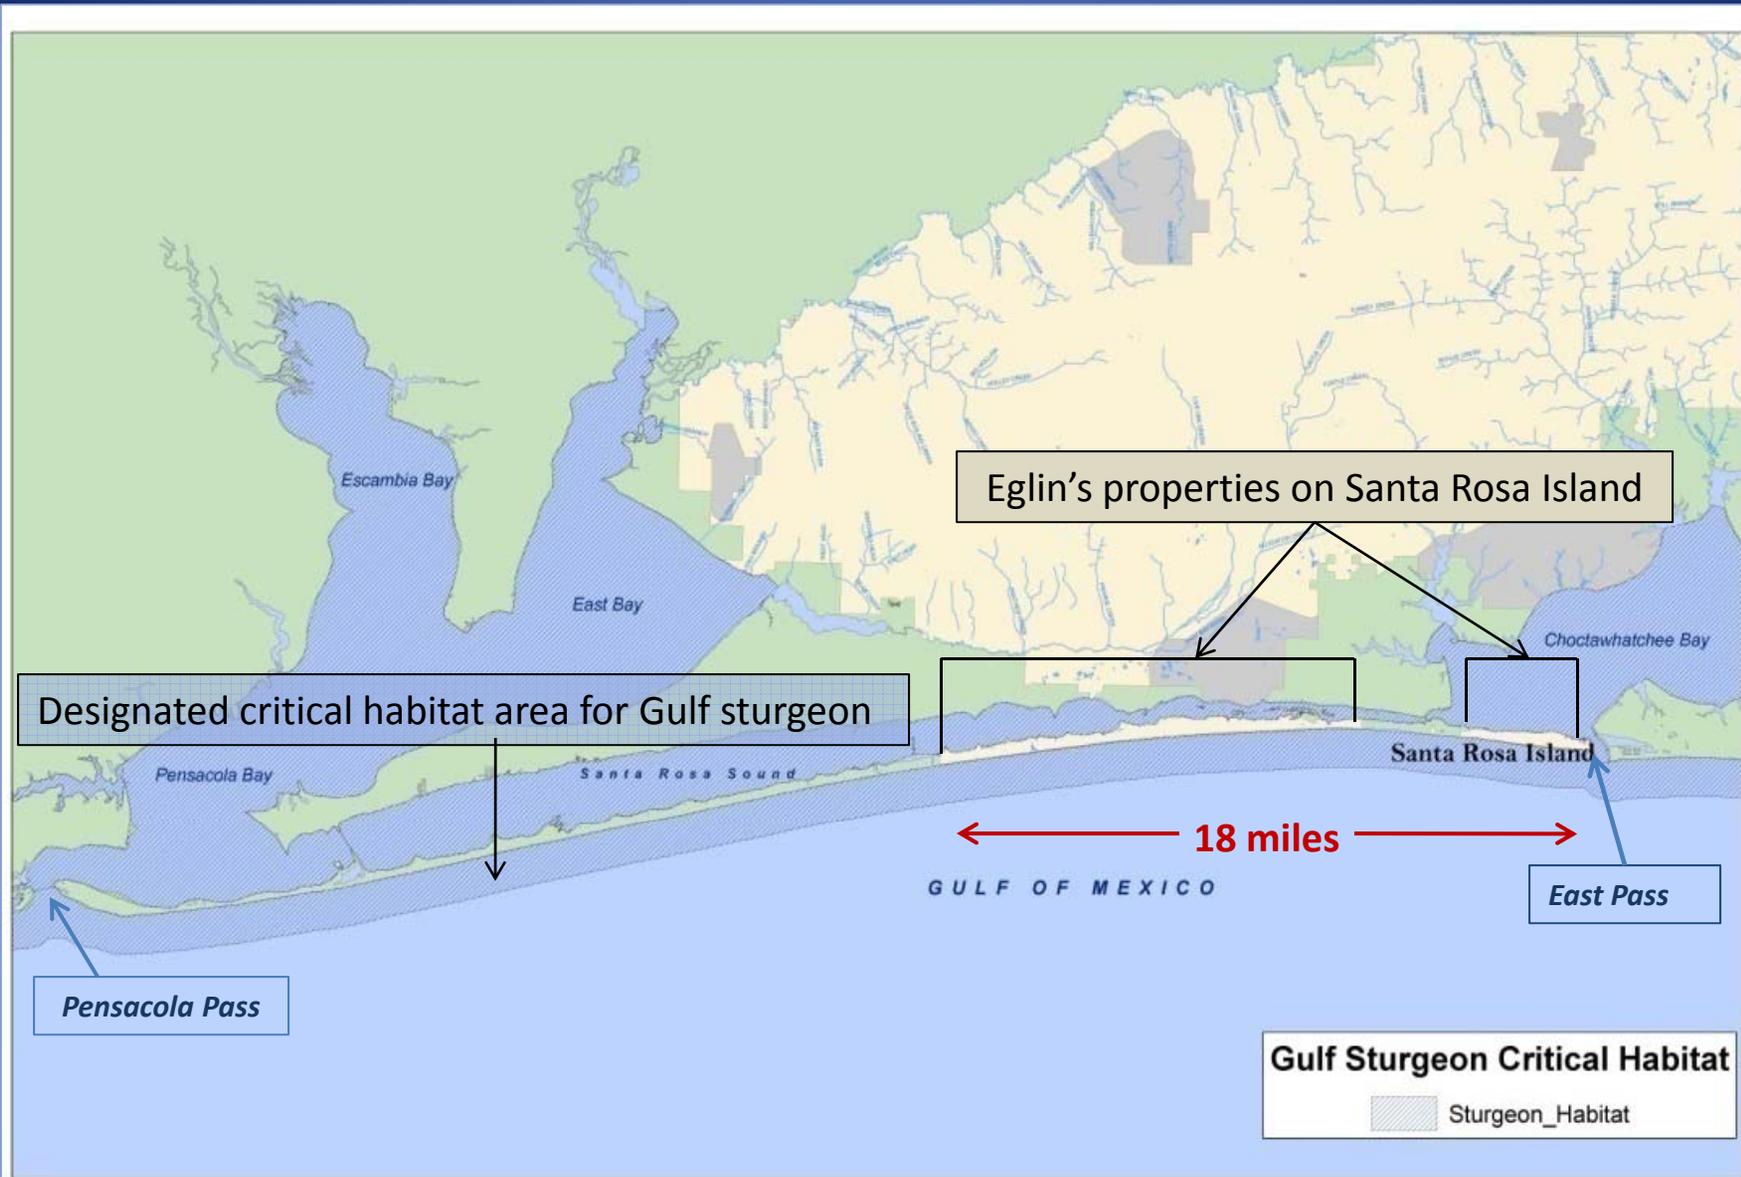

- 21 VR2Ws were deployed from September 2009 to May 2010
 - 11 in the Gulf of Mexico
 - 4 in the Santa Rosa Sound
 - 2 in the Pensacola Bay
 - 1 in the Yellow River
 - 1 in the Blackwater River
 - 2 in the Escambia River

