

This area is a Munitions Response Site.

Munitions are designed to be dangerous. Military personnel used our lands and waters across the United States for live-fire training and testing to defend our nation. As a result, ammo may be present on both land and in the water. No matter what you call it — ammo, explosives, unexploded ordnance (UXO), duds or souvenirs — remember munitions are dangerous and can explode if approached, touched, moved or disturbed.

Follow the 3Rs

Recognize

when you may have come across a munition and that munitions are dangerous

Retreat

Do not approach, touch, move or disturb it, but carefully leave the area

Report

immediately what you saw and where you saw it to local law enforcement — call 911
