

ACTIVE TRAINING RANGES

Military munitions are designed for use in warfare. Even practice and training munitions may contain an explosive charge that can cause serious injury. Never take munitions from active training ranges as souvenirs. Doing so places you, your family, and your community at risk.

For questions or additional information regarding active ranges, contact:

Always use caution when you are on or near an active training range and follow the 3Rs of Explosives Safety:

-  **R**ecognize – when you may have come across a munition and that munitions are dangerous.
-  **R**etreat – do not approach, touch, move or disturb it, but carefully leave the area.
-  **R**eport – call 911 and advise the police of what you saw and where you saw it.