2010-2011 Legacy Study

- 17 VR2Ws were deployed from October 2010 to May 2011
 - 11 in the Gulf of Mexico
 - 2 in the Santa Rosa Sound
 - 1 in the Pensacola Bay
 - 1 in the Yellow River
 - 1 in the Blackwater River
 - 1 in the Escambia River

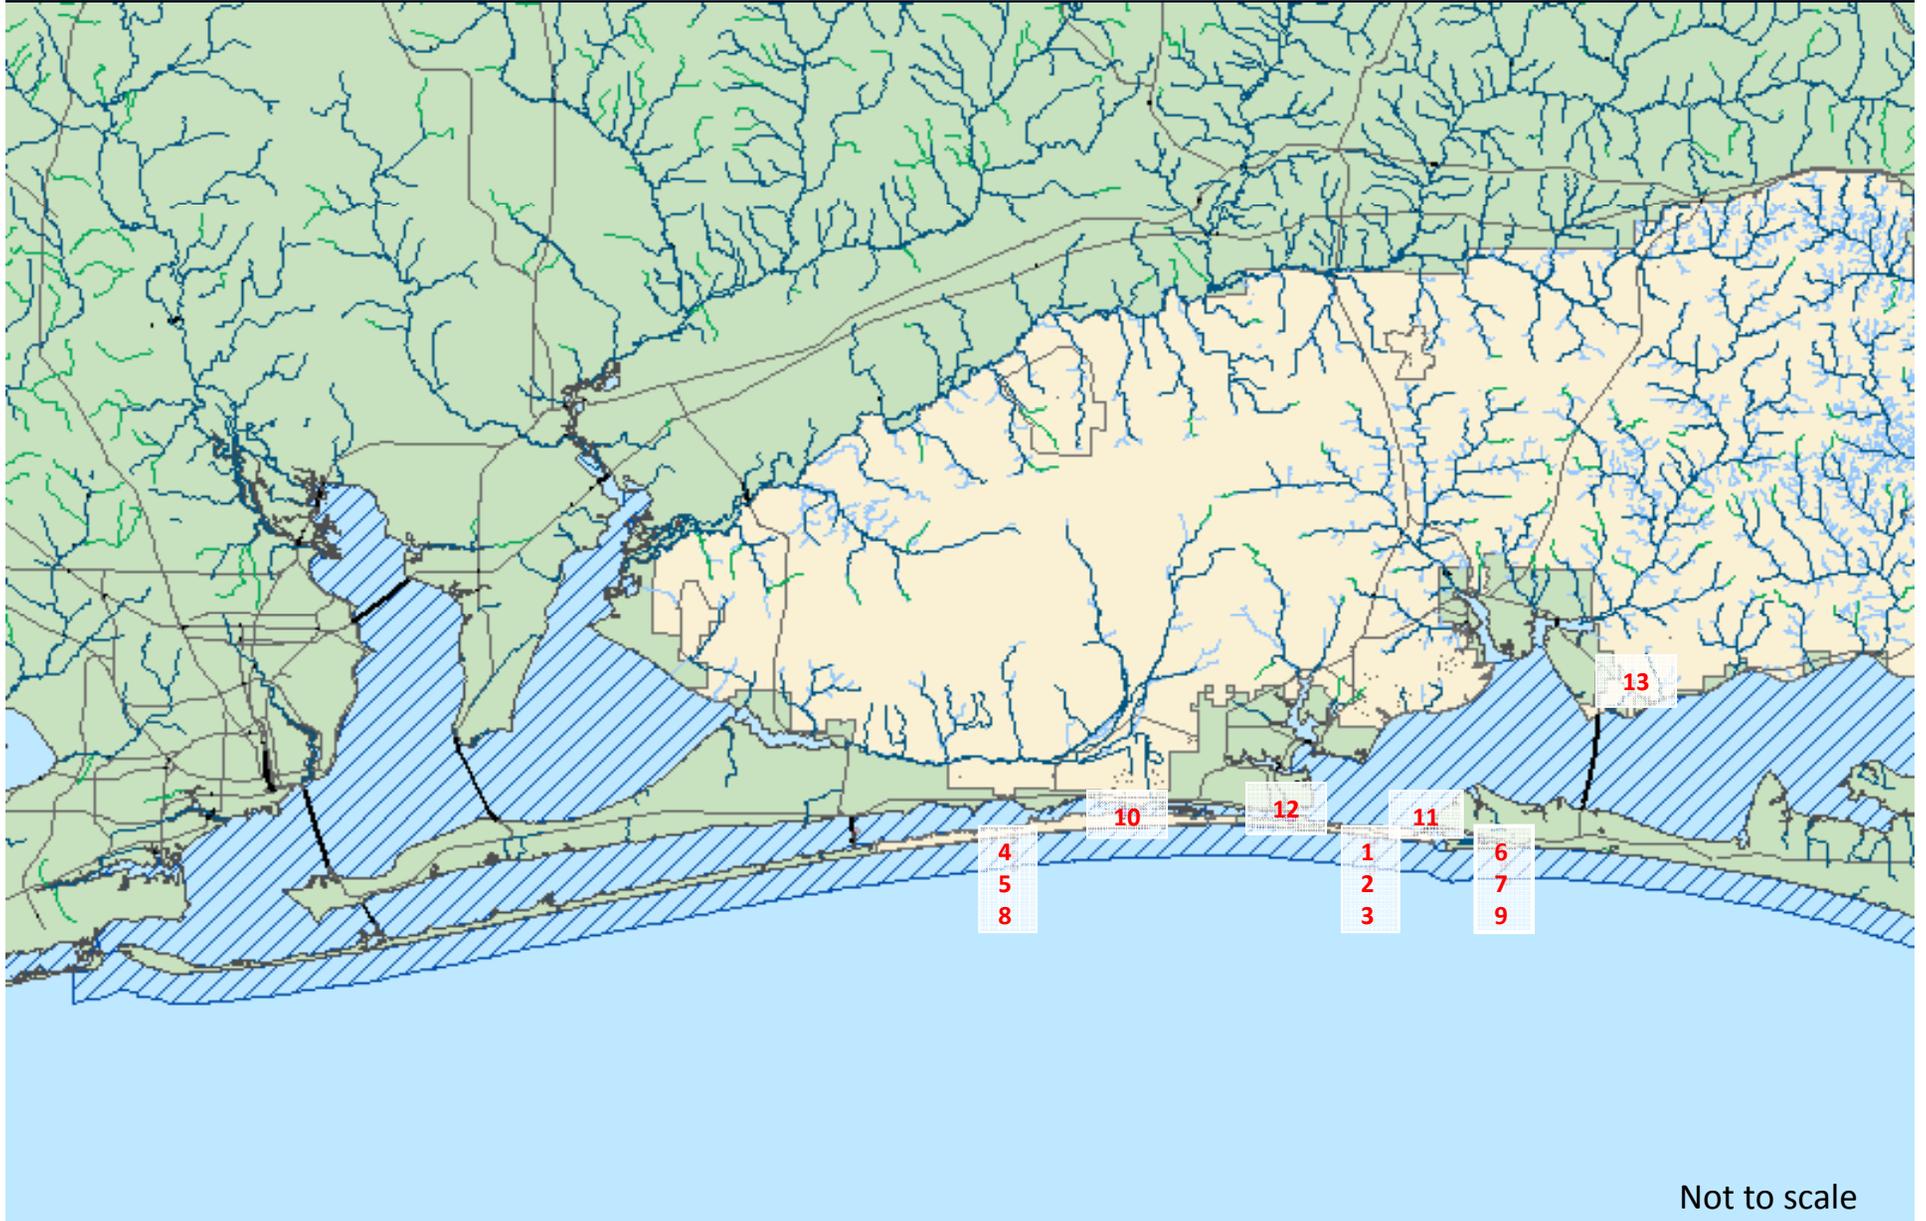

AREA OF INTEREST

SUMMARY OF RESULTS

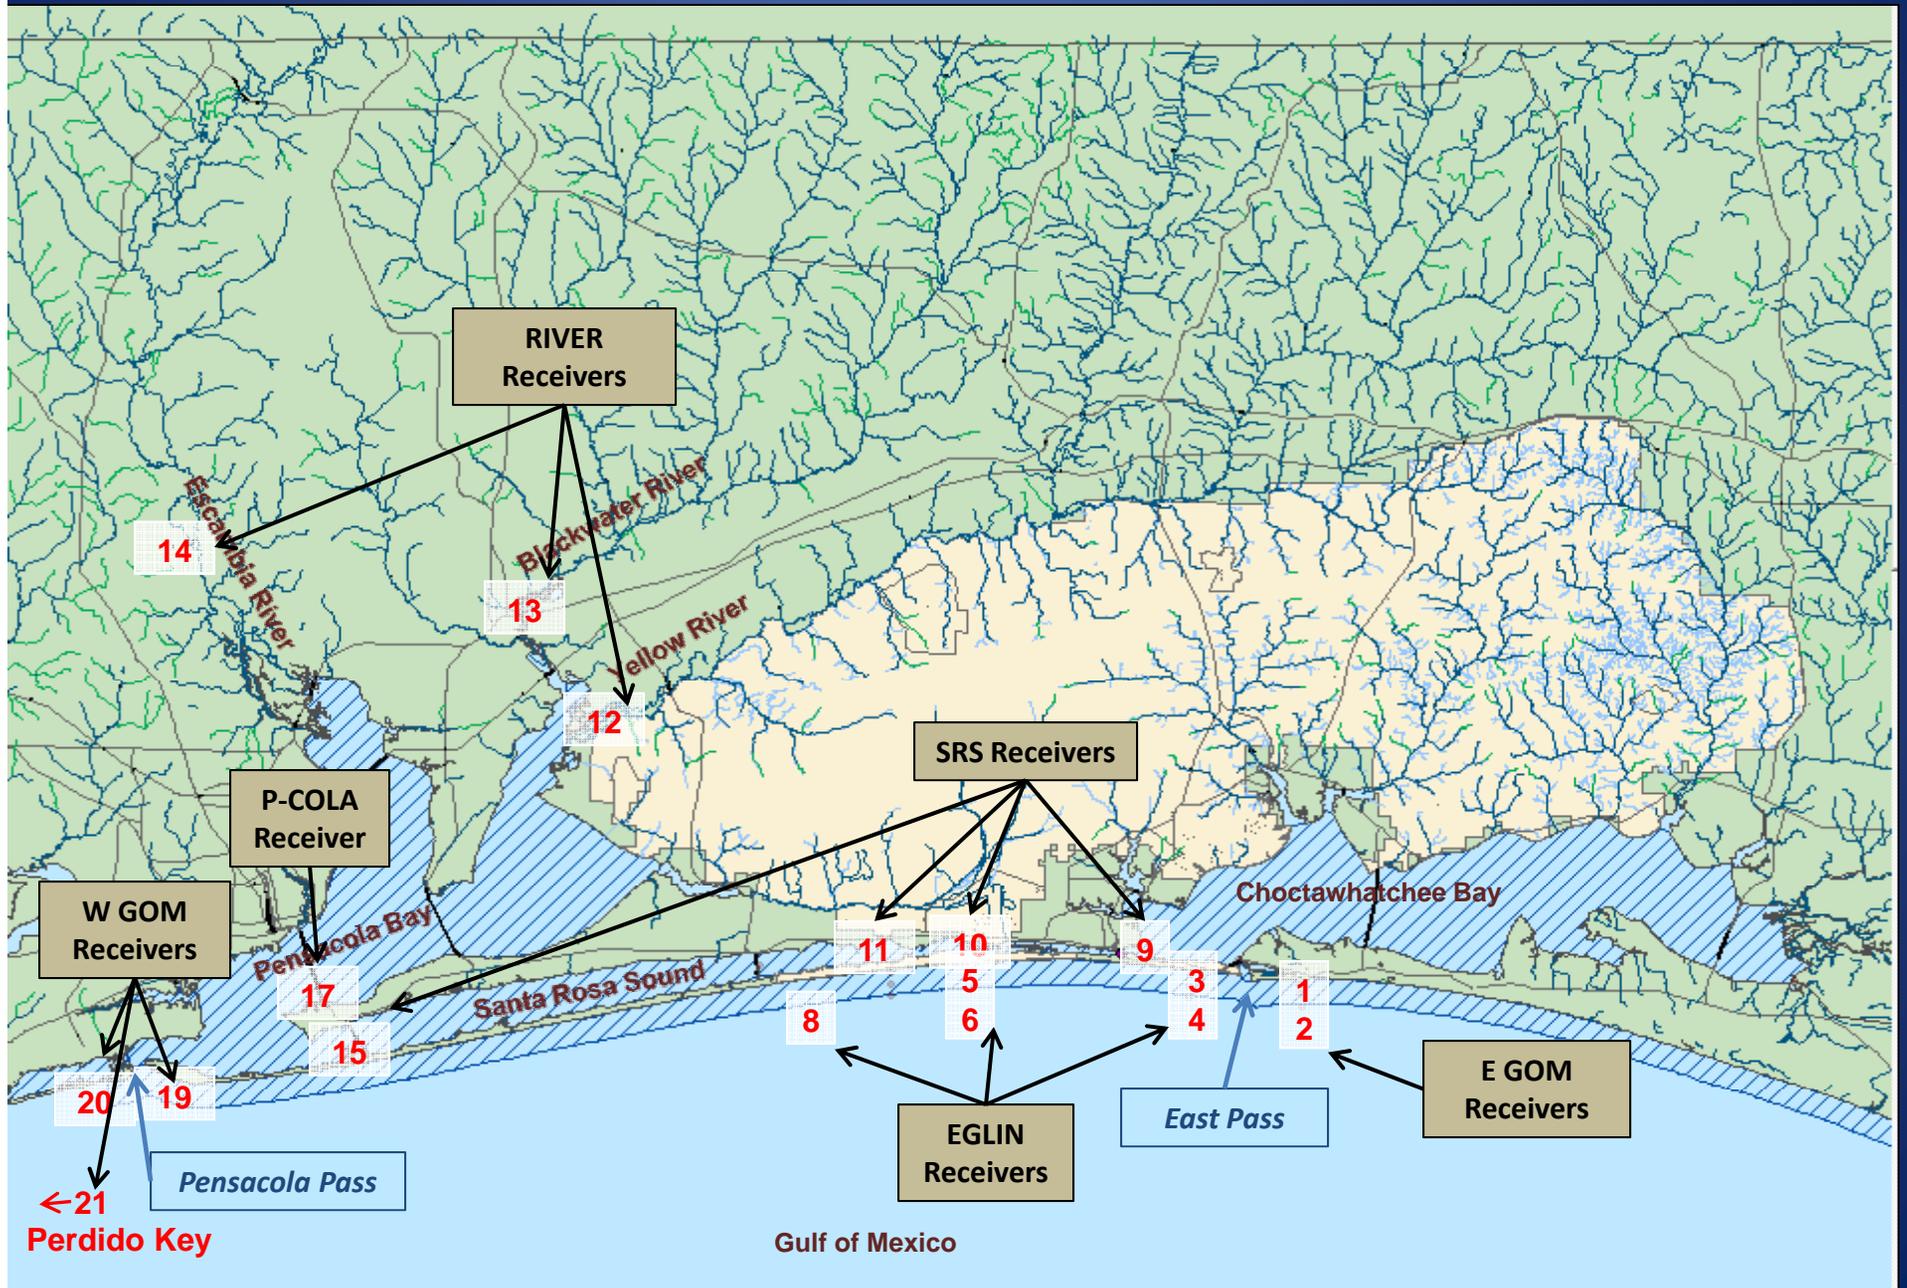

2008-2009 PILOT STUDY RECEIVER ARRAY

2008-2009 PILOT STUDY SUMMARY OF RESULTS

- 40 Gulf sturgeon tagged in the Choctawhatchee River
 - Fork lengths ranged from 138-196 cm (54-77 in)
