

# STATE WAP/INRMP PROJECT INFORMATION FORM

<b>1 - Name and Description</b> <i>Provide the name and a general description of the project</i>							
<b>CAROLINA SPECIES AT RISK (SAR) PROJECT</b>							
<b>2 - Goals and Objectives:</b> <i>Describe the goals and objectives of the project</i>							
Goals: Promote positive conservation actions for SAR and their habitats on and/or near DoD installations in North and South Carolina to help eliminate the need to federally list these species.							
Objectives: <ol style="list-style-type: none"> <li>I. Determine the SAR, classified as G1 or G2, on and/or near military installations.</li> <li>II. Identify SAR habitats and map the habitat associations</li> <li>III. Survey SAR habitats/associations for presence/absence of identified SAR</li> <li>IV. Develop a cooperative conservation partnership focused on Carolina SAR</li> <li>V. Draft and promote the development of a Candidate Conservation Agreement (CCA) or CCA with Assurances (CCAA), as appropriate.</li> </ol>							
<b>3 - Geographic Location</b> <i>Describe project location. Attach GIS if available</i>							
Military installations and non-military lands located within the Coastal Plain and Sandhills Physiographic regions of North and South Carolina that contain habitats supporting SAR.							
<b>4 - Partners</b> <i>Identify key project partners</i>							
Partner		DoD	State	Local	NGO	Other	
Military installations		X					
USFWS						X	
NC Wildlife			X				
SC Fish and Game			X				
USDA Forest Service						X	
<b>5 - Potential Benefits to Partner Mission</b> <i>Describe project potential for increasing partner mission support through species conservation, habitat corridor development, etc.</i>							
All SAR on and/or near military installations are included as priority species in the North and South Carolina wildlife action plans. Focusing on these species and their habitats assist DoD with an effort to maintain training unencumbered by restrictions and helps the state natural resource agencies to focus on target species/habitats contained in their wildlife action plans. Working with other state, federal, local and private landowners and stakeholders will increase cooperative conservation efforts and promote positive natural resource actions on behalf of SAR and their habitats.							
<b>6 - Anticipated Tools or Products to Implement Project</b> <i>(check all that apply)</i>							
MOA/ MOU	Existing Program	Buffer Area Agreement	Education/ Outreach	Academia Involvement	State/Fed Legislation	Maps	Other

**7 - Funding and other Resources/Support** *Provide any details on funding leverage and potential sources of support*

- Legacy
- Farm Bill
- USFWS Grants

**8 - List potential short term goals/products and estimated completion date(s)**

<b>Deliverable/Goal</b>	<b>Completion Date</b>
<b>I. Identify targeted SAR</b>	<b>1 months</b>
<b>II. Map SAR habitat associations</b>	<b>12 months</b>
<b>III. Determine presence or absence of SAR on partner property</b>	<b>15 months</b>
<b>IV. Develop cooperative conservation partnership</b>	<b>8 months</b>
<b>V. Develop draft CCA or CCAA</b>	<b>17 month</b>

**9 - Project POC** *Please provide full contact information for the Project POC(s)*
