

THIS AREA IS A MUNITIONS RESPONSE SITE

Munitions Response Sites are areas where military munitions may still be present from past military activities. While many sites are safe for approved uses, it is important to stay aware of your surroundings when exploring outdoors. Munitions can be hidden by vegetation, soil, or water and may not be easy to recognize. If you encounter a suspicious item, follow the 3Rs of Explosives Safety.

MUNITIONS RESPONSE SITE

Dangerous
munitions from
past military
activity may remain
in this area.

For questions or additional information regarding this Munitions Response Site, contact:

Always use caution when you are on or near a Munitions Response Site and follow the 3Rs of Explosives Safety:

-  **R**ecognize – when you may have come across a munition and that munitions are dangerous.
-  **R**etreat – do not approach, touch, move or disturb it, but carefully leave the area.
-  **R**eport – call 911 and advise the police of what you saw and where you saw it.