 - Weight ranged from 21-64 kg (46-141 lbs)
- 26 of 40 tagged sturgeon were detected
- 82 % of detections occurred on receivers deployed 500 m from the shore
- 99 % of detections occurred within 1,000 m from shore

2009-2010 LEGACY STUDY RECEIVER ARRAY

2009-2010 LEGACY STUDY SUMMARY OF RESULTS

Tagging Results

- 40 sturgeon tagged in the Yellow, Blackwater, and Escambia Rivers
 - 12 from the Yellow River
 - 25 from the Blackwater River
 - 3 from the Escambia River
- Fork lengths ranged from 123-189 cm (48-74 in)
- Weight ranged from 14-63 kg (31-139 lbs)

2009-2010 LEGACY STUDY SUMMARY OF RESULTS

Detection Results

- 161,569 detections from 86 tagged sturgeon

ASSOCIATED STUDY	LOCATION TAGGED	# OF STURGEON DETECTED	# OF DETECTIONS
Eglin 2009-2010 Legacy Study	Yellow, Blackwater, and Escambia Rivers	39	64,683
Eglin 2008-2009 Pilot Study	Choctawhatchee River	14	19,832
Delaware State University	Choctawhatchee River	30	76,787
National Oceanic & Atmospheric Administration (NOAA) ²	Escambia River	3	267

- 73 % of detections occurred within 500 m from shore
- 80 % of detections occurred within 1,000 m from shore

