

## Texas Fort Bliss

---

### ***Facility and Location***

Fort Bliss comprises approximately 1.12 million acres of land in Texas and New Mexico. Vast ranges and training areas, coupled with the third longest runway in the nation, make Fort Bliss a premiere facility for training, mobilization, and deploying combat forces. Fort Bliss has transitioned to an Army Forces Command Installation with the primary tenant being the 1st Armor Division. It represents the largest maneuver area in the Army and is capable of accommodating every weapon system. It is the only Army training installation in the continental U.S. capable of firing long range air defense artillery missiles, such as Patriot, HAWK, and eventually the Theater High Altitude Air Defense System.

### ***Media Sampled and Findings***

**Groundwater** — Prior to 2007, eight samples from the operational ranges impact and boundary areas reported no detection.

**Sediment** — Prior to 2007, 29 samples from the operational ranges impact and boundary areas reported no detection.

**Soil** — Prior to 2007, 259 samples collected from the operational ranges impact and boundary areas reported no detection.

### ***Appropriate Actions***

Not Applicable. All samples were below the EPA and DoD Preliminary Remediation Goal of 15 ppb.