2009-2010 LEGACY STUDY SUMMARY OF RESULTS

Movement Patterns

Detected 39 sturgeon tagged in Yellow,
Blackwater, and Escambia Rivers

PENSACOLA PASS/ PERDIDO KEY RECEIVERS

- 31 of 39 headed west once they entered the GOM

EGLIN/SRI/EAST PASS RECEIVERS

- 8 of 39 headed east once they entered the GOM

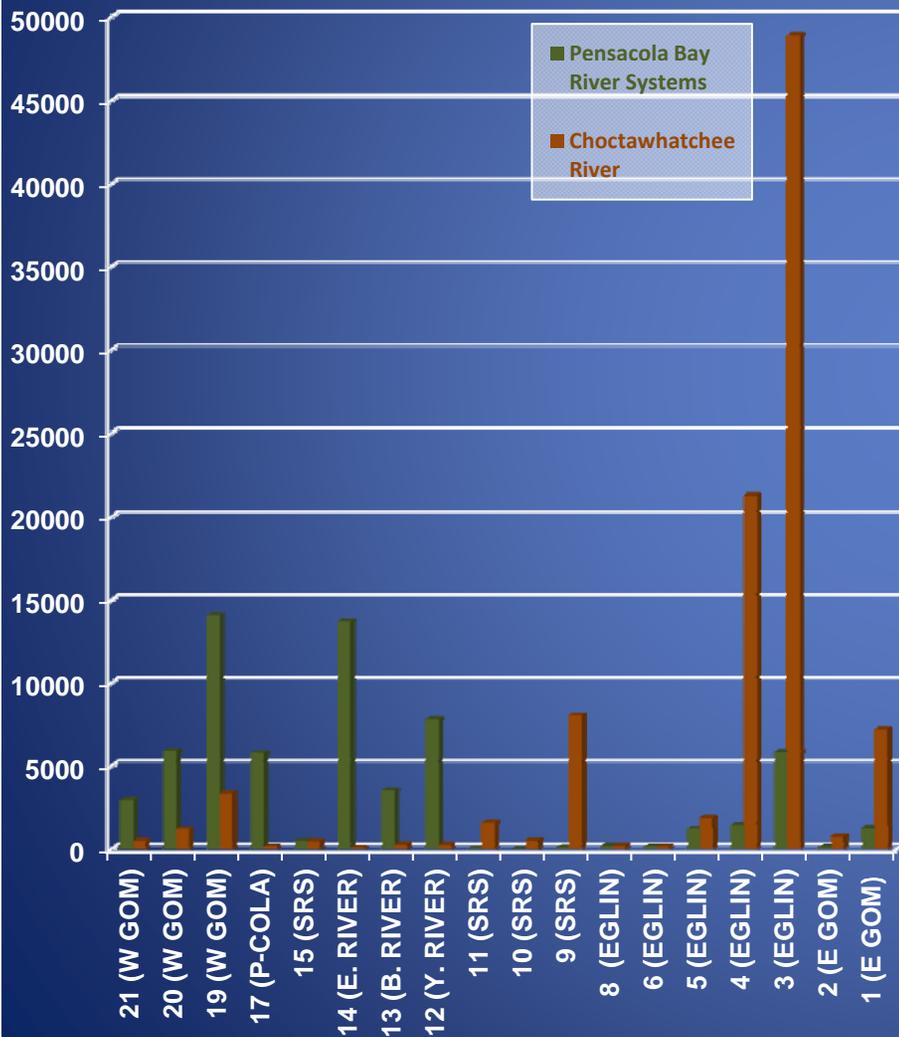

79% headed west

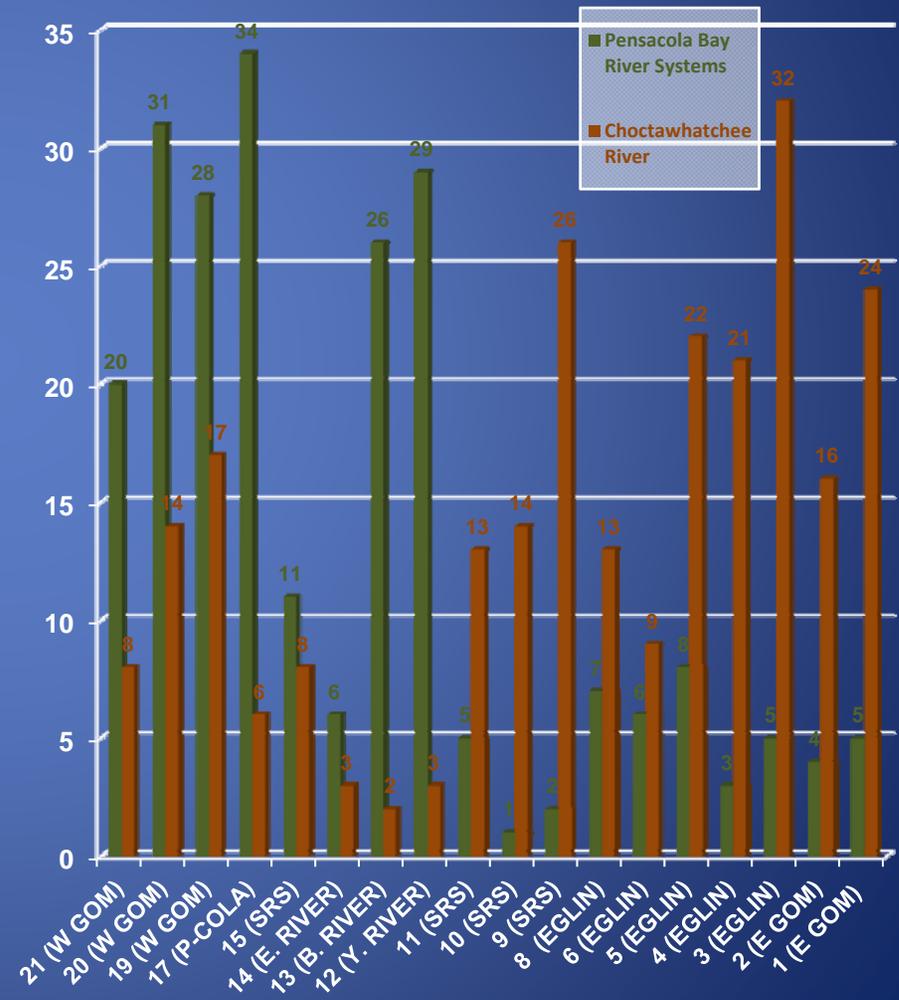

21 % headed east

2009-2010 LEGACY STUDY SUMMARY OF RESULTS

Number of Detections per Receiver

Number of Sturgeon Detected per Receiver

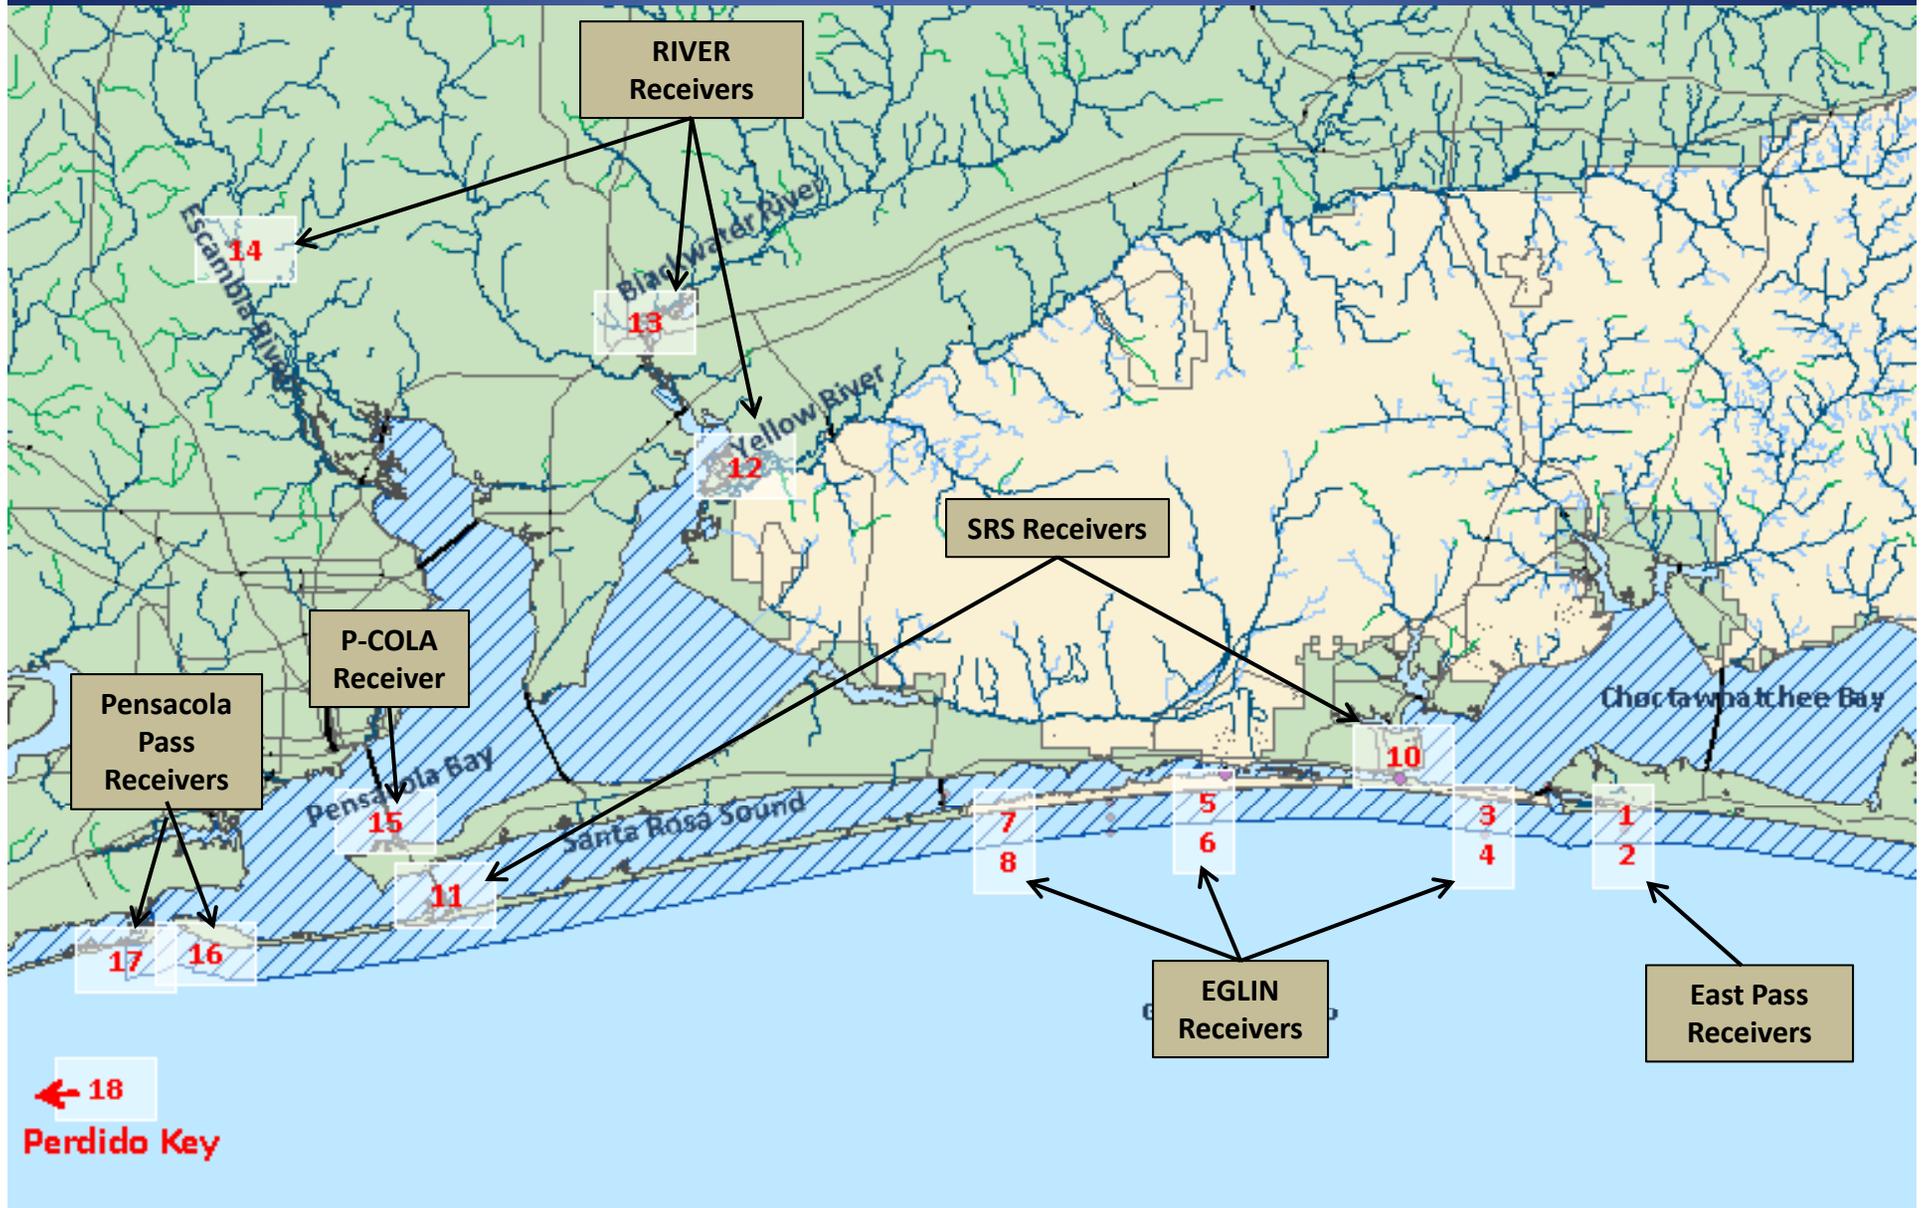

2009-2010 LEGACY STUDY SUMMARY OF RESULTS

River Fidelity

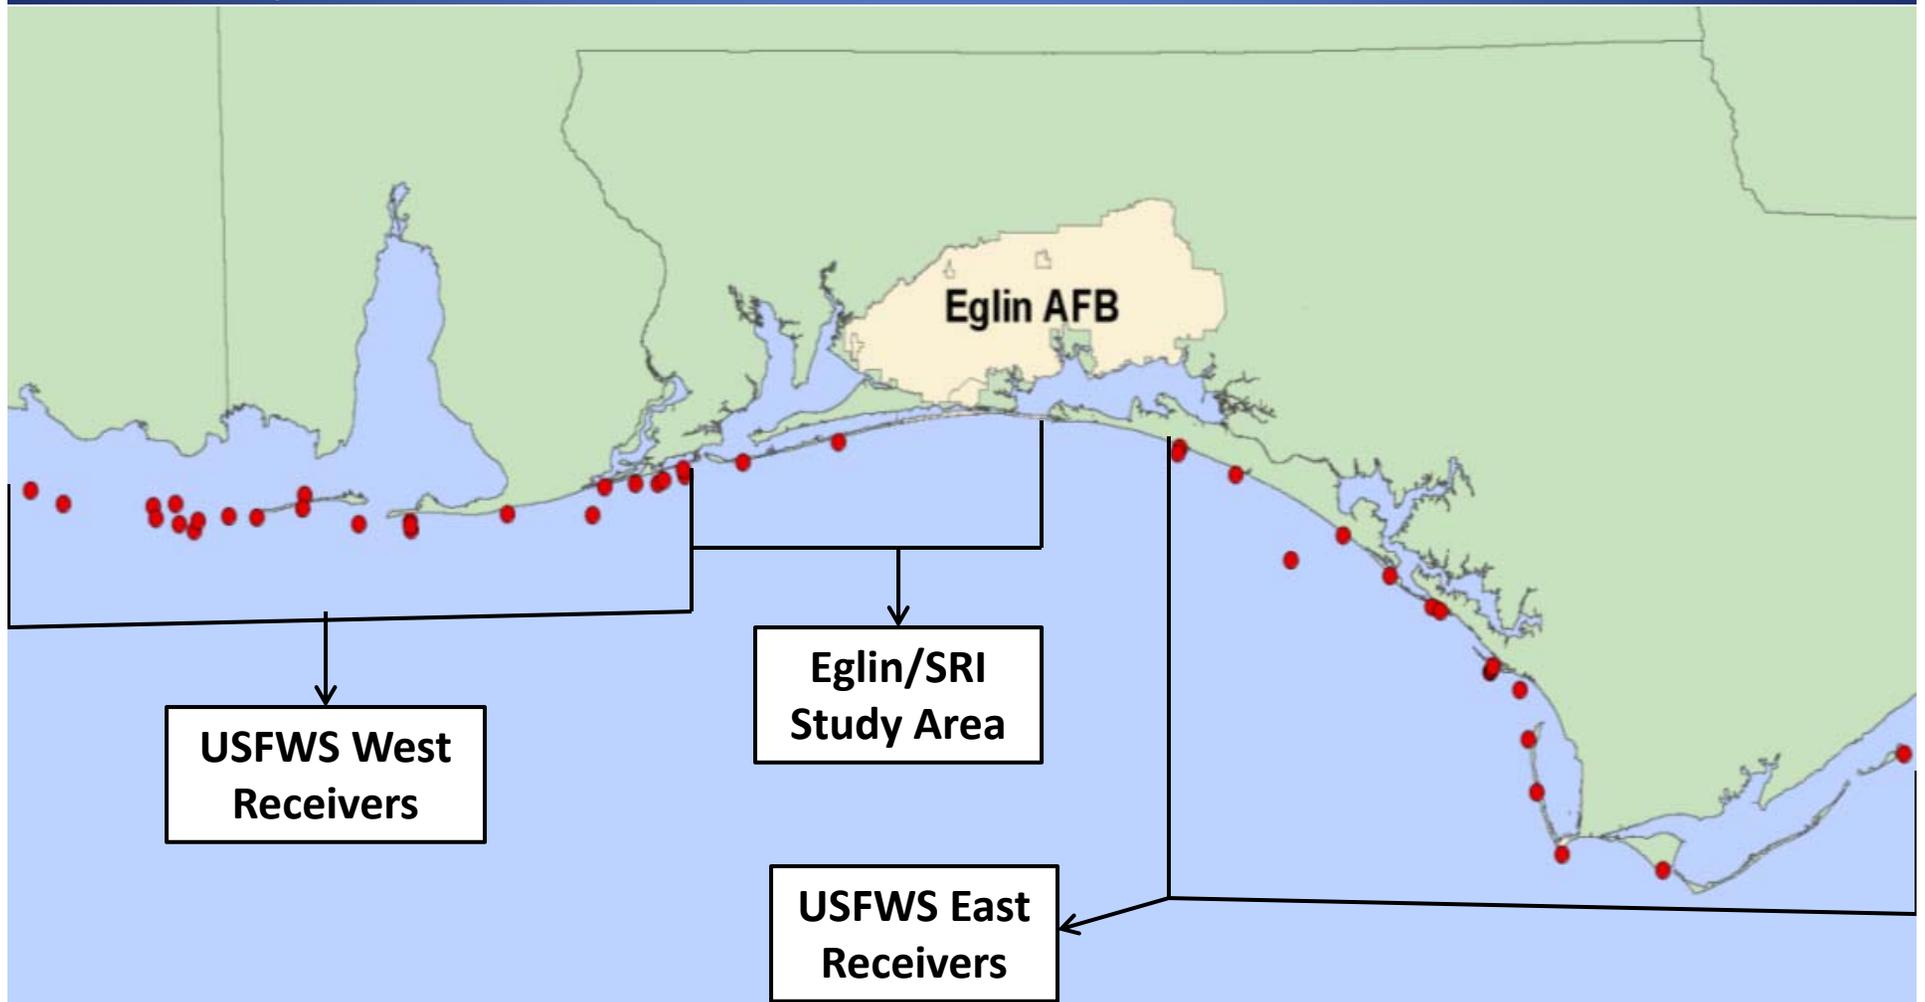

- Of the 39 sturgeon tagged in 2009 and detected during the 2009-2010 Legacy Study only 22 returned to the same river where they were originally tagged
- 17 sturgeon (44%) were detected in rivers where they were not originally tagged

2010-2011 LEGACY STUDY RECEIVER ARRAY

ADDITIONAL ARRAY DEPLOYED IN 2010

In 2010, a separate telemetry array was deployed in the Gulf of Mexico by the USFWS, which consisted of 135 VR2W receivers that stretched from Lake Pontchartrain, Louisiana to Cedar Key, Florida. The locations of the receivers in this extensive array were provided to us as well as any detection data from Gulf sturgeon tagged as part of our study.

2010-2011 LEGACY STUDY SUMMARY OF RESULTS

Tagging Results

- 40 more sturgeon tagged in the Yellow, Blackwater, and Escambia Rivers
 - 14 from the Yellow River (26 total)
 - 11 from the Blackwater River (36 total)
 - 15 from the Escambia River (18 total)
- Fork lengths ranged from 116-191 cm (46-75 in)
- Weight ranged from 14-62 kg (31-137 lbs)

2010-2011 LEGACY STUDY SUMMARY OF RESULTS

Detection Results

- 422,340 detections from 126 tagged sturgeon

ASSOCIATED STUDY	LOCATION TAGGED	# OF STURGEON DETECTED	# OF DETECTIONS
Eglin 2010-2011 Legacy Study	Yellow, Blackwater, and Escambia Rivers	39	87,002
Eglin 2009-2010 Legacy Study	Yellow, Blackwater, and Escambia Rivers	38	35,535
Eglin 2008-2009 Pilot Study	Choctawhatchee River	9	13,368
Delaware State University	Choctawhatchee River	40	286,435

- 18 % of detections occurred within 500 m from shore
- 38% of detections occurred within 1,000 m from shore
- 62% of detections occurred outside 1,000 m from shore

2010-2011 LEGACY STUDY SUMMARY OF RESULTS

Movement Patterns

Detected 75 sturgeon tagged in Yellow,
Blackwater, and Escambia Rivers

PENSACOLA PASS/ PERDIDO KEY RECEIVERS

- 66 of 75 headed west once they entered the GOM

EGLIN/SRI/EAST PASS RECEIVERS

- 9 of 75 headed east once they entered the GOM

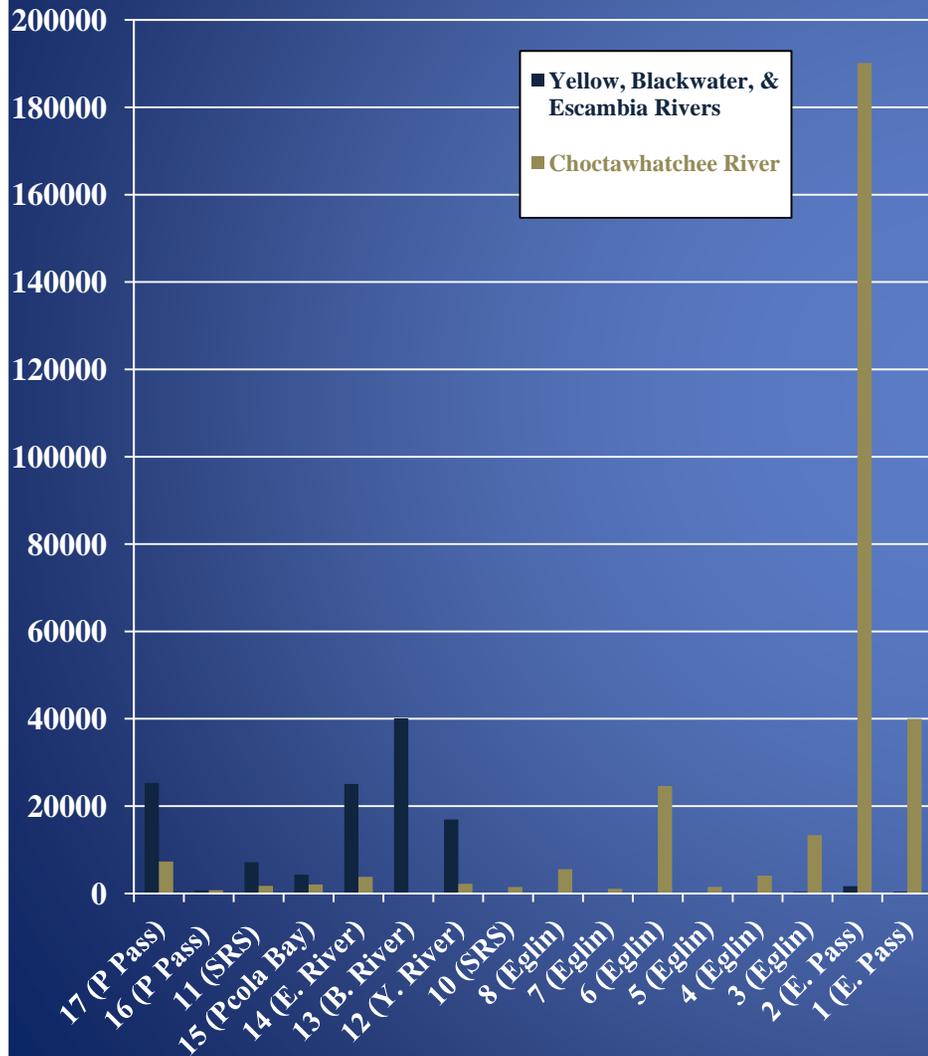

88% headed west

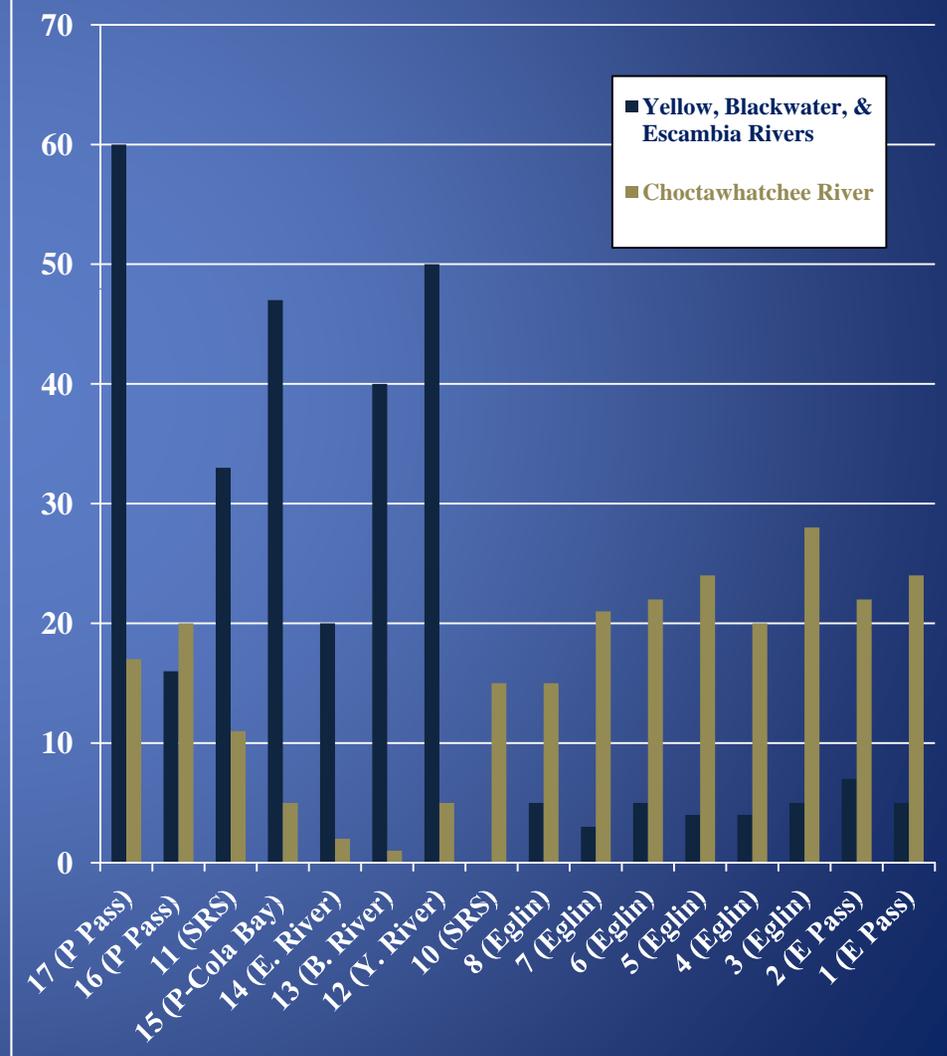

12 % headed east

% DETECTION VS. WIND SPEED

AVERAGE DETECTION SUCCESS ON RECEIVER 3 VS. RECEIVER 4 OVER GIVEN AVERAGE DAILY WIND SPEEDS

Receiver 3 was deployed 500 m from test pinger.

Receiver 4 was deployed 350 m from test pinger.

CONCLUSIONS

- Significantly improved Eglin's mission capabilities in defining seasonality of Gulf sturgeon occurrence to prevent impacts during military activities
- Expanded knowledge of Gulf sturgeon occurrence and movement patterns in areas not previously studied
- Movement and distribution patterns of sturgeon from different river systems have been documented
- Performance of acoustic technology in a harsh marine environment was tested and quantified

A large, powerful explosion or volcanic eruption is shown over the ocean. A massive plume of white steam and dark smoke rises from the water, reaching high into the sky. In the background, a large ship is visible on the water, with smaller waves and spray around it. The landscape in the distance consists of dry, brownish hills under a clear blue sky. The text '???' QUESTIONS ??? is overlaid in the center of the image.
